Source: KBI Global Investors as of 30/06/20. The risk characteristics are calculated using monthly gross returns over a 10 year period relative to the Index as at the 30/06/20. Portfolio Statistics are of a representative account and are calculated relative to the Index. The AUM listed above is Global ESG Strategy AUM. Weighted Avg. Mkt. Cap figures are in US Dollars.

Strategy Overview

Objective	Consistency. Downside protection. Lower risk. ESG
Style	Relative value. High quality. Multi cap. Diversified.
Products Screening	Global, Emerging Markets, Eurozone Fossil Fuel Reserves, CCC rated companies, Tobacco & others.

Investment Philosophy

We are "total return" investors.

Our conviction is that companies with the financial strength and discipline to maintain and grow their dividend commitments outperform.

Uniquely, we find such companies across all capitalisations, and in every sector and every region, even ones where dividends are low and not typically used as a method of analysis. By "looking where others don't look" we consistently find and exploit mispriced stocks.

The main reasons for outperformance are:

- Quality of information
- Better governance
- Plentiful positive earnings surprises
- Capital efficiency and financial discipline
- Lower volatility
- Better valuations

Returns are gross of fees in GBP. Our firm claims GIPS compliance and is annually verified by an independent verification firm to be so. The verification report from our verifier and our GIPS composite presentation are available upon request. The performance record disclosed here is that of the firm's composite for this strategy. The strategy is a well diversified, all cap, strategy that invests across all 24 industry sub classifications and the four major geographic global regions (North America, Europe, Japan and Pacific Basin ex Japan) of the global developed equity market. This strategy is constructed on a segmented basis by industry and region (as defined by the MSCI World Index) and no active currency management is undertaken. The strategy invests purely in those companies that pay above average dividends relative to their industry peer group. The investment process currently utilizes a security level ESG-rating provided by a third-party firm to assess whether a security will be traded within the strategy. The benchmark is the MSCI World Index, inclusive of net income. The Net index provides a better comparator for potential investors and representation of the investment strategy of the composite. The benchmark is designed to measure the equity market performance of developed market countries. The benchmark is market-cap weighted. Sources of foreign exchange rates may be different between the composite and the benchmark; but not materially so. Prior to September 2014, the strategy was managed using a negative screening process broadly based on faith based values. Since then, we employ an enhanced set of negative screens using similar values and integrate ESG ratings into our investment process. MSCI benchmark returns assume the reinvestment of dividends after the deduction of withholding taxes. See disclaimers for further information.

Investment Process

We summarise our process into three steps

Step 1

- Create regional industry group segments from MSCI Index.
- Eliminate stocks below segment average yield.
- Lower yield stocks, countries, industries will qualify.

Step 2

- Eliminate stocks and segments that fail sustainability, quality and growth criteria.
- Eliminate stocks with lowest ESG score.
- Rank remaining stocks.

Step 3

- Create portfolio targeting preferred financial criteria, ESG criteria and highest ranked stocks.

Current Global ESG Portfolio Characteristics

Mkt. Cap \$bn	Strategy	MSCI World Index	+/- %
<3 (small)	2.9	0.8	2.1
3-5 (mid-small)	3.2	2.1	1.1
5-10 (mid)	14.0	7.5	6.5
10-25 (mid-large)	29.2	17.1	12.1
>25 (large)	50.7	72.5	-21.8

Overview

We continued to ensure that the dividend flow on offer from the strategy was sustainable. There are many companies that are displaying very high dividend yields, but we would have concerns over the sustainability of such dividends given the uncertain economic outlook. In response, we lowered our dividend tilt slightly as we focused on safe and secure dividends. The dividend yield on the portfolio was 3.4% as at the end of the quarter which is still a healthy premium over the index.

What is clear is that although there has been a significant reduction and, in some cases, elimination of dividend payments in companies across the globe, there are still a high number of stocks with strong dividend resilience. Interestingly most of the significant dividend cutting has occurred in the European region, whereas in Japan, dividends are virtually untouched, and we are seeing significant growth in the dividend being distributed to shareholders. Looking at the regions combined, dividend growth over 1 year is still positive but is in low single digits. Our tilt towards dividend growth increased over the quarter as we continued our search for companies that have secure and growing dividends. If you want more information on this state of dividend payments on a global basis, please consult our paper on this topic which was circulated to clients prior to the quarter end.

As stated previously, our primary focus in response to the pandemic was to analyse balance sheets in terms of having significant cash reserves and low debt obligations. This continued into Q2 as we maintained our emphasis on higher quality metrics across the portfolio, while also reducing our exposure to net debt to equity. Importantly, we were able to do this without sacrificing our commitment to value. Indeed, we managed to increase our value tilt marginally across various metrics.

Disclaimer

KBI Global Investors Ltd is regulated by the Central Bank of Ireland and subject to limited regulation by the Financial Conduct Authority in the UK. Details about the extent of our regulation by the Financial Conduct Authority are available from us on request. KBI Global Investors claims compliance with the Global Investment Performance Standards (GIPS®). Gross results shown do not show the deduction of investment management fees. A client's actual return will be reduced by the management fees and any other expenses which may be incurred in the management of an investment account. For example, a £1,000,000 investment with an assumed annual return of 5% with a management fee of 0.85% would accumulate £8,925 in fees during the first year, £48,444 in fees over five years and £107,690 in fees over ten years. Under MiFID II this is deemed marketing material and should not be regarded as investment research. The firm is defined as the institutional business of KBI Global Investors Ltd., and its subsidiary, KBI Global Investors (North America). The term 'institutional business' shall have the meaning of all pensions, charity and corporate asset management strategies of the firm as they pertain to client funds. Unitised clients are specifically excluded from composite assignment given that their underlying unit holdings are already assigned to composites and such strategies are therefore accounted for in composite values and returns. The firm definition has been re-defined on two occasions over recent years; on 30 September 2010 to reflect the firm's sale to RHJL by our previous parent firm KBC Asset Management NV, and on 1 October 2016 to reflect the firm's sale to Amundi Asset Management. No change in investment process arose as a result of these sales. To receive a copy of the compliant presentation and/or a list of composite descriptions, please contact sales@kbigi.com. **IMPORTANT RISK DISCLOSURE STATEMENT:** This material is provided for informational purposes only and does not constitute an offer to sell or the solicitation of an offer to purchase any security, product or service including any group trust or fund managed by KBI Global Investors Ltd, or any of its affiliates (collectively, "KBI Global Investors"). The information contained herein does not set forth all of the risks associated with this strategy, and is qualified in its entirety by, and subject to, the information contained in other applicable disclosure documents relating to such a strategy. KBI Global Investors Ltd's investment products, like all investments, involve the risk of loss and may not be suitable for all investors, especially those who are unable to sustain a loss of their investment. The views expressed in this document are expressions of opinion only and should not be construed as investment advice. Past performance may not be a reliable guide to future performance and the value of investments may fall as well as rise. Investments denominated in foreign currencies are subject to changes in exchange rates that may have an adverse effect on the value, price or income of the product. Income generated from an investment may fluctuate in accordance with market conditions and taxation arrangements. Performance for periods of more than 1 year is annualized. All MSCI data is provided "as is". In no event shall MSCI, its affiliates, or any MSCI data provider have any liability of any kind in connection with the MSCI data. No further distribution or dissemination of the MSCI data is permitted without MSCI's prior express written consent. Net total return indices reinvest dividends after the deduction of withholding taxes, using (for international indices) a tax rate applicable to non-resident institutional investors who do not benefit from double taxation treaties. The products mentioned in this Document may not be eligible for sale in some states or countries, nor suitable for all types of investors. In some tables and charts, due to rounding, the sum of the individual components may not appear to be equal to the stated total(s)
