

KBIGI MANAGED FUND

Fund Objective

The investment objective of the KBIGI Managed Fund is to achieve long term capital growth. The Fund is structured as a fund of funds and seeks to achieve its objective by investing primarily in a range of global equities, bonds, alternative investments, and cash with weightings determined by KBI Global Investors' relative assessment of potential returns, valuation and risk for each of the asset classes. Our approach to equity investing is to create highly diversified portfolios targeting quality companies that pay higher dividends than their peers. The Fund's performance is measured against a custom benchmark calculated by the Investment Manager by taking the aggregate weighted returns for each asset class of equities, bonds, alternatives and cash.

Gross results shown do not show the deduction of investment management fees. A client's actual return will be reduced by the management fees and any other expenses which may be incurred in the management of an investment account. For example, a €1,000,000 investment with an assumed annual return of 5% with a management fee of 0.85% would accumulate €8,925 in fees during the first year, €48,444 in fees over five years and €107,690 in fees over ten years.
