## **3. Base Currency**

Euro.

## **4. Investment Objective**

The investment objective of the Fund is to generate the highest possible return for its Shareholders by investing primarily in equity and equity-related securities of international companies involved in the energy solutions sector as further described below.

## 5. Investment Policy

In pursuit of its investment objective, the Fund will invest primarily, either directly or indirectly (through investment in underlying collective investment schemes), in equity and equity-related securities (including, but not limited to, warrants, convertibles, rights which are issued by a company to allow holders to subscribe for additional securities issued by that company, ADRs and GDRs) of companies listed or traded on Recognised Exchanges worldwide which, in the opinion of the Investment Manager, generate a substantial proportion of their turnover and operate on a sustainable basis in the energy solutions sector. The Fund will invest across all parts of the energy solutions sector including solar, wind, biomass, hydro, fuel cells and geo-thermal energy sectors.

The Fund is not subject to any specific geographic constraints provided however that the Fund will not invest more than 30% of net assets in emerging markets.

The Fund may also invest, from time to time, up to 10% of net assets in UCITS and alternative investment funds (which fall within the requirements set out in the Central Bank's guidance), which have an investment policy in line with the investment policy of the Fund. Such alternative investment funds will be domiciled worldwide (including but not limited to Europe, the US and Asia).

The Fund is considered to be actively managed in reference to the Index by virtue of the fact that it uses the Index for performance comparison purposes. However, the Index is not used to define the portfolio composition of the Fund or as a performance target and the Fund may be wholly invested in securities which are not constituents of the Index.

Pending investment of the proceeds of a placing or offer of Shares or where market or other factors so warrant, the Fund's assets may be held in money market instruments, including but not limited to certificates of deposit, floating rate notes and commercial paper listed or traded on Recognised Exchanges, and in cash deposits denominated in such currency or currencies as the Directors may determine having consulted with the Investment Manager.

### *Investment Strategy*

Securities for the Fund are selected from an alternative-energy-themed universe of companies. The Investment Manager actively manages the Fund through specialist stock selection, making its decisions based on a range of factors including but not limited to profitability, financial strength, quality of management, risk profile, and environmental, social and governance performance.

### *Sustainable Finance*

The Fund promotes environmental characteristics by investing in companies which in the opinion of the Investment Manager generate a substantial proportion of their turnover and operate on a sustainable basis in the energy solutions sector, including but not limited to solar, wind, biomass, hydro, fuel cells and geothermal energy. The provision of clean energy products and services is, in the opinion of the Investment Manager, a benefit to the environment.

In identifying investments which allow the Fund to promote environmental characteristics, the Investment Manager adopts the following strategies:

- The Investment Manager identifies companies which operate in the energy solutions sector and integrates an analysis of such companies' Environmental, Social and Governance ("ESG") performance into its investment analysis and investment decisions.
- The Investment Manager carries out its own assessment of the environmental performance of companies in which it invests, based on its own research and knowledge of the companies, public information and information (including specialised ESG information) and ratings from external data providers ("Data Providers").
- The portfolio construction process employed by the Investment Manager excludes holdings deemed inconsistent with its Responsible Investment Guidelines or that are involved with certain controversial sectors, as determined by the Investment Manager's Responsible Investment Committee. The Fund does not invest in any company which is not involved in the energy solutions sector, including but not limited to solar, wind, biomass, hydro, fuel cells and geothermal energy. Further, the Fund can not invest in companies which are involved in certain activities including tobacco manufacturing, coal extraction and coal-fired electricity generation, in excess of certain thresholds. Full details of the exclusions and thresholds are available in the Responsible Investing Policy of the Investment Manager which can be viewed on its website at [www.kbiglobalinvestors.com](http://www.kbiglobalinvestors.com).

The Investment Manager also assesses the governance practices and governance performance of companies in which it invests. This assessment is based on the Investment Manager's own research and knowledge of the company based on its direct interactions with companies, its analysis of the financial statements and related materials of companies, and information including specialised governance information and ratings from at least one Data Provider in order to satisfy itself that the relevant issuers follow good governance practices, in particular with respect to sound management structures, employee relations, remuneration of staff and tax compliance.

The Investment Manager monitors compliance with the environmental characteristics outlined above on a regular basis through both its own ongoing research and monitoring of portfolio companies as well as through the use of research and ratings from Data Providers.

The Investment Manager monitors a range of sustainability indicators to measure the environmental characteristics outlined above, including:

- The percentage of revenues earned on an estimated basis by portfolio companies which are from the energy solutions sector.
- The weighted average ESG rating of the portfolio, as determined by the use of ESG ratings of companies, supplied by Data Providers.
- The carbon intensity of the portfolio, measured by an external provider of carbon footprint measurement services.

The Fund has designated the Index as a reference benchmark in order to determine whether the Fund is promoting environmental characteristics. In the opinion of the Investment Manager, the Index is consistent with the environmental characteristics promoted by the Fund because it is comprised of companies in the energy solutions sector whose technologies focus on generation and use of clean energy, lower-CO<sub>2</sub> renewables, conservation and energy efficiency. More information about the Index and its method of calculation is available at [https://nexindex.com/about\\_nex.php](https://nexindex.com/about_nex.php).

The Fund may employ (subject to the conditions and within the limits laid down by the Central Bank) techniques and instruments relating to transferable securities, including but not limited to forward foreign exchange contracts, futures, stocklending, swaps and any other techniques and instruments as the Investment Manager, as appropriate, may consider appropriate for efficient portfolio management purposes. The Fund may employ techniques and instruments intended to provide protection against exchange rate risks in the context of the management of its assets and liabilities.

Efficient portfolio management transactions referred to above may be entered into by the Investment Manager with one of the following aims a) a reduction of risk b) a reduction of cost with no increase or a minimal increase in risk; c) generation of additional capital or income with no, or an acceptably low level of risk (relative to the expected return).

The Fund may, subject to the conditions and limits laid down by the Central Bank, enter into futures contracts on securities, securities indexes and currencies. The Fund may use the foregoing techniques for efficient portfolio management and to hedge against changes in (i) exchange rates, (ii) securities prices.

Forward currency contracts may, subject to the conditions and limits laid down by the Central Bank, be used in order to hedge currency exposures of the Fund in accordance with the requirements of the Central Bank. Such currency exposure will arise where the assets in which the Fund invests are denominated in a different currency than the Base Currency of the Fund.

The Fund may enter into swap agreements with respect to currencies and securities. The Fund may use these techniques to protect against changes in currency exchange rates.

In respect of currencies the Fund may utilise currency swap contracts where the Fund may exchange currencies at a fixed rate of exchange for currencies at a floating rate of exchange or currencies at a floating rate of exchange for currencies at a fixed rate of exchange. These contracts allow the Fund to manage its exposures to currencies in which it holds investment. For these instruments the Fund's return is based on the movement of currency exchange rates relative to a fixed currency amount agreed by the parties.

The Fund's global exposure (as prescribed in the Central Bank UCITS Regulations) relating to financial derivative instruments shall not exceed 100% of the Net Asset Value of the Fund and will be measured using the commitment approach.

The ICAV may compulsorily redeem the Shares of any Shareholder who holds less than the Minimum Holding except where such breach of the Minimum Holding results from a depreciation in the value of that Shareholder's holding.

The Directors have the right at their discretion to waive these restrictions at any time, provided that Shareholders in the same position in the same Class shall be treated equally and fairly.

## **8. Application for Shares**

Applications for Shares may be made through the Administrator or Paying Agent. Applications accepted by the Administrator or Paying Agent on behalf of the Fund and received by the Administrator or Paying Agent prior to the Dealing Deadline for any Dealing Day will be dealt with on that Dealing Day. The Paying Agent is responsible for forwarding applications for Shares it receives to the Administrator. Initial applications should be made using an Application Form obtained from the Administrator or Paying Agent. Subsequent purchases of Shares following the initial subscription may be made to the Administrator or Paying Agent by way of written communication or such other means and should contain such information as may be specified from time to time by the Directors or their delegate.

#### *Currency of Payment*

Subscription monies are payable in the currency of denomination of the relevant Share Class. However, the ICAV may accept payment in such other currencies as the ICAV may agree at the prevailing exchange rate quoted by the relevant Distributor or Paying Agent. The cost and risk of converting currency will be borne by the investor.

#### *Timing of Payment*

Payment in respect of subscriptions must be received in cleared funds by the Administrator no later than 2 Business Days after the relevant Dealing Day provided that the ICAV reserves the right to defer the issue of Shares until receipt of cleared subscription monies by the Fund. If payment in cleared funds in respect of a subscription has not been received by the relevant time, the ICAV or its delegate may (and in the event of non-clearance of funds, shall) cancel the allotment and/or charge the investor interest at the 7 day London Interbank Offer Rate (LIBOR) as fixed by the British Banking Association (i.e. LIBOR + 1%), which will be paid into the Fund together with an administration fee of Euro 100, which is payable to the ICAV. The ICAV may waive either of such charges in whole or in part. forwarding redemption requests to the Administrator. Requests for redemption received prior to the Dealing Deadline for any Dealing Day will be dealt with on that Dealing Day. #### *Timing of Payment*

and the Dealing Deadline for subscriptions in the Fund into which conversion is requested. Any applications received after such time will be dealt with on the next Dealing Day which is a dealing day for the relevant Funds, unless the ICAV in its absolute discretion otherwise determines. Conversion requests will only be accepted where cleared funds and completed documents are in place from original subscriptions.

Where the value of Shares converted from the Original Fund are not sufficient to purchase an integral number of Shares in the Fund, fractions of Shares may be issued to four decimal places provided, however, that fractional shares shall not carry any voting rights.

Within these maximum permitted limits, the Investment Manager's fees may differ between Classes of the Fund as outlined below in the section headed Class Specific Fee Rates.

### *Administrator's Fees*

The Administrator shall be entitled to receive out of the assets of the Fund an annual fee at a rate not to exceed 0.10% of the Net Asset Value of each relevant Class (plus VAT if any thereon). Details of the different Administrator's fees applicable to each Class are available from the ICAV. Minimum fees may apply depending on Fund value and will be payable by the Fund.

In the case of US Dollar Class A (Distributing), US Dollar Class B (Distributing), Sterling Class A (Distributing), Sterling Class B (Distributing), Euro Class E (Distributing), Euro Class H (Distributing) and Euro Class I (Distributing), management fees, investment management fees and recurring expenses, or a portion thereof, will be charged against the capital of the relevant Class in such manner as the Directors may from time to time decide. Shareholders should note that capital of the relevant Class may be eroded and income shall be achieved by foregoing the potential for future capital growth. Thus, on redemptions of holdings Shareholders of the relevant Class may not receive back the full amount invested. The policy of charging management fees, investment management fees and recurring expenses, or a portion thereof, to capital seeks to maximise distributions but it will also have the effect of lowering the capital value of your investment and constraining the potential for future capital growth.

In respect of all other Share Classes of the Fund, recurring expenses (excluding management and investment management fees) will be charged to capital in such manner as the Directors may from time to time decide. Shareholders of accumulating Share Classes should note that capital of the relevant Class may be temporarily eroded as a result of this charging method. Upon redemptions of holdings, Shareholders in accumulating Share Classes receive both capital and income, accordingly, while they may not receive back the full amount of capital invested, the overall redemption amount is unaffected. The policy of charging recurring expenses, or a portion thereof, to capital in respect of accumulating Share Classes will have the effect of temporarily increasing the income element of your investment but it will also have the effect of lowering the capital value of your investment, until such time as income is capitalised (which is currently every six months).

### **13. Dividends and Distributions**

With the exception of US Dollar Class A (Distributing), US Dollar Class B (Distributing), Sterling Class A (Distributing), Sterling Class B (Distributing), Euro Class E (Distributing), Euro Class H (Distributing) and Euro Class I (Distributing), all Share Classes are accumulating shares. The income and earnings and gains of the Fund, attributable to each Share Class will be accumulated and reinvested on behalf of the relevant Shareholders.

The Directors may declare a dividend once a year (or more frequently at their discretion) out of the net income available for distribution in relation to the US Dollar Class A (Distributing), US Dollar Class B (Distributing), Sterling Class A (Distributing), Sterling Class B (Distributing), Euro Class E (Distributing), Euro Class H (Distributing) and Euro Class I (Distributing) Shares (whether in the form of dividends, interest or otherwise), and/or net realised and unrealised capital gains (i.e. realised and unrealised capital gains net of all realised and unrealised losses), subject to certain adjustments. The Directors may also declare interim dividends on the same basis. Dividends will normally be paid on or before the date falling four months after the previous financial year end in respect of the amount available for distribution as at that previous financial year end. All distributing Share Classes shall rank for dividends as and from the beginning of the accounting period in which they were issued. If declared, dividends will be paid to holders of the relevant Share Class. Dividends will normally be paid by electronic or telegraphic transfer. All dividends unclaimed after a period of six years shall be forfeited and shall revert to the Fund and be attributed to the relevant Share Class. Dividends shall not bear interest against the Fund.

The ICAV will automatically re-invest any distribution entitlements in further Shares of the relevant Class of the Fund if distributions are less than US\$100 (or equivalent), £50 or €100 in value (depending on the relevant denomination of the Shares) unless the ICAV has received instructions in writing to the contrary from the relevant Shareholder.

Sterling Class A Shares have already been issued and approved as Reporting Shares for UK Tax purposes by HM Revenue & Customs. It is the Directors' intention to also treat Sterling Class B, Sterling Class C, Sterling Class D and Sterling Class E Shares as Reporting Shares once issued. Although the Directors will endeavour to ensure that all the unissued Shares listed above are approved by HM Revenue & Customs as Reporting Shares and that the issued Shares continue to be so approved, it cannot be guaranteed that this result will be achieved or maintained at all times. The ICAV currently intends that all other Share Classes in this Fund will be Non-Reporting Shares, however, the ICAV cannot guarantee that this position will not change.

UK potential investors are advised to review the section headed “Additional Information for Investors in the United Kingdom” on page 125 of the Prospectus for more information.
