Background to the ICAV**Description**

KBI Funds ICAV is an open-ended umbrella type Irish Collective Asset-management Vehicle (the “ICAV”) with limited liability and segregated liability between Funds. The ICAV was established on 24 August 2016 having converted from company status by way of continuation in accordance with applicable law and the Central Bank requirements.

The ICAV was previously incorporated in Ireland on 9 June 2004 as a public limited company before the conversion into an Irish Collective Asset-management Vehicle and complied with the provisions in the Companies Act 2014 up until its conversion date. The ICAV is authorised by the Central Bank of Ireland (the “Central Bank”) pursuant to the provisions of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011, (S.I. 352 of 2011) (as amended) (the “UCITS Regulations”) and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the “Central Bank UCITS Regulations”) and the Irish Collective Asset-Management Act 2015 (the “ICAV Act”).

The ICAV is structured as an umbrella Fund consisting of different Funds comprising one or more Classes. The Shares of each Class of a Fund will rank pari passu with each other in all respects provided that they may differ as to certain matters including currency of denomination, hedging strategies, if any, applied to the currency of a particular Class or against interest rate risk applying to a particular Class, dividend policy, the level of fees and expenses to be charged, subscription or redemption procedures or the Minimum Subscription and Minimum Holding applicable.

The assets of each Fund will be separate from one another and will be invested separately in accordance with the investment objective and policies of each Fund. A separate portfolio of assets is not maintained for each Class.

Overdrawn positions that exist in the Funds of the ICAV are as a result of transaction related activity and are not a result of a leverage strategy. While leverage is allowed as per the Prospectus, the longstanding policy of the Investment Manager is not to employ a leverage strategy on any of the Funds.

At year-end, there were fourteen Funds in existence:

	Launch Date	Base Currency
KBI Global Energy Transition Fund*	10 April 2008	EUR
KBI Water Fund	10 April 2008	USD
KBI Emerging Markets Equity Fund	30 July 2010	EUR
KBI Developed Equity Fund	8 December 2010	EUR
KBI Global Resource Solutions Fund	3 July 2009	EUR
KBI Global Equity Fund	14 March 2011	EUR
KBI 50/50 Global/Eurozone Equity Fund**	23 March 2011	EUR
KBI Eurozone Equity Fund	21 March 2011	EUR
KBI North America Equity Fund	23 October 2013	USD
KBI ACWI Equity Fund	17 April 2015	EUR
KBI Integris Global Equity Fund	30 November 2016	EUR
KBI Global Sustainable Infrastructure Fund	27 September 2017	EUR
KBI Diversified Growth Fund	26 November 2019	EUR
KBI Global Small Cap Equity Fund	29 July 2021	EUR
KBI Eco Water Fund (ICAV)***	23 October 2019	JPY

*Fund name changed from KBI Energy Solutions Fund to KBI Global Energy Transition Fund on 31 March 2022.

**Fund ceased trading on 11 November 2021.

***This Annual Report and Audited Financial Statements are for all Sub-Funds of the ICAV excluding the KBI Eco Water Fund (ICAV) whose Financial Statements are prepared as a standalone basis for the financial reporting year ending 28 February. All primary statements and related notes are for the 14 Sub-Funds listed only. The Financial Statements of the KBI Eco Water Fund (ICAV) are available from the administrator on request.

Background to the ICAV (Continued)**Investment Objective and Policy*****KBI Global Energy Transition Fund***

The Fund aims to achieve the highest possible return for its shareholders by investing primarily in shares of international companies involved in the alternative energy sector.

The Fund will invest primarily in shares of companies trading on the recognised stock exchanges worldwide that operate in the alternative energy sector on a sustainable basis. The Fund will not invest more than 30% of net assets in emerging markets.

The Fund is considered to be actively managed in reference to the Wilderhill New Energy Global Innovation Index by virtue of the fact that it uses the Index for performance comparison purposes. However the Index is not used to define the portfolio composition of the Fund or as a performance target and the Fund may be wholly invested in securities which are not constituents of the Index.

Effective 31 March 2022, KBI Energy Solutions Fund changed name to KBI Global Energy Transition Fund.

KBI Water Fund

The aim of the Fund is to generate the highest possible return for its shareholders by investing primarily in shares of international companies involved in the water sector.

The Fund will invest primarily in the shares of companies that are listed on recognised stock exchanges worldwide and who operate on a sustainable basis in the water industry. The Fund will not invest more than 30% of net assets in emerging markets.

The Fund is considered to be actively managed in reference to the MSCI ACWI Index by virtue of the fact that it uses the Index for performance comparison purposes. However the Index is not used to define the portfolio composition of the Fund or as a performance target and the Fund may be wholly invested in securities which are not constituents of the Index.

KBI Emerging Markets Equity Fund

The aim of the Fund is to achieve long-term growth by investing in shares of companies in global emerging markets that pay out a higher than average dividend. The Fund is measured against the MSCI Emerging Markets Index.

The Fund will invest primarily in shares of companies listed or trading on stock exchanges of emerging market countries and that pay out above average dividends.

The Fund is considered to be actively managed in reference to the MSCI Emerging Markets Index by virtue of the fact that it seeks to outperform the Index and it uses the Index as a universe from which to select securities. The majority of the Fund's securities may be components of and may have similar weightings to the Index, however the Investment Manager will use its discretion to invest in securities or sectors not included in the Index in order to take advantage of investment opportunities. The investment strategy will restrict the extent to which the Fund's holdings may deviate from the Index which may be limited. This is likely to influence the extent to which the Fund can outperform the Index.

KBI Developed Equity Fund

The aim of the Fund is to achieve long-term capital growth by investing in the shares of companies with an above average dividend pay-out. The Fund is measured against the MSCI World Index.

The Fund will invest primarily in shares of companies listed or trading on the major worldwide stock exchanges and that pay out above average dividends.

The Fund is considered to be actively managed in reference to the MSCI World Index by virtue of the fact that it seeks to outperform the Index and it uses the Index as a universe from which to select securities. The majority of the Fund's securities may be components of and may have similar weightings to the Index, however the Investment Manager will use its discretion to invest in securities or sectors not included in the Index in order to take advantage of investment opportunities. The investment strategy will restrict the extent to which the Fund's holdings may deviate from the Index which may be limited. This is likely to influence the extent to which the Fund can outperform the Index.

KBI Global Resource Solutions Fund

The aim of the Fund is to generate the highest possible return for its shareholders by investing in shares of international companies involved in environmental sectors.

The Fund will invest primarily in the shares of companies that are listed on recognised stock exchanges worldwide and that operate in environmental sectors such as, but not limited to, water, agriculture, renewable energy, energy efficiency and water management.

Background to the ICAV (Continued)**Investment Objective and Policy (Continued)*****KBI Global Resource Solutions Fund (Continued)***

The Fund is considered to be actively managed in reference to the S&P Global Natural Resources Index by virtue of the fact that it uses the Index for performance comparison purposes. However the Index is not used to define the portfolio composition of the Fund or as a performance target and the Fund may be wholly invested in securities which are not constituents of the Index.

KBI Global Equity Fund

The aim of the Fund is to achieve long-term capital growth by investing in the shares of companies with an above average dividend pay-out. The Fund is measured against the MSCI World Index.

The Fund will invest primarily in shares of companies listed or trading on the major worldwide stock exchanges and that pay out above average dividends. The Fund may invest up to 20% of its Net Asset Value in the KBI Emerging Markets Equity Fund. There will be no Investment Manager fees charged on this investment.

The Fund is considered to be actively managed in reference to the MSCI World Index by virtue of the fact that it seeks to outperform the Index and it uses the Index as a universe from which to select securities. The majority of the Fund's securities may be components of and may have similar weightings to the Index, however the Investment Manager will use its discretion to invest in securities or sectors not included in the Index in order to take advantage of investment opportunities. The investment strategy will restrict the extent to which the Fund's holdings may deviate from the Index which may be limited. This is likely to influence the extent to which the Fund can outperform the Index.

KBI 50/50 Global/Eurozone Equity Fund

The aim of the Fund was to achieve long-term growth by investing in the shares of companies that pay out a higher than average dividend.

The Fund did invest primarily in shares of companies trading on the major world stock exchanges and that pay out above average dividends.

Fifty percent (50%) of the assets of the Fund were considered to be actively managed in reference to the MSCI EMU Index and fifty percent (50%) of the assets of the Fund were considered to be actively managed in reference to the MSCI World ex Eurozone Index by virtue of the fact that the relevant portion of the assets of the Fund seeks to outperform the relevant Index and uses the relevant Index as a universe from which to select securities. The majority of the Fund's securities may be components of and may have similar weightings to the relevant Index, however the Investment Manager will use its discretion to invest in securities or sectors not included in the relevant Index in order to take advantage of investment opportunities. The investment strategy would restrict the extent to which the Fund's holdings may deviate from the relevant Index which may be limited. This was likely to influence the extent to which the Fund can outperform the relevant Index.

The Fund ceased trading on 11 November 2021 and is in the process of getting revoked as at the year end date.

KBI Eurozone Equity Fund

The aim of the Fund is to achieve long-term growth by investing in the shares of companies in the Eurozone area that pay out a higher than average dividend. The Fund is measured against the MSCI EMU Index.

The Fund will invest primarily in shares of companies trading on stock exchanges of the Eurozone area and that pay out above average dividends.

The Fund is considered to be actively managed in reference to the MSCI EMU Index by virtue of the fact that it seeks to outperform the Index and it uses the Index as a universe from which to select securities. The majority of the Fund's securities may be components of and may have similar weightings to the Index, however the Investment Manager will use its discretion to invest in securities or sectors not included in the Index in order to take advantage of investment opportunities. The investment strategy will restrict the extent to which the Fund's holdings may deviate from the Index which may be limited. This is likely to influence the extent to which the Fund can outperform the Index.

KBI North America Equity Fund

The aim of the Fund is to achieve long-term capital growth by investing in the shares of companies which offer a high dividend pay-out.

The Fund will invest primarily in shares of North American (U.S. and Canada) companies listed or trading on recognised exchanges worldwide.

Background to the ICAV (Continued)**Investment Objective and Policy (Continued)*****KBI North America Equity Fund (Continued)***

The Fund is considered to be actively managed in reference to the MSCI North America Index by virtue of the fact that it seeks to outperform the Index and it uses the Index as a universe from which to select securities. The majority of the Fund's securities may be components of and may have similar weightings to the Index, however the Investment Manager will use its discretion to invest in securities or sectors not included in the Index in order to take advantage of investment opportunities. The investment strategy will restrict the extent to which the Fund's holdings may deviate from the Index which may be limited. This is likely to influence the extent to which the Fund can outperform the Index.

KBI ACWI Equity Fund

The aim of the Fund is to achieve the highest possible return by investing in the shares of companies that are part of the MSCI ACWI Index and that in the opinion of the Investment Manager offer a high dividend yield. The Fund is measured against the MSCI ACWI Index.

The Fund will invest primarily in shares of companies listed or trading on the major worldwide stock exchanges and that pay out above average dividends. The Fund may invest up to 20% of its Net Asset Value in the KBI Emerging Markets Equity Fund. There will be no Investment Manager fees charged on this investment.

The Fund is considered to be actively managed in reference to the MSCI ACWI Index by virtue of the fact that it seeks to outperform the Index and it uses the Index as a universe from which to select securities. The majority of the Fund's securities may be components of and may have similar weightings to the Index, however the Investment Manager will use its discretion to invest in securities or sectors not included in the Index in order to take advantage of investment opportunities. The investment strategy will restrict the extent to which the Fund's holdings may deviate from the Index which may be limited. This is likely to influence the extent to which the Fund can outperform the Index.

KBI Integris Global Equity Fund

The aim of the Fund is to achieve long-term capital growth by investing in the shares of higher dividend paying companies in their regional industry group. The Fund is measured against the MSCI World Index.

The Fund will invest primarily in shares of companies listed or trading on the major worldwide stock exchanges. The Investment Manager integrates environmental, social and governance ("ESG") factors into its investment process and excludes holdings deemed inconsistent with its Responsible Investment guidelines. The ESG screening process is designed to exclude investment in certain controversial sectors as determined by the Investment Manager's Responsible Investment Committee. The Investment Manager's target is that the Fund's ESG score is higher than the benchmark.

The Fund is considered to be actively managed in reference to the MSCI World Index by virtue of the fact that it seeks to outperform the Index and it uses the Index as a universe from which to select securities. The majority of the Fund's securities may be components of and may have similar weightings to the Index, however the Investment Manager will use its discretion to invest in securities or sectors not included in the Index in order to take advantage of investment opportunities. The investment strategy will restrict the extent to which the Fund's holdings may deviate from the Index which may be limited. This is likely to influence the extent to which the Fund can outperform the Index.

KBI Global Sustainable Infrastructure Fund

The aim of the Fund is to generate the highest possible return for its shareholders and outperform the S&P Global Infrastructure Index by investing primarily in shares of listed companies operating in infrastructure related sectors.

The Fund will invest primarily in shares of companies listed or traded on the major worldwide stock exchanges which generate a substantial portion of their turnover from the provision of sustainable infrastructure facilities and services. Such companies are primarily involved in the supply or treatment of water, waste water and energy, or in the provision, maintenance or enhancement of energy infrastructure, water infrastructure or infrastructure designed to support the production and efficient distribution of food and crops.

The Fund is considered to be actively managed in reference to the S&P Global Infrastructure Index by virtue of the fact that it uses the Index for performance comparison purposes. However the Index is not used to define the portfolio composition of the Fund or as a performance target and the Fund may be wholly invested in securities which are not constituents of the Index.

Background to the ICAV (Continued)**Investment Objective and Policy (Continued)*****KBI Diversified Growth Fund***

The aim of the Fund is to provide steady long term capital growth.

The Fund is structured as a Fund of Funds and will invest in a combination of collective investment schemes, which are designed to provide exposure to various asset classes such as global equities and equity-related securities, global debt and debt-related securities, currencies and commodities.

The Fund is actively managed without reference to any benchmark meaning that the Investment Manager has full discretion over the composition of the Fund's portfolio, subject to the stated investment objectives and policies.

KBI Global Small Cap Equity Fund

The Fund's investment objective is to outperform the Index and to achieve long-term growth by investing in a portfolio of small cap equity and equity-related securities of companies located in developed markets.

In pursuit of its investment objective, the Fund will invest primarily, either directly or indirectly (through investment in underlying collective investment schemes), in small cap equity and equity-related securities (including, but not limited to, warrants, convertibles, rights which are issued by a company to allow holders to subscribe for additional securities issued by that company, ADRs and GDRs) listed or traded on recognised Exchanges in developed markets.

The Fund is considered to be actively managed in reference to the Index by virtue of the fact that it seeks to outperform the Index and it uses the Index as a universe from which to select securities. The majority of the Fund's securities may be components of and may have similar weightings to the Index, however the Investment Manager will use its discretion to invest in securities or sectors not included in the Index in order to take advantage of investment opportunities. The investment strategy will restrict the extent to which the Fund's holdings may deviate from the Index which may be limited. This is likely to influence the extent to which the Fund can outperform the Index.

Net Asset Value

The Net Asset Value of each Fund or, if there are different Classes within a Fund, each Class will be calculated by the Administrator as at the Valuation Point on or with respect to each Dealing Day in accordance with the instrument. The Net Asset Value of a Fund shall be determined as at the Valuation Point for the relevant Dealing Day by valuing the assets of the relevant Fund (including income accrued but not collected) and deducting the liabilities of the relevant Fund (including a provision for duties and charges, accrued expenses and fees and other liabilities). The Net Asset Value of a Fund will be expressed in the Base Currency of the Fund, or in such other currency as the Directors may determine either generally or in relation to a particular Class or in a specific case.

Dealing Day means every Business Day or such other day or days as may be determined by the Directors and notified in advance to Shareholders provided that there shall be at least two Dealing Days in each month.

For KBI Global Energy Transition Fund, KBI Water Fund, KBI Emerging Markets Equity Fund, KBI Developed Equity Fund, KBI Global Resource Solutions Fund, KBI Global Equity Fund, KBI 50/50 Global/Eurozone Equity Fund, KBI Eurozone Equity Fund, KBI North America Equity Fund, KBI ACWI Equity Fund, KBI Integris Global Equity Fund, KBI Global Sustainable Infrastructure Fund, KBI Diversified Growth Fund, and KBI Global Small Cap Equity Fund, Business Day means every day, other than a Saturday or Sunday, which are bank business days in Ireland and in such other market or markets to which the Fund has, in the reasonable opinion of the Investment Manager, a substantial exposure or such other day or days as the Directors may determine and notify in advance to Shareholders.

Investment Manager's Report**KBI Global Energy Transition Fund***

The KBI Global Energy Transition Fund increased by 9.6% during the 12 months period to end August 2022, while the Wilderhill New Energy Global Innovation Index decreased by 8.3% and MSCI ACWI decreased by 1.3% (in EUR terms). The Fund generated a positive return of 64.1% during the 12 months period to end August 2021, outperforming the Wilderhill New Energy Global Innovation Index which appreciated by 45.6% (in EUR terms). The Fund was in compliance with the strategy and objectives as set out in the prospectus.

The strategy achieved a strong absolute return in this twelve-month period despite the more muted tone of equity markets overall. Overall equity markets became more jittery amid increasing concerns over high inflation, fiscal tightening, and a potential macro slowdown. Energy security issues escalated in Europe over the period, due to the invasion of Ukraine with reduced gas flows from Russia causing gas and electricity prices to reach record highs. However, there was positive sentiment towards the energy transition theme as the EU (European Union) announced details of its policy response to the energy crisis. The REPowerEU (a plan to rapidly reduce dependence on Russian fossil fuels and fast forward the green transition) package proposed an acceleration in renewable energy capacity from 40% to 45% by 2035.

In the US, hopes were dashed towards the end of 2021 as clean energy legislation failed to progress leading to a sharp sell-off in the segment. There was further negative regulatory news for US solar companies with harsher than expected proposed rules for the new regulatory regime for solar installations in California. The strategy used this period of uncertainty as an attractive entry point and doubled the weight in solar companies. In June, President Biden's signed an executive order ensuring no tariffs on imports of solar modules from Southeast Asia for the next two years. US companies exposed to solar - from equipment providers (Enphase, Shoals) to solar developers such as Nextera Energy rallied on the news, specifically those exposed to the utility solar market, as it removed an overhang over securing adequate supplies of solar modules. However, the most significant development of all was the climate package of US\$370 included in the Inflation Reduction Act in the US. The expansive deal, approved in early August is a landmark deal for the US clean energy sector; among the wide-ranging stimulus packages include manufacturing grants, long term tax grant extensions for renewable technologies, DOE (US Department of Energy) funding programs and EV (electric vehicle) subsidy support.

The renewable energy segment was the top performing segment in the 12-month period due to this positive policy backdrop and the strategic move to increase the weight. US Renewable energy companies such as Enphase, First Solar, Sunnova, Sunrun and Ormat were among the top contributors to performance in the period. The strategy's stock selection in renewables relative to the theme benchmark had a positive impact on relative performance as did the higher weight in utilities which provided a defensive ballast in a risk-off market. The utilities segment overall had a positive contribution to performance. Clean energy and regulated utilities initially outperformed due to higher levels of uncertainty in the overall market as investors sought out more defence. However, as electricity prices hit record highs in Europe due to tight supplies, utilities such as Enel underperformed as concerns over gas supplies, and potential windfall taxes increased uncertainty.

The Energy Efficiency segment was an overall detractor to performance in the period but with a wide dispersion of returns, with the technology names Onsemi and Wolfspeed leading the gainers along with lithium companies due to rapid rise in lithium demand and prices. On the other hand, auto related stocks such as Aptiv were under pressure to lower auto production due to semi chip shortages. In the latter half of the period, growth/technology stocks such as Universal Display and ASML came under pressure with growth out of the favour in the more risk-off environment.

The strategy also benefitted from M&A (Mergers and Acquisitions) in the first half of the period. The biodiesel and renewable diesel producer Renewable Energy Group was acquired by Chevron at a 58% premium to the last 30-day average trading price. Furthermore, the acquisitions of two other holdings Bacanora and Covanta were completed.

Top 3 Contributors:

Onsemi: Onsemi is a global semiconductor company offering solutions in power and sensing chips for the automotive, cloud, 5G (the fifth-generation technology standard for broadband cellular networks), and industrial markets.

Enphase Energy: Enphase is a solar technology company which sells micro-inverters, energy storage, and software solutions.

Wolfspeed: Wolfspeed is a leader in silicon carbide technology which enables faster and more powerful power conversion, such as charging of electric vehicles.

Investment Manager's Report (Continued)**KBI Global Energy Transition Fund* (Continued)****Investment Outlook**

With the world's major economies now committed to achieving net-zero emissions in the long-term, we believe we are in the early stages of a multi-decade energy transition. The need to decarbonise global economies will lead to substantial investment and growth opportunities for our companies who provide solutions for decarbonisation across many end market (end market – where the final transaction takes place in a value chain). The recent approval of the Inflation Reduction Act (IRA) in the US will help to support significant growth in new wind and solar installations, while more nascent end markets such as battery storage will enjoy explosive growth off a low base. We also anticipate accelerating growth of EVs and an increase in domestic manufacturing for both renewable and e-mobility end markets. As seen in recent efforts, such as REPowerEU (a plan to rapidly reduce dependence on Russian fossil fuels and fast forward the green transition), Europe is likely to accelerate its plans to reduce overall dependence on fossil fuels by increasing share of renewables.

The strategy is typically balanced between the strong secular growth opportunities within renewables and clean technology while offering defensive growth via the clean energy utilities. We remain constructive on renewable energy names as with greater visibility around sustained policy support, we anticipate an uptick in earnings estimates over the coming months. The raft of policy measure contained within the Inflation Reduction Act will in our view enable the US to more than triple its annual renewable installations while also reducing its CO₂ (carbon dioxide) emissions by more than 40% by 2030 from 2005 levels. We are particularly constructive on solar which is enjoying robust demand due to increases in utility retail power rates.

Within the Energy Efficiency segment, we are cognisant of the risks of a potential macro slowdown and have reduced exposure to more cyclical/commodity related themes (auto, housing, rare earth metals) while tilting to more higher quality secular growth themes. For example, we added to high quality technology companies benefiting from strong secular growth trends such as Universal Display, ASML and Wolfspeed. We remain constructive on the electro mobility supply chain but have trimmed overall exposure to auto semiconductors and battery materials due to considerable outperformance. The strategy has added exposure to the energy storage and the more nascent hydrogen/fuel cell markets which offers significant medium-term growth from a low base. On a relative basis we believe utilities continue to offer attractive investment opportunities despite current uncertainty. We believe government actions to cap energy costs could lead to the removal of regulatory overhang and would still incentivise investment in renewable energy to order to alleviate energy supply issues.

KBI Global Investors Ltd

31 August 2022

*Fund name changed from KBI Energy Solutions Fund to KBI Global Energy Transition Fund on 31 March 2022.

Investment Manager's Report (Continued)**KBI Water Fund**

The KBI Water Fund decreased by 15.4% for the 12 months to end August 2022, outperforming the MSCI ACWI Index, which decreased by 15.9% (in USD terms). The Fund increased by 46.7% for the 12 months to end August 2021, outperforming the MSCI ACWI Index, which increased by 28.6% (in USD terms). The Fund was in compliance with the strategy and objectives as set out in the prospectus.

The twelve-month period essentially was a year of two halves. 2021 ended strongly after a rebound for the majority of our water specific end market (end market – where the final transaction takes place in a value chain) from prior year COVID19 related lows. That said, supply chain issues, labour shortages and inflation were hot topics for investors as we entered the new year, with increasing rhetoric surrounding Fed (US Federal Reserve) tapering at the macro level and hence sentiment at the start of 2022 was very much risk-off. The backdrop of the Fed indicating interest rate hikes coupled with concerns about economic growth slowing proved unsettling, with significant day-to-day volatility that was further exasperated by the Russia-Ukraine conflict. A reasonably good earnings season played out in the background as the year went on, with strength across almost all end markets in Water and either the reaffirmation or raising of 2022 earnings guidance for the majority of our companies. Volatility picked up in June, as May inflation numbers, though backward looking, shocked the market, and the Fed hiking interest rates, with Europe talking of following suit, had the market consumed by recession fears. This backdrop prompted a rotation out of beta (a measure of the volatility or systematic risk of a security compared to the market as a whole) and into more defensive type names, though in July sentiment in markets flipped back more positive, with the anticipation that peak inflation may be behind us, and the US 10-year treasury yield retreated below 3%. Second quarter earnings season kicked off towards the end of the period, and results were in-line to better than expected for the majority of our companies, as they continue to pass through pricing and the supply chain strains would appear to be easing moderately. The Water strategy gave up some ground in August after a very strong July. Recession fears were front and centre, not helped by a more hawkish tone by the Fed on interest rates, and concern regarding the implications of a potential gas supply shut-off to Europe by Russia as we enter the critical Winter months in Europe.

The Water Utilities segment was the best performing segment in the period, followed by Water Infrastructure, both outperforming the market declines, while the Water Technology segment was the worst performing segment. The top three contributors to the fund in the period were Advanced Drainage Systems, Aecom and Homeserve. The top three detractors in the period were Veolia, Norma and Pentair. Advanced Drainage is a leader in stormwater management solutions and manufactures plastic pipes, septic tanks, storm retention and drainage structures. The stock performed strongly in the period on the back of strong execution and exceeding consensus expectations in terms of topline and margin performance. Aecom is a global engineering and consulting company. The company performed strongly in the period as it executes solidly on its internal transformation strategy and continues to build on an impressive orderbook, giving good visibility on earnings into the future. Homeserve is a leading provider of home emergency and repair services, including for plumbing and water supply and wastewater pipes. The stock was strong during the period as Canadian Infrastructure firm, Brookfield Asset Management, announced a formal bid for the company at £12, supported by the Homeserve board.

Over the period as a whole the high-level positioning in the portfolio saw a decrease in the Water Infrastructure weight, and an increase in the Water Utilities and Technology segment weights. Given the increasing concerns on the economic outlook, with the prospect of a recession appearing very real, we have been taking the opportunity to move towards a more balanced portfolio, while focusing on downside protection. We have been increasing our exposure to high quality companies with exposure to end markets we feel well decelerate less, and where possible, have exposure to offsetting factors e.g., stimulus beneficiaries, strong backlogs, M&A (Mergers and Acquisitions) accretion. We have either reduced or sold out of entirely some of the more cyclical infrastructure names in the portfolio e.g., Valmont, and have added names like Halma in the UK, a high quality technology company whose sales are driven by regulation for the most part, and hence, should be more resilient in a downturn.

Investment Manager's Report (Continued)**KBI Water Fund (Continued)****Investment Outlook**

The KBI Water strategy remains balanced and well diversified both from an end market and geographic perspective. While many of our stocks are down significantly year to date, we are comfortable with our exposures and the potential earnings risk in the portfolio, as the prospect of an economic recession next year has become more consensus. Within Water specifically, there are some supportive dynamics and some positive tailwinds to point out. Non-residential construction in water is accelerating, having lagged the housing recovery, and bouncing off a depressed level. Within the Treatment and Analytics space, we own high quality companies with predominantly defensive end market exposure e.g., healthcare and food and beverage, and with a high proportion of their sales coming from recurring type activities. Our agricultural market exposed names in the irrigation equipment space have a solid medium-term outlook given supply issues, drought concerns and food security initiatives. Within the Utility space, the UK and US Utilities represent defence with inflation protection in the UK models, while European utility Veolia stands to benefit from significant earnings accretion as it integrates acquired peer Suez. Finally, recent economic policy developments at a global level are favourable for infrastructure spending and municipal end markets, especially in the key US market, and our engineers stand to benefit as stimulus begins to flow early next year, providing a multi-year tailwind.

Balancing our optimism for water end markets in 2022, we think the broader market will be leaning into economic deceleration due to fiscal cliffs and monetary tightening, so we are attempting to navigate these dynamics in the portfolio. Where we do have above market equity risks, they are generally in very high quality, market share growing companies exposed to markets that we expect to accelerate or decelerate the least, such as US non-residential construction and government/utility spending (huge funding commitments are just starting to play out). Furthermore, despite the economic deceleration, we expect the supply chain resolutions and pricing catch up to help margins for the manufacturers into 2022. We are focused on earnings risk and downside protection as we opportunistically take advantage of the recent market volatility. We expect the long-term superior earnings growth experienced by the Water strategy to continue, with our expectations for earnings growth in 2022 and 2023 currently ahead of the market. While the strategy is no longer trading at a material discount versus the broader market, it remains attractively valued on an absolute level and relative to its history, with room for its historic premium to be regained.

KBI Global Investors Ltd

31 August 2022

Investment Manager's Report (Continued)**KBI Emerging Markets Equity Fund**

The KBI Emerging Markets Equity Fund registered a decline of 9.3% during the 12 months to end August 2022, underperforming the MSCI Emerging Markets Index which decreased by 8.2% (in EUR terms). The Fund registered a rise of 26.0% during the 12 months to end August 2021 against a return of 22.7% in the MSCI Emerging Markets Index (in EUR terms). The Fund was in compliance with the strategy and objectives as set out in the prospectus.

Over the past year, stock investors have experienced two distinct phases:

- 1) In the period from August 2021 to December 2021, EM (emerging markets) stock markets broadly tread water. The generally positive earnings trend was offset by the rising fear of inflation and consequently tighter monetary policy.
- 2) The new year saw a distinctly new phase. Stocks lost ground as the growing fear of inflation prompted a significant hawkish pivot by the US Federal Reserve (Fed). Market expectations tightened accordingly, and from a position where short rates were expected to remain unchanged to marginally higher through 2022, the Fed started a new tightening cycle in March. This negative backdrop was compounded by the Russian invasion of Ukraine increasing uncertainty about everything from the inflation outlook to the likely path of monetary policy.

Value outperformed growth by 9.7% during the period under review, outperforming in every region and was particularly strong in Latin America. High yield outperformed by 2.1% led by strong performance in Asia and Latin America although it underperformed in EMEA (Europe, the Middle East and Africa). Economically sensitive small cap stocks were the best performers on a relative basis as large cap stocks struggled.

Stock selection detracted from performance in energy, materials, capital goods and in food, beverage and tobacco. In energy and materials, Lukoil, Surgutneftegas, Polymetal and Norilsk Nickel fell sharply following the Russian invasion of Ukraine. The Russian stocks were removed from the benchmark on 9th March on account of non-fulfillment of market accessibility requirements. In capital goods, China Lesso was under pressure as the weak property market led to worse than expected demand for plastic pipes. The company has guided to higher volume and gross margin in the second half of the year thanks to a better mix shift towards municipal (infrastructure related) and away from residential (dragged down by the liquidation of private developers). Within residential, China Lesso has been shifting away from private developers toward state owned developers. Zoomlion was also adversely impacted by weakness in the domestic property market. Management believe that the worst of the property market hit is completed at this stage but that the path to recovery is difficult to predict. In food, beverage and tobacco China Feihe declined sharply after the company issued a profit warning due to a decline in demand caused by fewer new births and China Feihe's channel (refers to what is happening down the distribution chain (e.g. at stores / distributors) and not at the factory) de-stocking initiatives. Margin was squeezed by product mix changes, operating deleverage, increased marketing spend and lower tax refund income. By the end of the first half, the channel inventory level in 80% to 90% of the regions had returned to a healthy level and channel pricing was also improving. The channel de-stocking should enable China Feihe to recover more quickly than peers when market demand stabilizes.

Stock selection contributed positively to performance in media and entertainment, automobiles, and software. In media and entertainment, 37 Interactive Entertainment was up sharply as it maintained strong growth momentum overseas with revenues up 48% year on year driven by 1) the steady growth of key titles such as Puzzle and Survival and 2) the launch of new games including Ant Legion and Chrono Legacy. With a rich pipeline for both domestic and international markets 37 Interactive will likely achieve above sector growth despite the domestic market slowdown. The domestic market has entered a mature stage which makes international gaming operations a key growth driver. In automobiles, Yadea was up strongly after it issued a positive profit alert stating that first half net profit had increased by over 50% year on year. Many cities in China are yet to enforce the new National Standards that will require old, heavy electric bicycles to be replaced – supporting strong demand over the next two to three years. Margins will be supported by industry consolidation, overseas sales and Yadea's own cost reduction efforts including bringing most of its battery production in-house. COVID19 has increased the appetite for personal mobility (avoiding crowded buses and subways) which is helping to create a new source of demand. In software, Infosys outperformed as it raised full year revenue guidance and maintained strong hiring although it flagged weakness in financial services and retail. Infosys has realigned its strategic focus to large scale digital transformation projects over the last couple of years. This has involved significant investment in sales, increased large deal participation and increased flexibility on deal structure. This has been rewarded with a sharp increase in large transformation deals around digital transformation projects, hybrid cloud adoption and automation.

Investment Manager's Report (Continued)**KBI Emerging Markets Equity Fund (Continued)****Investment Outlook**

Emerging market central banks started to tighten monetary policy much earlier than in advanced economies due to less well anchored inflation expectations, and the need to support both weakening currencies and painfully acquired central bank credibility. However, the high inflationary environment should make governments cautious about demand support beyond necessities as that may simply prompt central banks to adopt even tighter stances and or lead to sell offs and further currency depreciation.

The US Federal Reserve is tightening faster than expected, the external growth outlook is softening further, and the dollar has broken to new highs. This is not a supportive environment for emerging market equities, but they do have the advantage of relatively low valuations and low investor positioning, and this may lead to additional inflows over the coming months as investors seek to diversify their equity exposure away from more expensive parts of the world.

KBI Global Investors Ltd

31 August 2022

Investment Manager's Report (Continued)**KBI Developed Equity Fund**

The KBI Developed Equity Fund registered a rise of 2.2% during the 12 months to end August 2022, outperforming the MSCI World Index, which declined by 0.3% (in EUR terms). The Fund registered a rise of 33.9% during the 12 months to end August 2021 against a rise of 31.5% in the MSCI World Index (in EUR terms). The Fund was in compliance with the strategy and objectives as set out in the prospectus.

Over the past year, global stock investors have experienced two distinct phases:

- 1) In the period from August 2021 to December 2021, global stock markets continued to rise strongly. The broadly positive earnings trend and the declining impact of COVID19, more than eclipsed the rising fear of inflation and consequently tighter monetary policy. Unsurprisingly, the latter fears dominated bond markets – especially US treasuries – but investor confidence that low inflation is securely anchored remained strong.
- 2) The new year saw a distinctly new phase. Stocks lost ground as the growing fear of inflation prompted a significant hawkish pivot by the US Federal Reserve (Fed). Market expectations tightened accordingly, and from a position where short rates were expected to remain unchanged to marginally higher through 2022, the Fed started a new tightening cycle in March. This negative backdrop was compounded by the Russian invasion of Ukraine increasing uncertainty about everything from the inflation outlook to the likely path of monetary policy.

Value outperformed growth by 18.1%, outperforming in every region and was particularly strong in North America and Japan. Value was boosted by robust outperformance from the heavily weighted energy sector following the sharp rise in oil prices after Russia invaded Ukraine. High yield outperformed by 8.8% as investors sought refuge in defensive sectors such as consumer staples, utilities and healthcare given the uncertain economic environment. Large cap stocks were the best performers on a relative basis as economically sensitive small cap stocks struggled.

Relative stock selection contributed positively to performance in software, media and entertainment and in pharmaceuticals. In software, ADP (online payroll and HR solutions) has had a very strong year with bookings reaching a fourth quarter record, market hiring persisting at better-than-expected levels and a 92.1% customer retention exiting FY22 (financial year 2022) near the FY21 record. Next generation platforms seem to be pushing ADP towards a higher base level of customer retention particularly in the mid-market. ADP continues to see solid demand for labour and is assuming that normalised pre-pandemic growth in pays per control (a metric that measures the number of people on ADP's clients' payrolls on a same-store basis during a given period) will be achieved in FY23. In media and entertainment, Omnicom continued to deliver strong earnings with Q2 (quarter 2) organic growth coming in at 11.3% ahead of consensus at 6.9%. Management also raised full year organic growth outlook to 6.5% to 7.0% from 6.0% to 6.5% while the margin target was retained at 15.4%. The results served as another data point supporting the view that agencies are operating in a structurally stronger market post pandemic, and this should help to blunt some of the economic softness potentially ahead. The company's flexible cost structure, diversified business lines and strong balance sheet should provide relative stability amid a tough environment for media and advertising related stocks. In pharmaceuticals, Merck was up sharply as strong near-term earnings visibility and cash generation from two outstanding assets was rewarded by investors. Against high and rising expectations for the second quarter, Merck managed a 4% beat driven predominantly by Keytruda and Gardasil and associated company leverage. The valuation remains reasonable and further progress on pipeline development (either internal or external) would support further multiple expansion.

Investment Manager's Report (Continued)**KBI Developed Equity Fund (Continued)**

Stock selection was disappointing in technology hardware, diversified financials, and transportation. In technology hardware, Cisco was under pressure due to supply constraints caused by the lockdowns in China. Some investors are worried about a potential slowdown in enterprise spending and greater sensitivity of the consumer segment to the economic backdrop. Management remains confident despite the uncertain macro, led by record backlog and orders which is leading to robust revenue growth of 4% to 6% in FY23. Cisco is continuing to execute on its long-term transformation towards higher subscription and recurring revenue. We have no exposure to Apple which outperformed as iPhone revenues continue to grow despite the double whammy of tough compares and a weaker consumer spending backdrop which supports the likelihood of sustainable iPhone growth through a combination of market share gains as well as replacement of a large and expanding installed base of devices. However, services growth is decelerating while services margins are at a near-term peak as advertising (high margin) is slowing down. In diversified financials, T Rowe Price struggled as earnings came under pressure due to the difficult market environment for net flows and the impact from the selloff in wider markets. While the overall market had a negative impact, fund flows were disappointing for both mutual funds and sub advised, continuing a trend of weakness despite T Rowe Price's strong long-term track record as the broader shift away from growth investing creates a powerful near-term and possibly longer-term headwind. The company has reacted and has revised down its expense growth from 10% to 14%, to 4% to 7% given market conditions. In transportation, Expeditors International of Washington had to cope with continued lockdowns in China, war in Eastern Europe, a slowing economy combined with an overall drop in demand leading to significant headwinds for air and ocean freight operations. Onshore bottlenecks have further inhibited inland transportation while cyber-attacks earlier in the year continued to drag on results. Management noted that none of the capacity issues in air, on water or at ports have improved or are likely to improve in 2022. The issue for investors is when will capacity return to both the airfreight and ocean freight markets and what will be the impact on price per ton when it happens.

Investment Outlook

The challenging combination of inflation, interest rate, growth and war worries continue to unsettle investors. With recessionary fears growing and policy uncertainty high, sentiment is likely to remain fragile in the period ahead.

But notwithstanding the vagaries of sentiment, the long march back to monetary normality has begun. Importantly, while many stocks remain attractively priced relative to competing investment choices such as government bonds or bank deposits, this journey broadly marks the end of the long era dominated by the expansion of the market multiple. More particularly, the highly valued, growth-oriented names which were such beneficiaries of low rates for so long are likely to continue suffering relative to their less expensive counterparts.

KBI Global Investors Ltd

31 August 2022

Investment Manager's Report (Continued)**KBI Global Resource Solutions Fund**

The KBI Global Resource Solutions Fund gained 12.0% in the year to end August 2022, underperforming the S&P Global Natural Resources Index which rose 27.4%. The Fund outperformed the MSCI AC World Index, which declined by 1.3% in the period (all in EUR terms). The Fund gained 52.3% in the year to end August 2021, outperforming the S&P Global Natural Resources Index which rose 37.3%. The Fund also outperformed the MSCI AC World Index, which appreciated by 30.3% (all in EUR terms). The Fund was in compliance with the strategy and objectives as set out in the prospectus.

Overall, it was a period of significant volatility for equity markets. The equity market has been concerned about the impact of tighter financial conditions leading to potential economic weakness and the seeming persistence of inflation, which has not been helped by geopolitical disruptions. The supply disruptions and pricing lags as a result of the COVID19 pandemic seem to be easing, though not fully addressed by the end of the period. Most asset classes are in negative territory in the first of 2022, with the primary exception being commodity related.

The performance of the Fund represents a lot of market tailwinds in the midst of market headwinds. The Agri (agricultural) business resource has been the strongest performer given strong agri commodity prices and elevated farmer income. The Energy Transition resource has significantly outperformed on robust secular growth exposures and major policy support, particularly the Inflation Reduction Act (IRA) in the US. However, the Energy Efficiency segment has struggled due to economic concerns. Water has been the lagging resource for performance, just slightly below the MSCI AC World Index in the period. The largest detractor for Water has been the Water Technology segment in which the highest quality stocks have lagged given sharp rising interest rates while the more cyclical European stocks have struggled on economic concerns and the EM (emerging markets) exposure has dealt with poor investor sentiment.

The Russian invasion of Ukraine further highlighted the supply chain issues that became apparent during the COVID19 pandemic and spurred much discussion about energy and food security. This led to policy support for more investment in the power infrastructure in Europe, called REPowerEU (A plan to rapidly reduce dependence on Russian fossil fuels and fast forward the green transition). Furthermore, the Inflation Reduction Act in the US will target significant investment in clean electricity production, energy storage, and an accelerated market transition to electric vehicles, which are very supportive of the Energy Transition fundamentals this decade. The elevated fertiliser prices appear to have led to some demand destruction, which has been offset by higher prices at the fertiliser companies. Importantly, the lower application of fertiliser global puts food production volumes at risk, which may perpetuate the elevated agri commodity pricing cycle longer than typical, which is supportive to the Agribusiness investment thesis. Finally, in Water, the infrastructure stimulus that was passed in 2021 in the US will be supportive of markets as we head into the next 12 month period given the normal lag on the funding and project cycles.

Interestingly, nine of the top ten positive contributors to performance in the period are from the Agribusiness resource, driven by commodity price strength, with fertiliser companies Nutrien, CF Industries, and Mosaic making up the top three. The negative performance contributor list is more diverse, with the worst three being a mix of Water (Norma, residential irrigation), Agribusiness (Genus, agri supplier), and Energy (Enel, Italian utility).

Investment Outlook

The Fund invests in the key resources of water, food and energy. These resources are critical to how we live and there are no substitutes. The Fund invests in companies that provide solutions to the problem of growing supply-demand imbalances across these scarce and essential resources, which are driven by a combination of significant demographic changes and significant supply constraints as well as significant policy support to address a future world. We believe this is an attractive source of growth that underpins the investment thesis for the Fund.

KBI Global Investors Ltd

31 August 2022

Investment Manager's Report (Continued)**KBI Global Equity Fund**

The KBI Global Equity Fund registered a rise of 1.2% during the 12 months to end August 2022, outperforming the MSCI World Index, which decreased by 0.3% (in EUR terms). The Fund registered a rise of 32.8% during the 12 months to end August 2021 against a rise of 31.5% in the MSCI World Index (in EUR terms). The Fund was in compliance with the strategy and objectives as set out in the prospectus.

Over the past year, global stock investors have experienced two distinct phases:

- 1) In the period from August 2021 to December 2021, global stock markets continued to rise strongly. The broadly positive earnings trend and the declining impact of COVID19, more than eclipsed the rising fear of inflation and consequently tighter monetary policy. Unsurprisingly, the latter fears dominated bond markets – especially US treasuries – but investor confidence that low inflation is securely anchored remained strong.
- 2) The new year saw a distinctly new phase. Stocks lost ground as the growing fear of inflation prompted a significant hawkish pivot by the US Federal Reserve (Fed). Market expectations tightened accordingly, and from a position where short rates were expected to remain unchanged to marginally higher through 2022, the Fed started a new tightening cycle in March. This negative backdrop was compounded by the Russian invasion of Ukraine increasing uncertainty about everything from the inflation outlook to the likely path of monetary policy.

Value outperformed growth by 18.1%, outperforming in every region and was particularly strong in North America and Japan. Against high and rising expectations for the second quarter, Merck managed a 4% beat driven predominantly by Keytruda and Gardasil and associated company leverage. The valuation remains reasonable and further progress on pipeline development (either internal or external) would support further multiple expansion.

Investment Manager's Report (Continued)**KBI Global Equity Fund (Continued)**

Stock selection was disappointing in technology hardware, diversified financials, and transportation. In technology hardware, Cisco was under pressure due to supply constraints caused by the lockdowns in China. Some investors are worried about a potential slowdown in enterprise spending and greater sensitivity of the consumer segment to the economic backdrop. Management remains confident despite the uncertain macro, led by record backlog and orders which is leading to robust revenue growth of 4% to 6% in FY23. Cisco is continuing to execute on its long-term transformation towards higher subscription and recurring revenue. We have no exposure to Apple which outperformed as iPhone revenues continue to grow despite the double whammy of tough compares and a weaker consumer spending backdrop which supports the likelihood of sustainable iPhone growth through a combination of market share gains as well as replacement of a large and expanding installed base of devices. However, services growth is decelerating while services margins are at a near-term peak as advertising (high margin) is slowing down. In diversified financials, T Rowe Price struggled as earnings came under pressure due to the difficult market environment for net flows and the impact from the selloff in wider markets. While the overall market had a negative impact, fund flows were disappointing for both mutual funds and sub advised, continuing a trend of weakness despite T Rowe Price's strong long-term track record as the broader shift away from growth investing creates a powerful near-term and possibly longer-term headwind. The company responded and has revised down its expense growth from 10% to 14%, to 4% to 7% given market conditions. In transportation, Expeditors International of Washington had to cope with continued lockdowns in China, war in Eastern Europe, a slowing economy combined with an overall drop in demand leading to significant headwinds for air and ocean freight operations. Onshore bottlenecks have further inhibited inland transportation while cyber-attacks earlier in the year continued to drag on results. Management noted that none of the capacity issues in air, on water or at ports have improved or are likely to improve in 2022. The issue for investors is when will capacity return to both the airfreight and ocean freight markets and what will be the impact on price per ton when it happens.

The allocation to emerging markets detracted from performance as emerging market equities underperformed developed equities by 7.9% during the period under review.

Investment Outlook

The challenging combination of inflation, interest rate, growth and war worries continue to unsettle investors. With recessionary fears growing and policy uncertainty high, sentiment is likely to remain fragile in the period ahead.

But notwithstanding the vagaries of sentiment, the long march back to monetary normality has begun. Importantly, while many stocks remain attractively priced relative to competing investment choices such as government bonds or bank deposits, this journey broadly marks the end of the long era dominated by the expansion of the market multiple. More particularly, the highly valued, growth-oriented names which were such beneficiaries of low rates for so long are likely to continue suffering relative to their less expensive counterparts.

KBI Global Investors Ltd

31 August 2022

Investment Manager's Report (Continued)**KBI 50/50 Global/Eurozone Equity Fund (ceased trading on 11 November 2021)**

The KBI 50/50 Global/Eurozone Equity Fund registered a rise of 2.6% from September 2021 to the Fund closure date 10th November 2021 (in EUR terms). Over the same period the MSCI EMU Index increased by 2.8% and the MSCI World ex Eurozone Index rose by 4.9% (in EUR terms). The Fund registered a rise of 34.0% during the 12 months to end August 2021, outperforming the MSCI EMU Index which increased by 32.4% and outperforming the MSCI World ex Eurozone Index which registered an increase of 31.4% (in EUR terms). The Fund was in compliance with the strategy and objectives as set out in the prospectus.

In the period under review, broadly positive earnings and the declining impact of COVID19 eclipsed the rising fear of inflation and consequently tighter monetary policy. Unsurprisingly, the latter fears dominated bond markets – especially US treasuries – but for now investor confidence that low inflation is securely anchored remains strong.

The marked change in US interest rate expectations was the key feature of the period. As the growing fear of inflation prompted a significant hawkish pivot by the US Federal Reserve, market expectations tightened accordingly. From a position where short rates were expected to remain unchanged to marginally higher through 2022, the consensus has shifted to expect as many as five 25bps (basis point) hikes this year. Notwithstanding this change at the short end, longer-dated treasury yields remain relatively subdued. For now, investor confidence that low inflation is securely anchored by a sufficiently hawkish policy pivot remains strong. This is likely to remain the key focus for both nervous investors and policymakers in the period ahead.

Value marginally outperformed growth led by strong relative performance in North America. High yield underperformed in every region while quality also struggled.

Stock selection contributed positively to performance in retailing, software and services and in technology hardware. In retailing, Best Buy advanced after it announced the purchase of Current Health as the retailer remains intent on realising the potential of the healthcare market. Current Health is a remote care management platform that has been growing at a fast pace in recent years and while the terms of the purchase were not disclosed it will be paid out of cash in hand and importantly will not disrupt the \$2.5bn of share repurchases that Best Buy will make in FY22 (fiscal year 2022). Best Buy continues to benefit from the strong momentum in consumer electronics as consumers adjust to the hybrid working model. Inditex rose sharply after it reported a solid set of quarterly results with sales and current trading slightly ahead of expectations and a gross margin beat although higher than expected operating expense led to a 4% miss on EBIT (earnings before interest and taxes). Topline performance combined with strong supply chain and inventory management supporting full price sell-through demonstrate the strength of the business model particularly in the current environment of demand volatility and supply chain disruption across the market. In software & services, ADP was up strongly after the company outlined its mid-term outlook at its Capital Markets Day with 7% to 8% revenue growth and 11% to 13% earnings per share growth. There could be upside to the outlook if the current favourable market for labour, outsourcing services and outsized retention rate persists through the mid-term period. ADP sits in an advantaged position able to manage payroll and compliance expertise for distributed workforces. The company estimates its addressable market at \$150bn growing at a 5% to 6% CAGR (compound annual growth rate) and ADP expects its current 10% market share to continue growing. In technology hardware, NetApp rose after it posted strong results and followed up with a better-than-expected outlook and impressively raised its full year guidance. NetApp also provided more details on its cloud business which included breaking out quarterly sales for both hybrid and public cloud which investors will appreciate as this appears to be a long-term positive for the company. NetApp raised revenue guidance to +8% to 9% from prior guidance of +6% to 7%. Adjusted earnings per share guidance was raised to \$4.85 to \$4.95 versus prior guidance of \$4.45 to \$4.65.

Investment Manager's Report (Continued)**KBI 50/50 Global/Eurozone Equity Fund (ceased trading on 11 November 2021) (Continued)**

Stock selection detracted from performance in automobiles, consumer durable and apparel and in capital goods. In automobiles, we have no position in Tesla which rose sharply during the period under review. Tesla announced strong quarterly results with auto gross margin reaching an all-time high driven by price increases quarter on quarter and higher contribution from the Model Y made in China. Free cash flow was a positive surprise coming in at \$1.7bn and adding credence to the notion that Tesla has reached self-funding status. Hertz announced that it will buy 100,000 Electric Vehicles from Tesla, one of the largest purchases of battery powered cars in history and this pushed the market value over \$3 trillion. Despite the encouraging results and continued execution, the stock is already priced for perfection such that near-term earnings may be insufficient to get bulls incrementally positive on the stock. In consumer durable and apparel, Kering declined as organic growth slowed down from 4.3% in Q2 (quarter 2) to 2.5% in Q3. This included an acceleration in Europe and Japan although it was more than offset by a slowdown in APAC (COVID19 related travel restrictions, store closures or reduced hours, cancelled events and temporary stores) and in the Americas (hurricane impact and 9/11 commemorations). Gucci started its eagerly awaited re-launch process in July, the timing of which was unfortunate due to new COVID19 cases and operational constraints in Asia. Kering also announced a share buyback of up to 2% of its share capital. In capital goods, Thales declined after it was announced that the Australian government had cancelled a large submarine contract with France's Naval Group (Thales has a 35% stake in Naval Group). Thales has also had to deal with the shortage of semiconductors, and this is having a temporary impact on sales, but the company is managing the situation well. Some investors are concerned that it might acquire Atos, although this has been categorically ruled out by the CEO (chief executive officer). The share price reaction to these events looks overdone and offers an attractive entry point. Thales has a very strong balance sheet and is expected to use the proceeds from the sale of the Transport business to further enhance shareholder value.

KBI Global Investors Ltd

31 August 2022

Investment Manager's Report (Continued)**KBI Eurozone Equity Fund**

The KBI Eurozone Equity Fund registered a decline of 14.2% during the 12 months to end August 2022, outperforming the MSCI EMU Index, which declined by 15.4% (in EUR terms). The Fund registered a rise of 36.5% during the 12 months to end August 2021 against a rise of 32.4% in the MSCI EMU Index (in EUR terms). The Fund was in compliance with the strategy and objectives as set out in the prospectus.

Over the past year, stock investors have experienced two distinct phases:

- 1) In the period from August 2021 to December 2021, global stock markets continued to rise strongly. The broadly positive earnings trend and the declining impact of COVID19, more than eclipsed the rising fear of inflation and consequently tighter monetary policy. Unsurprisingly, the latter fears dominated bond markets – especially US treasuries – but investor confidence that low inflation is securely anchored remained strong.
- 2) The new year saw a distinctly new phase. Stocks lost ground as the growing fear of inflation prompted a significant hawkish pivot by the US Federal Reserve (Fed). Market expectations tightened accordingly, and from a position where short rates were expected to remain unchanged to marginally higher through 2022, the Fed started a new tightening cycle in March. This negative backdrop was compounded by the Russian invasion of Ukraine increasing uncertainty about everything from the inflation outlook to the likely path of monetary policy.

Value outperformed growth by 7.8% during the period under review. Value was boosted by robust outperformance from the heavily weighted energy sector following the sharp rise in oil prices after Russia invaded Ukraine. High yield outperformed by 3.1% as investors sought refuge in defensive sectors such as consumer staples and utilities given the uncertain economic environment. Large cap stocks were the best performers on a relative basis as economically sensitive small cap stocks struggled.

Relative stock selection contributed positively to performance in diversified financials, capital goods and insurance. In diversified financials, Deutsche Boerse was up strongly as the stock had underearned across collateral management revenues, interest rate derivative revenues and net interest income over the past decade because of the record low interest rate environment. Estimates are now being increased to reflect the stronger foreign exchange tailwinds and the more hawkish outlook for ECB (European Central Bank) interest rates. Deutsche Boerse is likely to see at least another two to three quarters of upward earnings revisions which should serve as tangible catalysts for further share price appreciation. In capital goods, Thales has benefited from a record order book and the prospect of further European defence spending bodes particularly well for the group in the short, medium, and long term as Thales derives 53% of sales from defence activities. Management has extended the group's mid-single-digit sales growth outlook beyond 2024 while it is well positioned to benefit from the recovery in commercial aerospace and to deliver 100% of net income as free cash flow. In insurance, AXA rallied as it believes that the delta between pricing and loss cost inflation will remain positive in 2022 helped by indexation in commercial lines and non-motor personal lines while it also sees some evidence of a turnaround in motor pricing in response to inflationary trends. XL delivered a strong first half despite a challenging backdrop and is now building a track record of improving earnings. AXA announced a €1bn buyback at half-year results and did not wait until the end of the hurricane season to announce excess capital return. Further buybacks will follow as AXA remains cash rich.

Stock selection was disappointing in materials, consumer durable and apparel and in commercial and professional services. In materials, Covestro declined as it reduced guidance due to weaker demand and an inability to pass through higher feedstock and energy costs. Covestro has seen deterioration in key end market (end market – where the final transaction takes place in a value chain) like automobiles, construction, electronics, furniture, and appliances many of which benefited from demand being pulled forward during the lockdown. The challenge of weaker economic activity and European gas shortages mean that profitability will remain below mid-cycle conditions next year. However, the stock is trading below book value for a business that has generated a 17% return on equity over the last decade. In consumer durable and apparel, Kering underperformed as Gucci continued to struggle, dragged down by China lockdowns. Margins also came under pressure as Kering increased the level of marketing support although management pointed to an end to the necessary reinvestments at Gucci with the second half likely to see an improvement in margins. The dominance of Gucci fashion risk is expected to decline through organic sales growth of other brands and merger and acquisition activity (eyewear now, beauty tomorrow). This will eventually lead to a more well-balanced group and a lower risk premium. In commercial and professional services, Randstad was under pressure as the uncertain macro environment is resulting in some clients slowing new hire activity while new sales cycles are also taking longer. Randstad is continuing to invest in Recruitment Process Outsourcing (RPO) as it looks to diversify away from temporary staffing solutions and to reposition as a strategic recruiting partner with a broader offering. RPO contracts can be as long as three years but more commonly notice periods might be a week or two, however management see it as a way to create a sticky relationship with clients.

Investment Manager's Report (Continued)**KBI Eurozone Equity Fund (Continued)****Investment Outlook**

The challenging combination of inflation, interest rate, growth and war worries continue to unsettle investors. With recessionary fears growing and policy uncertainty high, sentiment is likely to remain fragile in the period ahead.

But notwithstanding the vagaries of sentiment, the long march back to monetary normality has begun. Importantly, while many stocks remain attractively priced relative to competing investment choices such as government bonds or bank deposits, this journey broadly marks the end of the long era dominated by the expansion of the market multiple. More particularly, the highly valued, growth-oriented names which were such beneficiaries of low rates for so long are likely to continue suffering relative to their less expensive counterparts.

KBI Global Investors Ltd

31 August 2022

Investment Manager's Report (Continued)**KBI North America Equity Fund**

The KBI North America Equity Fund registered a decline of 10.2% during the 12 months to end August 2022, outperforming the MSCI North America Index, which decreased by 13.2% (in USD terms). The Fund registered a rise of 32.3% during the 12 months to end August 2021 against a rise of 31.3% in the MSCI North America Index (in USD terms). The Fund was in compliance with the strategy and objectives as set out in the prospectus.

Over the past year, stock investors have experienced two distinct phases:

- 1) In the period from August 2021 to December 2021, global stock markets continued to rise strongly. The broadly positive earnings trend and the declining impact of COVID19, more than eclipsed the rising fear of inflation and consequently tighter monetary policy. Unsurprisingly, the latter fears dominated bond markets – especially US treasuries – but investor confidence that low inflation is securely anchored remained strong.
- 2) The new year saw a distinctly new phase. Stocks lost ground as the growing fear of inflation prompted a significant hawkish pivot by the US Federal Reserve (Fed). Market expectations tightened accordingly, and from a position where short rates were expected to remain unchanged to marginally higher through 2022, the Fed started a new tightening cycle in March. This negative backdrop was compounded by the Russian invasion of Ukraine increasing uncertainty about everything from the inflation outlook to the likely path of monetary policy.

Value outperformed growth by 16.9% during the period under review. Value was boosted by robust outperformance from the heavily weighted energy sector following the sharp rise in oil prices after Russia invaded Ukraine. High yield outperformed by 8.8% as investors sought refuge in defensive sectors such as consumer staples, healthcare and utilities given the uncertain economic environment. Large cap stocks were the best performers on a relative basis as economically sensitive small cap stocks struggled.

Relative stock selection contributed positively to performance in software, media and entertainment and in healthcare. In software, ADP (online payroll and HR solutions) has had a very strong year with bookings reaching a fourth quarter record, market hiring persisting at better-than-expected levels and a 92.1% customer retention exiting FY22 (financial year 2022) near the FY21 record. Next generation platforms seem to be pushing ADP towards a higher base level of customer retention particularly in the mid-market. ADP continues to see solid demand for labour and is assuming that normalised pre-pandemic growth in pays per control (a metric that measures the number of people on ADP's clients' payrolls on a same-store basis during a given period) will be achieved in FY23. In media and entertainment, Omnicom continued to deliver strong earnings with Q2 (quarter 2) organic growth coming in at 11.3% ahead of consensus at 6.9%. Management also raised full year organic growth outlook to 6.5% to 7.0% from 6.0% to 6.5% while the margin target was retained at 15.4%. The results served as another data point supporting the view that agencies are operating in a structurally stronger market post pandemic, and this should help to blunt some of the economic softness potentially ahead. The company's flexible cost structure, diversified business lines and strong balance sheet should provide relative stability amid a tough environment for media and advertising related stocks. In healthcare, Cigna was up strongly as management expects another year of strong client retention and new business wins at Evernorth. Cigna is on track for 95% retention in 2023 with the company having already completed 90% of renewals. Cigna is now focused on driving greater penetration of healthcare services within existing Evernorth employer and health plan clients as well as cross selling services into Cigna Healthcare membership. In healthcare, pricing actions and medical cost management initiatives in 2022 are bearing fruit with the segment on track to be slightly below the low-end of its 9% to 10% long-term target range.

Investment Manager's Report (Continued)**KBI North America Equity Fund (Continued)**

Stock selection was disappointing in technology hardware, diversified financials and automobiles. In technology hardware, Cisco was under pressure due to supply constraints caused by the lockdowns in China. Some investors are worried about a potential slowdown in enterprise spending and greater sensitivity of the consumer segment to the economic backdrop. Management remains confident despite the uncertain macro, led by record backlog and orders which is leading to robust revenue growth of 4% to 6% in FY23. Cisco is continuing to execute on its long-term transformation towards higher subscription and recurring revenue. We have no exposure to Apple which outperformed as iPhone revenues continue to grow despite the double whammy of tough compares and a weaker consumer spending backdrop which supports the likelihood of sustainable iPhone growth through a combination of market share gains as well as replacement of a large and expanding installed base of devices. However, services growth is decelerating while services margins are at a near-term peak as advertising (high margin) is slowing down. In diversified financials, T Rowe Price has struggled as earnings came under pressure due to the difficult market environment for net flows and the impact from the selloff in wider markets. While the overall market had a negative impact, fund flows were disappointing for both mutual funds and sub advised, continuing a trend of weakness despite T Rowe Price's strong long-term track record as the broader shift away from growth investing creates a powerful near-term and possibly longer-term headwind. The company has responded and revised down its expense growth from 10% to 14%, to 4% to 7% given market conditions. In automobiles, Magna International declined as quarterly earnings came in behind expectations with the miss primarily driven by higher input costs which negatively impacted margins across the board. The company maintained 2022 financial guidance, suggesting a meaningful improvement is expected in the second half of the year consistent with the commentary of easing cost pressures. Magna International remains one of the best positioned suppliers over the long run, as its solid proprietary technology and reputation with OEMs as a trusted global partner should allow the company to continue to grow through consolidation and takeover business over time.

Investment Outlook

The challenging combination of inflation, interest rate, growth and war worries continue to unsettle investors. With recessionary fears growing and policy uncertainty high, sentiment is likely to remain fragile in the period ahead.

But notwithstanding the vagaries of sentiment, the long march back to monetary normality has begun. Importantly, while many stocks remain attractively priced relative to competing investment choices such as government bonds or bank deposits, this journey broadly marks the end of the long era dominated by the expansion of the market multiple. More particularly, the highly valued, growth-oriented names which were such beneficiaries of low rates for so long are likely to continue suffering relative to their less expensive counterparts.

KBI Global Investors Ltd

31 August 2022

Investment Manager's Report (Continued)**KBI ACWI Equity Fund**

The KBI ACWI Fund registered a rise of 0.4% during the 12 months to end August 2022, outperforming the MSCI ACWI Index, which declined by 1.3% (in EUR terms). The Fund registered a rise of 32.1% during the 12 months to end August 2021 against a rise of 30.3% in the MSCI ACWI Index (in EUR terms). The Fund was in compliance with the strategy and objectives as set out in the prospectus.

Over the past year, stock investors have experienced two distinct phases:

- 1) In the period from August 2021 to December 2021, global stock markets continued to rise strongly. The broadly positive earnings trend and the declining impact of COVID19, more than eclipsed the rising fear of inflation and consequently tighter monetary policy. Unsurprisingly, the latter fears dominated bond markets, especially US treasuries but investor confidence that low inflation is securely anchored remained strong.
- 2) The new year saw a distinctly new phase. Stocks lost ground as the growing fear of inflation prompted a significant hawkish pivot by the US Federal Reserve (Fed). Market expectations tightened accordingly, and from a position where short rates were expected to remain unchanged to marginally higher through 2022, the Fed started a new tightening cycle in March. This negative backdrop was compounded by the Russian invasion of Ukraine increasing uncertainty about everything from the inflation outlook to the likely path of monetary policy.

Value outperformed growth, outperforming in every region and was particularly strong in North America and Japan. Value was boosted by the robust outperformance from the heavily weighted energy sector following the sharp rise in oil prices after Russia invaded Ukraine. High yield also outperformed as investors sought refuge in defensive sectors such as consumer staples, utilities and healthcare given the uncertain economic environment.

Relative stock selection contributed positively to performance in software, media and entertainment and in pharmaceuticals. In software, ADP (online payroll and HR solutions) has had a very strong year with bookings reaching a fourth quarter record, market hiring persisting at better-than-expected levels and a 92.1% customer retention exiting FY22 (financial year 2022) near the FY21 record. Next generation platforms seem to be pushing ADP towards a higher base level of customer retention particularly in the mid-market. ADP continues to see solid demand for labour and is assuming that normalised pre-pandemic growth in pays per control (a metric that measures the number of people on ADP's clients' payrolls on a same-store basis during a given period) will be achieved in FY23. In media and entertainment, Omnicom continued to deliver strong earnings with Q2 (quarter 2) organic growth coming in at 11.3% ahead of consensus at 6.9%. Management also raised full year organic growth outlook to 6.5% to 7.0% from 6.0% to 6.5% while the margin target was retained at 15.4%. The results served as another data point supporting the view that agencies are operating in a structurally stronger market post pandemic, and this should help to blunt some of the economic softness potentially ahead. The company's flexible cost structure, diversified business lines and strong balance sheet should provide relative stability amid a tough environment for media and advertising related stocks. In pharmaceuticals, Merck was up sharply as strong near-term earnings visibility and cash generation from two outstanding assets was rewarded by investors. Against high and rising expectations for the second quarter, Merck managed a 4% beat driven predominantly by Keytruda and Gardasil and associated company leverage. The valuation remains reasonable and further progress on pipeline development (either internal or external) would support further multiple expansion.

Investment Manager's Report (Continued)**KBI ACWI Equity Fund (Continued)**

Stock selection was disappointing in technology hardware, diversified financials, and transportation. In technology hardware, Cisco was under pressure due to supply constraints caused by the lockdowns in China. Some investors are worried about a potential slowdown in enterprise spending and greater sensitivity of the consumer segment to the economic backdrop. Management remains confident despite the uncertain macro, led by record backlog and orders which is leading to robust revenue growth of 4% to 6% in FY23. Cisco is continuing to execute on its long-term transformation towards higher subscription and recurring revenue. We have no exposure to Apple which outperformed as iPhone revenues continue to grow despite the double whammy of tough compares and a weaker consumer spending backdrop which supports the likelihood of sustainable iPhone growth through a combination of market share gains as well as replacement of a large and expanding installed base of devices. However, services growth is decelerating while services margins are at a near-term peak as advertising (high margin) is slowing down. In diversified financials, T Rowe Price struggled as earnings came under pressure due to the difficult market environment for net flows and the impact from the selloff in wider markets. While the overall market had a negative impact, fund flows were disappointing for both mutual funds and sub advised, continuing a trend of weakness despite T Rowe Price's strong long-term track record as the broader shift away from growth investing creates a powerful near-term and possibly longer-term headwind. The company responded and has revised down its expense growth from 10% to 14%, to 4% to 7% given market conditions. In transportation, Expeditors International of Washington had to cope with continued lockdowns in China, war in Eastern Europe, a slowing economy combined with an overall drop in demand leading to significant headwinds for air and ocean freight operations. Onshore bottlenecks have further inhibited inland transportation while cyber-attacks earlier in the year continued to drag on results. Management noted that none of the capacity issues in air, on water or at ports have improved or are likely to improve in 2022. The issue for investors is when will capacity return to both the airfreight and ocean freight markets and what will be the impact on price per ton when it happens.

In emerging markets, Lukoil, Surgutneftegas, Sberbank, Polymetal and Norilsk Nickel fell sharply following the Russian invasion of Ukraine. The Russian stocks were removed from the benchmark on 9th March on account of non-fulfillment of market accessibility requirements. China Lesso was under pressure as the weak property market led to worse than expected demand for plastic pipes. However, the company has guided to higher volume and gross margin in the second half of the year thanks to a better mix shift towards municipal (infrastructure related) and away from residential (dragged down by the liquidation of private developers).

Investment Outlook

The challenging combination of inflation, interest rate, growth and war worries continue to unsettle investors. With recessionary fears growing and policy uncertainty high, sentiment is likely to remain fragile in the period ahead.

But notwithstanding the vagaries of sentiment, the long march back to monetary normality has begun. Importantly, while many stocks remain attractively priced relative to competing investment choices such as government bonds or bank deposits, this journey broadly marks the end of the long era dominated by the expansion of the market multiple. More particularly, the highly valued, growth-oriented names which were such beneficiaries of low rates for so long are likely to continue suffering relative to their less expensive counterparts.

KBI Global Investors Ltd

31 August 2022

Investment Manager's Report (Continued)**KBI Integris Global Equity Fund**

The KBI Integris Global Equity Fund registered a decline of 0.3% during the 12 months to end August 2022, equaling the MSCI World Index, which decreased by 0.3% (in EUR terms). The Fund registered a rise of 31.5% during the 12 months to end August 2021 equaling the rise of 31.5% in the MSCI World Index (in EUR terms). The Fund was in compliance with the strategy and objectives as set out in the prospectus.

Over the past year, stock investors have experienced two distinct phases:

- 1) In the period from August 2021 to December 2021, global stock markets continued to rise strongly. The broadly positive earnings trend and the declining impact of COVID19, more than eclipsed the rising fear of inflation and consequently tighter monetary policy. Unsurprisingly, the latter fears dominated bond markets – especially US treasuries – but investor confidence that low inflation is securely anchored remained strong.
- 2) The new year saw a distinctly new phase. Stocks lost ground as the growing fear of inflation prompted a significant hawkish pivot by the US Federal Reserve (Fed). Market expectations tightened accordingly, and from a position where short rates were expected to remain unchanged to marginally higher through 2022, the Fed started a new tightening cycle in March. This negative backdrop was compounded by the Russian invasion of Ukraine increasing uncertainty about everything from the inflation outlook to the likely path of monetary policy.

Value outperformed growth by 18.1%, outperforming in every region and was particularly strong in North America and Japan. Value was boosted by the robust outperformance from the heavily weighted energy sector following the sharp rise in oil prices after Russia invaded Ukraine. High yield outperformed by 8.8% as investors sought refuge in defensive sectors such as consumer staples, utilities and healthcare given the uncertain economic environment. Large cap stocks were the best performers on a relative basis as economically sensitive small cap stocks struggled. The Fund has an ESG (environmental, social and governance) score of 7.7 as against 6.8 for the benchmark.

Relative stock selection detracted from performance in energy, diversified financials, and technology hardware. The underweight position in energy detracted from performance as the sector was supported by the significant jump in oil prices following the Russian invasion of Ukraine. In diversified financials, T Rowe Price struggled as earnings came under pressure due to the difficult market environment for net flows and the impact from the selloff in wider markets. While the overall market had a negative impact, fund flows were disappointing for both mutual funds and sub advised, continuing a trend of weakness despite T Rowe Price's strong long-term track record as the broader shift away from growth investing creates a powerful near-term and possibly longer-term headwind. The company has responded and has revised down its expense growth from 10% to 14% to 4% to 7% given market conditions. In technology hardware, Cisco was under pressure due to supply constraints caused by the lockdowns in China. Some investors are worried about a potential slowdown in enterprise spending and greater sensitivity of the consumer segment to the economic backdrop. Management remains confident despite the uncertain macro, led by record backlog and orders which is leading to robust revenue growth of 4% to 6% in FY23. Cisco is continuing to execute on its long-term transformation towards higher subscription and recurring revenue. We have no exposure to Apple which outperformed as iPhone revenues continue to grow despite the double whammy of tough compares and a weaker consumer spending backdrop which supports the likelihood of sustainable iPhone growth through a combination of market share gains as well as replacement of a large and expanding installed base of devices. However, services growth is decelerating while services margins are at a near-term peak as advertising (high margin) is slowing down.

Investment Manager's Report (Continued)**KBI Integris Global Equity Fund (Continued)**

Relative stock selection contributed positively to performance in software, media and entertainment and in healthcare. In software, ADP (online payroll and HR solutions) has had a very strong year with bookings reaching a fourth quarter record, market hiring persisting at better-than-expected levels and a 92.1% customer retention exiting FY22 near the FY21 record. Next generation platforms seem to be pushing ADP towards a higher base level of customer retention particularly in the mid-market. Investment Outlook

The challenging combination of inflation, interest rate, growth and war worries continue to unsettle investors. With recessionary fears growing and policy uncertainty high, sentiment is likely to remain fragile in the period ahead.

But notwithstanding the vagaries of sentiment, the long march back to monetary normality has begun. Importantly, while many stocks remain attractively priced relative to competing investment choices such as government bonds or bank deposits, this journey broadly marks the end of the long era dominated by the expansion of the market multiple. More particularly, the highly valued, growth-oriented names which were such beneficiaries of low rates for so long are likely to continue suffering relative to their less expensive counterparts.

KBI Global Investors Ltd

31 August 2022

Investment Manager's Report (Continued)**KBI Global Sustainable Infrastructure Fund**

The KBI Global Sustainable Infrastructure Fund generated a positive return of 10.7% for the twelve-month period to end August 2022 underperforming the S&P Global Infrastructure Index which posted a positive return of 22.5% (in EUR terms). Across the three underlying sectors, while the three generated strong positive returns, the more defensive utilities lagged while both asset owners and infrastructure capex (capital expenditure) names generated strong double digit returns. The Fund generated a positive return of +36.6% for the 12 month period to end August 2021 outperforming the S&P Global Infrastructure Index which posted a +21.6% return (all in EUR terms). The Fund was in compliance with the strategy and objectives as set out in the prospectus.

The strategy underperformed the index during the period, in part due to not owning traditional energy names which rebounded strongly aided by the strong rise in commodity prices during the period. The North American oil and gas pipeline names were particularly strong during this period. Despite this headwind, the strategy performed well, generating strong absolute returns across the board. Agri (agricultural) stocks performed well aided by the higher inflationary environment with rising farmland valuation and improvements in net farmer income improving sentiment. Elsewhere, the passage of the Inflation Reduction Act (IRA) in the US boosted our clean energy names such as energy storage and solar equipment providers. The IRA act provides long term federal stimulus support for a range of sustainable sectors including solar, wind, geothermal, energy storage, EV (electric vehicle) charging and green hydrogen. While Utilities generated the weakest returns during the period, performance was still positive with both US and European names contributing. Offshore wind names. Recent additions RWE and Orsted both performed strongly during the period. Both companies are leaders within the offshore wind space and following a period of underperformance we materially increased our position to this sector in early 2022. Elsewhere our US clean energy utilities performed well during the period, aided by the improved visibility around solar and wind tax credits. Finally, performance across asset owners was strong, despite the rising rate environment. Investors are reassured that despite the rising interest rate environment, the bulk of our asset owners are in a position to pass through price increases via escalators and strong pricing power.

Top 3 Contributors:

Ormat Technologies: Ormat is a leading global owner and operator of geothermal assets. The company boasts assets across the globe while they also are a leading manufacturer of core equipment used in geothermal plants. During the period, shares performed well amid improved visibility around key projects within its pipeline in North America. Geothermal plants will be in a position to avail of production tax credits under the IRA bill which should improve the IRR (internal rate of return) of geothermal plants under construction or development in the US. Furthermore, Ormat boasts an impressive pipeline of storage assets which also now can avail of a stand alone tax credit under the IRA.

Bunge: Bunge is a leading agri business company involved in a range of end markets across the agri supply chain. The company purchases, transports and processes a range of agriculture commodities. During the period the stock performed well following successive strong earnings reports. The company is benefitting from higher inflation and improvement in net farmer income.

Nextera Energy: Nextera is the largest owner and operator of wind assets across the US. The company boasts an impressive pipeline of assets across the wind, solar and storage space. The passage of the wind, solar and storage credits under the Inflation Reduction Act will in our view support sustained growth in installations across the three technologies. This in turn should sustain above average earnings growth for Nextera given its strong pipeline.

Investment Outlook

The Global Sustainable Infrastructure invests in companies which own and operate long duration assets across Water, Clean Energy, Agri, social and digital infrastructure end market (end market – where the final transaction takes place in a value chain). The strategy looks to invest in long term infrastructure assets which are producing predictable cash flows (often inflation linked). When building the portfolio, we aim to provide exposure to stable regulatory environments.

Investment Manager's Report (Continued)**KBI Global Sustainable Infrastructure Fund (Continued)****Investment Outlook (continued)**

There is an urgent need to upgrade our ageing infrastructure in developed markets; much of the water supply and wastewater systems for instance was designed when cities were less congested and are now in major need of overhaul. Government pledges to achieve net zero emissions by 2050 will result in a transformation of our energy infrastructure assets. Decarbonisation and digitisation of the electric grid will drive huge investment spend in clean energy infrastructure over the coming years. Investment in agri infrastructure will be more focused on emerging markets where increased use of storage equipment and grain handling assets, will be needed to reduce the large wastage that occurs between production and consumption. Following several years of under investment, governments are increasingly recognising the need to invest in ageing infrastructure both as a way of stimulating the global economy and as a way of providing a social benefit to taxpayers. Increased affluency and ageing demographics is a tailwind for social infrastructure end markets with increased spend on healthcare to cater for our ageing population a tailwind for social infrastructure names. Finally, we forecast increased spend on 5G (the fifth-generation technology standard for broadband cellular networks) infrastructure, cloud and edge computing which is leading to strong and resilient earnings growth for tower and data centre operators.

There are three key drivers supporting increased growth in sustainable infrastructure. Significant demographic changes (such as population growth, emerging market middle class growth, ageing population and urbanisation etc) are set to raise demand for infrastructure sharply over coming decades. Secondly, concern over rising emissions has prompted governments to prioritise climate change objectives when enacting fiscal incentives schemes that support infrastructure end markets. Finally, advances in technology across renewable energy end markets has accelerated the trend of decarbonisation. Increased growth in intermittent wind and solar energy requires additional spend in electric grid infrastructure.

We believe the strategy is well positioned for the second half of 2022 despite the elevated commodity price environment. The war in Ukraine has led to heightened commodity price volatility ; higher gas and electricity bills will weigh on consumer spending in H2 (second half year) 2022 while potential curtailment of gas demand in central Europe now is a real possibility. As a direct consequence of the invasion, we expect European countries to accelerate their decarbonisation targets. Already the EU (European Union) has declared its aim to reduce Russian gas dependence by 2/3s by the end of 2022. The UK recently increased its offshore wind target and plans are afoot in Germany to bring forward its net zero commitment to 2035. We expect a key focus over the short term will be for EU countries to accelerate decarbonisation efforts, build up gas reserves and reduce consumption of Russian gas. The time it takes European energy infrastructure projects to pass through planning and permitting process will be key over the short term if central Europe is to be successful in reducing its dependence away from Russian gas. Already we are seeing evidence of this as Germany recently approved the construction of new LNG (liquefied natural gas) terminals. The next stage we anticipate is an accelerated pace of new renewable deployment; the Ukraine invasion will likely act as a catalyst to unleash further renewables growth.

We believe the portfolio is well positioned to benefit from a rising inflationary environment. Agri farmland companies benefit from rising crop prices and improvements in net farmer income which puts upward pressure on land valuation. Meanwhile our regulated utilities are allowed to pass through inflation within its regulatory cycle. Finally, the bulk of our companies enjoy dominant market positions with strong pricing power and high barriers to entry. As a result, inflation can often be passed through. While the market continues to worry about rising rates, interest rates across the globe are still anchored at low levels, enabling governments to utilise the low cost of debt as a means of kickstarting fiscal investment programmes. Infrastructure investment is seen as a useful tool to stimulate economic activity as the “multiplier” for infrastructure investment is higher than other fiscal stimulus.

KBI Global Investors Ltd

31 August 2022

Investment Manager's Report (Continued)**KBI Diversified Growth Fund**

The KBI Diversified Growth Fund fell by 1.1% in the twelve-month period for the 12 months to 31st August 2022. The Fund rose by 25.7% in the twelve-month period for the 12 months to 31st August 2021. The Fund was in compliance with the strategy and objectives as set out in the prospectus.

Over the period, the global equity market fell, as indicated by the decline of 0.4% of the MSCI World Equity index, while European bond markets fell very sharply, with the ICE 5 Year + Euro Government Bond index falling by 20.1%. From a regional perspective, European equities fell by 7.9%, the US market rose 1.9%, and Pacific ex-Japan equities rose by 2.8%. Emerging market equities were particularly weak, falling by 8.2%. The Bloomberg Commodities Index, in contrast, rose by 49.9% while hedge fund returns were also negative (all returns are in euro terms). On the currency front, the euro was very weak against the US Dollar (down about 14.8%) but showed little movement against Sterling.

The weakness of equity markets was largely due to the surge in inflation, taking inflation in the US and Europe to levels not seen for decades. This high inflation was partly due to the Russian invasion of Ukraine which pushed up energy prices and disrupted supply chains, but also in large part due to a shortage of workers in many large economies, following the departure of many workers from the workforce during the pandemic, and the very slow pace of their return to the workforce.

This high rate of inflation was exacerbated by the decision of many central banks to tighten monetary policy by raising key interest rates and by ending or reversing policies that had been in place for many years to boost liquidity.

Investment Outlook

The current combination of difficult geopolitical conditions, very high inflation and rapidly tightening monetary policy means that the short-to-medium term outlook for both equities and government bonds is one of caution. A recession appears to be quite likely within the next few months.

However, the lack of obvious severe structural imbalances or frailties in the global financial system at this time indicates that the expected recession may not be particularly severe, on the assumption that energy supplies are sufficient, in Europe, to avoid widespread interruptions to supply over the winter period.

KBI Global Investors Ltd

31 August 2022

Investment Manager's Report (Continued)**KBI Global Small Cap Equity Fund**

The KBI Global Small Cap Fund registered a decline of 5.3% during the twelve months to end August 2022, underperforming the MSCI World Small Cap Index, which decreased by 5.0% (in EUR terms). The Fund registered a rise of 1.3% since inception on 29th July 2021 to end August 2021, underperforming the MSCI World Small Cap Index, which increased by 2.6% (in EUR terms). The Fund was in compliance with the strategy and objectives as set out in the prospectus.

Over the past year, stock investors have experienced two distinct phases:

- 1) In the period from August 2021 to December 2021, global stock markets continued to rise strongly. The broadly positive earnings trend and the declining impact of COVID19, more than eclipsed the rising fear of inflation and consequently tighter monetary policy. Unsurprisingly, the latter fears dominated bond markets – especially US treasuries – but investor confidence that low inflation is securely anchored remained strong.
- 2) The new year saw a distinctly new phase. Stocks lost ground as the growing fear of inflation prompted a significant hawkish pivot by the US Federal Reserve (Fed). Market expectations tightened accordingly, and from a position where short rates were expected to remain unchanged to marginally higher through 2022, the Fed started a new tightening cycle in March. This negative backdrop was compounded by the Russian invasion of Ukraine increasing uncertainty about everything from the inflation outlook to the likely path of monetary policy.

Value outperformed growth by 17.4%, outperforming in every region and was especially strong in North America.

Relative stock selection detracted from performance in diversified financials, capital goods and retailing. In diversified financials, Janus Henderson was under pressure due to challenging markets, underperformance in certain key funds and ongoing net outflows. In June, Janus Henderson announced that Ali Dibadj had joined the firm as CEO (Chief Executive Officer), he previously worked with Alliance Bernstein. Janus Henderson has several sub-scale funds with excellent investment performance and will focus on scaling these products. The company can accelerate its capital return efforts, potentially pursue merger and acquisition transactions and could eventually follow the playbook of the two recent activist efforts in US asset management. In capital goods, Oshkosh announced a sharp reduction in its operating earnings outlook due to challenging supply conditions and increased inflationary pressures. However, the demand picture remains healthy and the growth outlook for 2023 and beyond remains intact. While Oshkosh is still taking orders, it is limiting the intake to manage pricing given recent input cost volatility. In retailing, Aaron's Company was under pressure as low-income consumers facing higher gas, fuel and housing costs are prioritizing those payments over lease to own. The normalisation has happened more quickly than expected and low-income customers are in a worse spot financially than pre-pandemic. Aaron's business is returning to its strategy of closing and merging stores with the goal to maintain or grow EBITDA (Earnings before interest, taxes, depreciation, and amortisation) on lower revenue. Aaron's is yet to see trade down activity due to credit tightening as was seen in past downturns, but this is still likely to happen as inflation continues to eat away at pandemic savings although it is taking longer than many had expected.

Relative stock selection contributed positively to performance in consumer services, software and materials. In consumer services, Texas Roadhouse was up strongly as quarterly results highlighted continued sales momentum, a modestly improving commodities outlook and the potential for incremental price increases in the final quarter. Significant cost headwinds will likely persist through 2022 and will weigh on second half margins although the long-term 17% to 18% margin algorithm remains intact once costs normalise. Ongoing sales strength and eventual improvement in margins and earnings (as cost pressures ease and/or additional pricing is taken) are the next catalysts for the stock. In software, Progress Software rallied as quarterly revenue came in ahead of expectations. The company offers a solid portfolio of sticky infrastructure software products enabling organizations to develop, deploy and manage mission critical business applications. The current market environment favours Progress Software's legacy infrastructure exposure with solid renewal rates while lower valuations should support future merger and acquisition activity. The company has established an active repeatable merger and acquisition playbook with an emphasis on companies with high recurring revenue mix, good retention metrics and solid operating margins which can be further improved through cost synergies. In materials, Reliance Steel was up strongly after the company recorded record quarterly results. Reliance Steel is benefiting from continued volume gains and exposure to a diverse set of metals and end market (end market – where the final transaction takes place in a value chain). Reliance Steel will be able to maintain higher gross margins as it continues to increase the level of value-added services it provides to customers. The company will use the free cash flow to invest in the business, return cash to shareholders in the form of dividends and buybacks and make accretive acquisitions in a still very fragmented market.

Investment Manager's Report (Continued)**KBI Global Small Cap Equity Fund (Continued)****Investment Outlook**

The challenging combination of inflation, interest rate, growth and war worries continue to unsettle investors. With recessionary fears growing and policy uncertainty high, sentiment is likely to remain fragile in the period ahead.

But notwithstanding the vagaries of sentiment, the long march back to monetary normality has begun. Importantly, while many stocks remain attractively priced relative to competing investment choices such as government bonds or bank deposits, this journey broadly marks the end of the long era dominated by the expansion of the market multiple. More particularly, the highly valued, growth-oriented names which were such beneficiaries of low rates for so long are likely to continue suffering relative to their less expensive counterparts.

KBI Global Investors Ltd

31 August 2022

Responsible Investment Activities Report prepared by the Investment Manager**Background Information:**

KBI Global Investors has a strong commitment to Responsible Investing (RI) issues, and has managed strategies with a Responsible Investment focus for more than three decades. We have been a signatory of the United Nations Principles for Responsible Investment (UNPRI) since 2007. Internally we have robust Responsible Investment controls, policies and processes in place that govern our activities and a high-level Responsible Investing Committee to oversee all aspects of Responsible Investment policy and implementation (membership includes three of the five Executive Directors of the firm).

We implement Responsible Investing principles firstly because we believe that the use of ESG (Environmental, Social and Governance) factors has positive effects on the risk and return of investments, and secondly because the use of RI principles in managing investments can help to achieve ESG goals which are worthy of achievement in their own right and which are also in the best interests of long-term investors.

Integration:

Environmental and Social factors are a fundamental underpinning of our Natural Resource Strategies, grounding the investment premise for our Water, Energy Solutions, Sustainable Infrastructure and blended strategies. Our team applies its expertise to evaluate the investment implications of environmental challenges, evolving world demographics, and opportunities in environmental solutions and then integrates these assessments into the overall fundamental assessment of companies. The Environmental, Social and Governance performance of a company is reviewed as part of our fundamental analysis of a company and is a highly material factor in all investment (buy/sell/position sizing) decisions. We have determined, and published on our website, a list of material ESG factors which we take into account when assessing the ESG performance of a company. We Engage with companies where we identify particular Environmental, Social or Governance risks or issues. We also measure the Impact of our strategies (using alignment with the United Nations Sustainable Development Goals (SDG) as a proxy), using our Revenue Aligned SDG Score ('RASS') methodology.

Responsible Investing is also explicitly integrated into our Global Equity Strategies. We believe that there is a connection between dividend payments and corporate governance standards. Identifying companies with the ability to pay sustainable dividends, we believe, is a unique way to identify better governed companies, particularly in emerging markets. Firm-level corporate governance provisions matter more in countries with weaker legal environments or political instability and better governance is typically associated with higher dividend pay-outs. While equity investors can receive returns through capital gains or dividends, agency theory indicates that shareholders may prefer dividends, particularly when they fear expropriation by insiders; have concerns over the motivations of management; or there is a weak regulatory environment. These portfolios are constructed so that the overall ESG rating of each portfolio is materially higher than the benchmark. The Environmental, Social and Governance performance of a company is reviewed as part of our fundamental analysis of a company and is a material factor in all investment (buy/sell/position sizing) decisions. We engage with companies where we identify particular Environmental, Social or Governance risks or issues. Some portfolios also exclude investment in certain controversial sectors as determined by the Responsible Investing committee, and exclude investments in companies that score the worst overall ESG grade ("CCC") from MSCI ESG Research.

Developments at the firm:

We have been signatories of the UNPRI since 2007, and for the fifth year in a row, the firm achieved the maximum possible A+ rating from PRI (Principles for Responsible Investment), for all three relevant modules assessed by the PRI, i.e. Strategy and Governance, Listed Equity Incorporation and Listed Equity Active Ownership.

We became a signatory of the Net Zero Asset Managers initiative in 2021, committing to net zero portfolio emissions for 100% of our AUM (assets under management) by 2050, and setting interim goals.

Regarding the carbon emissions of our own operations (as distinct from our investments), we have carried out an audit of our emissions and have submitted our data to CDP (Carbon Disclosure Project) for the first time. We have instituted a formal target to reduce Scope 1, Scope 2, and upstream Scope 3 emissions per employee by 30% in 2024, relative to the base year of 2019.

We published several whitepapers: 'Decarbonisation, ESG and the important role of value investors', 'The transition to Net Zero: the greatest commercial opportunity of our time?', 'The future of Energy infrastructure'.

We released the end 2021 update of our Revenue Aligned SDG Scores in April 2022, measuring the Impact of our Natural Resource Strategies in terms of how the portfolios' revenues are aligned with achieving the United Nations Sustainable Development Goals.

Responsible Investment Activities Report prepared by the Investment Manager (Continued)**Developments at the firm: (continued)**

The Responsible Investing Committee considered certain business activities which are particularly harmful to the environment or society this issue and decided that where more than five percent of a company's revenues comes from one or more of these activities, the company is not eligible for inclusion in the Natural Resources universe. These harmful business activities include:

- (i) Fracking for the purposes of extracting oil or gas
- (ii) Private prisons
- (iii) Companies which derive more than 10% of their revenues from the manufacture and retail of civilian firearms and ammunition; from weapons systems, components, and support systems and services; and from the production of nuclear weapons.
- (iv) Companies which derive more than 25% of their revenues from thermal coal-based power generation and/or the mining of thermal coal* and its sale to external parties.

We continued our programme of formal Responsible Investing training for staff using the courses of the PRI Academy. More than half of all staff (and almost all investment and client-facing staff) have completed at least one PRI Academy training course. 10% of staff have completed the CFA Certificate in ESG Investing.

In 2021, as part of our climate action programme to reduce the impact of our firm's carbon footprint, we offset our travel-related carbon emissions via the 'Gold Standard' Vichada Forest Restoration project in Colombia. The project transforms the savannah lands into biodiverse forests, and creates 80 jobs, mitigates 51,000 tons of CO₂e (carbon dioxide equivalent) each year, over 13,200 hectares of planting area, and plants 80m trees, which are pine, eucalyptus and acacia mangium.

Proxy Voting

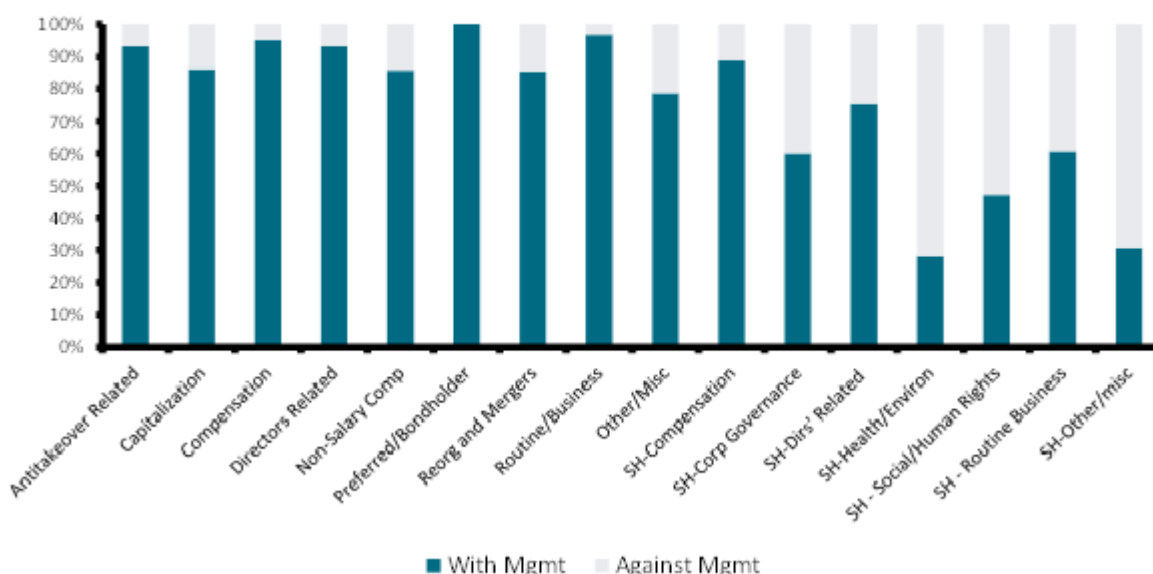

We vote all securities that we are entitled to vote on behalf of our client portfolios. Proxies are voted in a manner which serves the long-term best interests of the portfolio.

In the year to August 2022, as a firm, we voted at 974 meetings worldwide for all our strategies. We voted against management in 8.1% of all proposals, and we voted against management on 32% of shareholder proposals. Shareholder proposals are initiatives put forward by shareholders, usually requesting management to take action on particular issues.

In the year to August 2022, for the KBI Funds ICAV specifically, we voted at 847 meetings worldwide. We voted against management in 8.2% of all proposals, and we voted against management on 35% of shareholder proposals.

Management and Shareholder proposals

KBI Institutional Funds

Responsible Investment Activities Report prepared by the Investment Manager (Continued)**Engagement**

As a specialist boutique asset manager with focused resources, we endeavour to leverage relationships to engage in collective engagement when appropriate. We are members of The United Nations Principles for Responsible Investment (PRI), Climate Action 100+, the Net Zero Asset Managers Initiative, The Taskforce on Climate related Financial Disclosures (TCFD), The Institutional Investors Group on Climate Change (IIGCC), The Carbon Disclosure Project and the CERES (Coalition for Environmentally Responsible Economies) Investors Network on Climate Risk.

Examples of collaborative engagement over the year include:

We continue to participate in Climate Action 100+, an initiative led by some of the biggest investors and investor networks, including the PRI and the four main European, US and Asian climate change organisations (including IIGCC and CERES), to engage with the world's largest corporate greenhouse gas emitters to curb emissions, strengthen climate-related financial disclosures and improve governance on climate change. As part of Climate Action 100+ (CA100+), we are part of the groups of investors leading engagement with Enel (a large Italian manufacturer and distributor of electricity and gas), CNOOC (a large Chinese oil company), LyondellBasell (a multinational chemical company) and Weyerhaeuser (an American forest and paper company).

As part of the Climate Action 100+ lead investor engagement group for LyondellBasell, we initiated a climate discussion AGM (annual general meeting) agenda item at its 2021 AGM, and KBI asked a question on Paris-aligned financial accounts. This was the only formal AGM intervention in Europe this year by Climate Action 100+, and our group was able to get two climate agenda items discussed at the AGM, because we had sent the board a formal request signed by shareholders. In September 2021, LyondellBasell announced its commitment and pathway for net zero emissions by 2050. We met the Chairman of the Board in February 2022 to discuss the oversight of climate-related issues and the transition of its new CEO (Chief Executive Officer) who will start at LyondellBasell in the second half of 2022. With the Chairman, we discussed board oversight of LyondellBasell's climate strategy, board priorities for CEO transition, the board's role in succession planning and board competencies, board oversight of climate related lobbying activity, and assuring accountability for climate strategy through compensation policies. We met with the company in May 2022 to discuss its performance on the CA100+ Net Zero Benchmark score for 2022, the company's Sustainability Report, and Scope 3 emissions. We discussed our expectations around its performance on the Benchmark, continued poor performance and expected actions. We discussed the impact of the shuttering of the company's refining activities and plans for reuse of the site. We also discussed the methodology of Scope 3 emissions for the chemicals sector.

Audit and Audit committee engagement: In 2020, we joined a collaborative group working with auditors and audit committees to ask if they have included climate change risk in financial statements. We encourage auditors to make sure that audited accounts and annual reports contain enough disclosures on climate issues to allow shareholders to make an informed judgement on the risks and opportunities facing the company. In November 2021, we sent a round of (public) letters to the big auditors in the UK. In January 2022, we signed letters to the big auditors in France.

We signed the 2022 Global Investor Statement to Governments on the Climate Crisis. The Statement has been prepared jointly by the founding partners of The Investor Agenda: AIGCC (Asia Investor Group on Climate Change), CDP, CERES, IIGCC, IIGCC, PRI and UNEP FI (United Nations Environment Programme Finance Initiative) and will be launched mid-year 2022.

Our proxy voting activities support the goals of Climate Action 100+, voting against management and supporting several climate related resolutions.

Directors' Report

The Directors present herewith the Annual Report and Audited Financial Statements of KBI Funds ICAV (the "ICAV") for the financial year ended 31 August 2022.

Statement of Directors' Responsibilities

The Directors are responsible for preparing the Directors' Report and Financial Statements, in accordance with applicable law and regulations.

The Irish Collective Asset-management Vehicles Act 2015 (the "ICAV Act") requires the directors to prepare Financial Statements for each financial year. Under that law they have elected to prepare the Financial Statements in accordance with International Financial Reporting Standards ("IFRS") as adopted by the EU and applicable law.

The Financial Statements are required to give a true and fair view of the assets, liabilities and financial position of the ICAV at the end of the financial year and of the profit or loss of the ICAV for the financial year. In preparing these Financial Statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgments and estimates that are reasonable and prudent;
- state whether they have been prepared in accordance with IFRS as adopted by the EU; and
- prepare the Financial Statements on the going concern basis unless it is inappropriate to presume that the ICAV will continue in business.

The Directors are responsible for keeping adequate accounting records which disclose with reasonable accuracy at any time the assets, liabilities, financial position and profit or loss of the ICAV and enable them to ensure that the Financial Statements comply with the ICAV Act, (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011, (S.I. 352 of 2011) (as amended) (the "UCITS Regulations") and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations"). They have general responsibility for taking such steps as are reasonably open to them to safeguard the assets of the ICAV. In this regard they have entrusted the assets of the ICAV to a Depositary for safe-keeping. They have general responsibility for taking such steps as are reasonably open to them to prevent and detect fraud and other irregularities. The directors are also responsible for preparing a Directors' Report that complies with the requirements of the ICAV Act.

Principal Activities

A detailed review of the ICAV's activities for the financial year ended 31 August 2022 is included in the Investment Manager Reports.

Review of Business and Future Developments

A review of business and future developments is included in the Background to the ICAV on pages 2 to 6 and the Investment Manager's Reports on pages 7 to 32.

Results and Dividends

The results and dividends for the financial year are set out in the Statement of Comprehensive Income on pages 45 to 48.

Risk Management Objectives and Policies

The main risks arising from the ICAV's financial instruments are market price, foreign currency, interest rate, liquidity and counterparty credit risks as detailed in Note 2 to these Financial Statements.

Remuneration

The Directors of the ICAV who are also employees of the investment manager are not entitled to any remuneration in respect of their services as Directors of the ICAV.

Fiona Mulcahy earned a fee of EUR 24,000 per annum and Frank Joseph Close retired as a Director on 31 October 2021 and earned a fee of EUR 4,000 during the two month period to this date (31 August 2021: Fiona Mulcahy earned EUR 29,000 and Frank Joseph Close earned EUR 24,000). All other directors are not entitled to a fee. This is detailed in Note 16.

Directors' Report (Continued)**Remuneration (Continued)**

None of the Directors are currently in receipt of variable remuneration in respect of their services as Directors of the ICAV and none of the Directors are currently in receipt of a pension from the ICAV. An annual review has been undertaken and no material changes have been made to the remuneration policy.

The Remuneration Policy of the ICAV can be viewed on the website of the Investment Manager at www.kbiglobalinvestors.com.

Events during the Financial Year

The following share classes launched during the financial year:

	Launch Date
KBI Global Energy Transition Fund Euro Class K Shares	19 May 2022
KBI Water Fund Euro Class G Shares	1 December 2021
KBI Global Sustainable Infrastructure Fund Euro Class C Shares	4 August 2022
KBI Global Sustainable Infrastructure Fund Euro Class F Shares	15 October 2021
KBI Global Sustainable Infrastructure Fund Euro Class G Shares	1 December 2021
KBI Global Sustainable Infrastructure Fund Euro Class J Shares	30 August 2022
KBI Global Sustainable Infrastructure Fund Euro Class K Shares	18 May 2022
KBI Global Sustainable Infrastructure Fund Singapore Dollar Class E (Distributing) Shares	17 November 2021
KBI Global Sustainable Infrastructure Fund US Dollar Class B Shares	14 January 2022
KBI Global Sustainable Infrastructure Fund US Dollar Class E (Distributing) Shares	17 November 2021

The following share classes terminated during the financial year:

	Termination Date
KBI Emerging Markets Equity Fund Euro Class H (Distributing) Shares	9 November 2021
KBI Emerging Markets Equity Fund US Dollar Class B (Distributing) Shares	9 June 2022
KBI 50/50 Global/Eurozone Equity Fund Euro Class C Shares	10 November 2021

KBI 50/50 Global/Eurozone Equity Fund ceased trading on 11 November 2021.

On 1 October 2021, a new prospectus was issued.

The appointment of Amundi Ireland Ltd as Management Company was effective 1 October 2021. Shareholder agreement for the proposed changes to the Instrument of Incorporation of the ICAV as well as to the introduction of a new Management Fee was approved at an EGM convened on 7 September 2021.

Mr Frank Close, Independent Director, retired as director of KBI Funds ICAV effective 31 October 2021.

On 13 December 2021, an addendum to the prospectus was issued in relation to the EU Taxonomy Framework.

Effective 31 March 2022, KBI Energy Solutions Fund changed name to KBI Global Energy Transition Fund.

On 30 June 2022, a second addendum to the prospectus was issued in relation to the minimum subscription and minimum transaction size. This will apply to the following Funds:

- KBI Global Sustainable Infrastructure Fund
- KBI Global Energy Transition Fund
- KBI Water Fund
- KBI Developed Equity Fund
- KBI Eurozone Equity Fund
- KBI Global Resource Solutions Fund
- KBI Emerging Markets Equity Fund

Directors' Report (Continued)**Covid-19**

The COVID-19 virus pandemic continues to impact countries and economies across the globe, although to a lesser extent than in previous reporting periods. The Directors are aware that global financial markets are still monitoring and reacting to the outbreak, especially as various governments continue to apply local restrictions in response to new COVID-19 outbreaks.

The Directors continue to monitor the situation, including the operational risks that are posed to the ICAV and its service providers due to global and local movement restrictions.

Russia

The Russian invasion of Ukraine in late February led to western nations imposing severe economic sanctions on Russia. The Funds are following all appropriate protocols to abide by the conditions of the sanctions and the Funds continue to be managed according to stated investment objectives. The Directors are regularly monitoring the evolving situations and any changes in sanctions to ensure compliance.

There have been no other significant events during the financial year end, which, in the opinion of the Directors of the ICAV, may have had an impact on the Financial Statements for the financial year ended 31 August 2022.

Post Balance Sheet Events

There have been no other events subsequent to the financial year end, which, in the opinion of the Directors of the ICAV, may have had an impact on the Financial Statements for the financial year ended 31 August 2022.

Directors

The Directors who held office as at 31 August 2022 were:

Patrick Cassells

Fiona Mulcahy (Independent)

Derval Murray

Padraig Sheehy

Gerard Solan (Chairman)

The table below shows the Directors' interests in the Funds of the ICAV at 31 August 2022:

	KBI Global Energy Transition Fund*	KBI Water Fund	KBI Emerging Markets Equity Fund	KBI Developed Equity Fund	KBI Global Resource Solutions Fund
Patrick Cassells	-	13	-	988	-
Derval Murray	594	387	1,477	3,562	501
Padraig Sheehy	-	-	209	-	289
Gerard Solan	-	4,915	1,291	-	-

	KBI Global Equity Fund	KBI Eurozone Equity Fund	KBI Diversified Growth Fund	KBI Global Sustainable Infrastructure Fund
Patrick Cassells	25	-	-	1,096

Padraig Sheehy	1,099	123	5	14,132
Gerard Solan	6,625	-	-	19,272

*Fund name changed from KBI Energy Solutions Fund to KBI Global Energy Transition Fund on 31 March 2022.

Directors' Report (Continued)**Directors (Continued)**

The table below shows the Directors' interests in the Funds of the ICAV at 31 August 2021:

	KBI Global Energy Transition Fund*	KBI Water Fund	KBI Emerging Markets Equity Fund	KBI Developed Equity Fund	KBI Global Resource Solutions Fund
Patrick Cassells	-	13	-	988	-
Derval Murray	594	387	1,477	3,562	447
Padraig Sheehy	13,155	5,774	4,337	-	260
Gerard Solan	-	2,752	10,678	-	351

	KBI Global Equity Fund	KBI Eurozone Equity Fund	KBI Diversified Growth Fund	KBI Global Sustainable Infrastructure Fund
Patrick Cassells	25	-	-	858
Derval Murray	115	172	22	2,998
Padraig Sheehy	4,623	26	5	14,132
Gerard Solan	-	13,455	-	15,835

*Fund name changed from KBI Energy Solutions Fund to KBI Global Energy Transition Fund on 31 March 2022.

Each of Mr Padraig Sheehy, Mr Gerard Solan, Ms Derval Murray and Mr Patrick Cassells are employees of KBI Global Investors Limited, the Investment Manager to the ICAV.

Shares Schemes

Mr Solan, Mr Cassells, Ms Murray and Mr Sheehy are all employees of the Investment Manager and have been allocated shares in the funds of the ICAV as part of their variable employee remuneration package. These shares were allotted through the Investment Manager's Irish Revenue approved profit sharing scheme 'APSS'.

Below is a statement of their holdings at 31 August 2022:

	KBI Emerging Markets Equity Fund	KBI Global Resource Solutions Fund	KBI Global Sustainable
Patrick Cassells	-	-	702
Derval Murray	-	165	2,040
Padraig Sheehy	209	14	758
Gerard Solan	1,291	-	2,837

The shares are included within Directors' interests in the Funds of the ICAV as disclosed on page 38.

Transactions Involving Directors

Derval Murray and Gerard Solan are also Directors of the Investment Manager. There are no other contracts or arrangements of any significance in relation to the business of the ICAV in which the Directors or Secretary had any interest as defined in the Act, at any time during the financial year.

Directors' Report (Continued)**Accounting Records**

The Directors believe that they have complied with the requirements of Sections 109 to 115 of the ICAV Act 2015, with regard to keeping adequate accounting records. The Directors have appointed Northern Trust International Fund Administration Services (Ireland) Limited to maintain adequate accounting records. The address at which this business is located is as follows:

Georges Court
54-62 Townsend Street
Dublin 2
Ireland

Transactions with Connected Persons

Any transaction carried out with a UCITS by a manager, depositary, investment adviser and/or associated or group companies of these ("connected persons") must be carried out as if negotiated at arm's length. Transactions must be in the best interests of the shareholders.

The Directors are satisfied that there are arrangements (evidenced by written procedures) in place, to ensure that the obligations set out in Regulation 43(1) of the Central Bank UCITS Regulations are applied to all transactions with connected persons, and are satisfied that transactions with connected persons entered into during the financial period complied with the obligations set out in Regulation 43(1) of the Central Bank UCITS Regulations.

Independent Auditors

In accordance with Section 125 of the ICAV Act 2015, Deloitte Ireland LLP, Chartered Accountants and Statutory Audit firm, have expressed their willingness to continue in office as the ICAV's auditors.

Going Concern

The Directors have a reasonable expectation that the ICAV has adequate resources to continue in operational existence for the foreseeable future. Accordingly, they continue to adopt the going concern basis in preparing the Financial Statements.

Corporate Governance Code

Irish Funds, the association for the funds industry in Ireland, has published a corporate governance code that may be adopted on a voluntary basis by Irish authorised investment funds. The Board of Directors has adopted the Code, and the ICAV was in compliance with all elements of the Code during the financial period.

The text of the Code is available from the Irish Funds website, www.irishfunds.ie.

On Behalf of the Board of Directors

Gerard Solan
Director

Patrick Cassells
Director

7 December 2022

Depository Report to the Shareholders

We, Northern Trust Fiduciary Services (Ireland) Limited (“NTFSIL”), appointed Depositary to KBI Funds ICAV (the “ICAV”) provide this report solely in favour of the shareholders of the ICAV for the period from 1 September 2021 to 31 August 2022 (the “Annual Accounting Period”). This report is provided in accordance with the UCITS Regulations – European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (SI No 352 of 2011), as amended, Directive 2009/65/EU which implemented into Irish Law (the “Regulations”). We do not, in the provision of this report, accept nor assume responsibility for any other purpose or person to whom this report is shown.

In accordance with our Depositary obligation as provided for under the Regulations, we have enquired into the conduct of the ICAV for the Annual Accounting Period and we hereby report thereon to the shareholders of the ICAV as follows;

We are of the opinion that the ICAV has been managed during the Annual Accounting Period, in all material respects:

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the ICAV by the constitutional documents and by the Regulations; and
- (ii) otherwise in accordance with the provisions of the constitutional document and the Regulations.

For and on behalf of

Northern Trust Fiduciary Services (Ireland) Limited
7 December 2022

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF KBI FUNDS ICAV

Report on the audit of the annual accounts

Opinion on the annual accounts of KBI Funds ICAV (the 'ICAV')

In our opinion the annual accounts:

- give a true and fair view of the assets, liabilities and financial position of the ICAV as at 31 August 2022 and of the profit for the financial year then ended; and
- have been properly prepared in accordance with the relevant financial reporting framework and the applicable Regulations.

The annual accounts we have audited comprise:

- the Statement of Comprehensive Income;
- the Statement of Financial Position;
- the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares;
- the Statement of Cash Flows; and
- the related notes 1 to 24, including a summary of significant accounting policies as set out in note 1.

The relevant financial reporting framework that has been applied in their preparation is the Irish Collective Asset-Management Acts 2015-2020 ("the ICAV Act") and International Financial Reporting Standards as adopted by the European Union ("IFRS") ("the relevant financial reporting framework").

The applicable regulations that have been applied in their preparation is the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 and Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations, 2019 ("the applicable Regulations").

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) (ISAs (Ireland)) and applicable law. Our responsibilities under those standards are described below in the "*Auditor's responsibilities for the audit of the annual accounts*" section of our report.

We are independent of the ICAV in accordance with the ethical requirements that are relevant to our audit of the annual accounts in Ireland, including the Ethical Standard issued by the Irish Auditing and Accounting Supervisory Authority, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Conclusions relating to going concern

In auditing the annual accounts, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the annual accounts is appropriate.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the ICAV's ability to continue as a going concern for a period of at least twelve months from when the annual accounts are authorised for issue.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Other information

The other information comprises the information included in the Annual Report and Audited Financial Statements, other than the annual accounts and our auditor's report thereon. The directors are responsible for the other information contained within the Annual Report and Audited Financial Statements. Our opinion on the annual accounts does not cover the other information and, except to the extent otherwise explicitly stated in our report, we do not express any form of assurance conclusion thereon.

/Continued on next page

/Continued from previous page

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF KBI FUNDS ICAV

Our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the annual accounts or our knowledge obtained in the audit or otherwise appears to be materially misstated. If we identify such material inconsistencies or apparent material misstatements, we are required to determine whether there is a material misstatement in the annual accounts or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact.

We have nothing to report in this regard.

Responsibilities of directors

As explained more fully in the Directors' Responsibilities Statement, the directors are responsible for the preparation of annual accounts that give a true and fair view and have been properly prepared in accordance with the ICAV Act, and for such internal control as the directors determine is necessary to enable the preparation of annual accounts that are free from material misstatement, whether due to fraud or error.

In preparing the annual accounts, the directors are responsible for assessing the ICAV's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the ICAV or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the annual accounts

Our objectives are to obtain reasonable assurance about whether the annual accounts as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these annual accounts.

A further description of our responsibilities for the audit of the financial statements is located on IAASA's website at: <https://iaasa.ie/publications/description-of-the-auditors-responsibilities-for-the-audit-of-the-financial-statements>. This description forms part of our auditor's report.

Report on other legal and regulatory requirements

Matters on which we are required to report by the ICAV Act and the applicable Regulations

In our opinion, the information given in the directors' report is consistent with the annual accounts and the directors' report has been prepared in accordance with the ICAV Act.

Matters on which we are required to report by exception

Based on the knowledge and understanding of the ICAV and its environment obtained in the course of the audit, we have not identified material misstatements in the directors' report.

We have nothing to report in respect of the provisions in the ICAV Act which require us to report to you if, in our opinion, the disclosures of directors' remuneration specified by the ICAV Act are not made.

Opinion on other matters prescribed by the applicable Regulations

Based solely on the work undertaken in the course of the audit, we report that:

- We have obtained all the information and explanations which we consider necessary for the purposes of our audit.
- In our opinion the accounting records of the ICAV were sufficient to permit the annual accounts to be readily and properly audited.

/Continued from previous page

INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF KBI FUNDS ICAV

- The annual accounts are in agreement with the accounting records.

Use of our report

This report is made solely to the ICAV's shareholders, as a body, in accordance with Section 120(1) (b) of the ICAV Act. Our audit work has been undertaken so that we might state to the ICAV's shareholders those matters we are required to state to them in an auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the ICAV and the ICAV's shareholders as a body, for our audit work, for this report, or for the opinions we have formed.

Notes to the Financial Statements**For the financial year ended 31 August 2022****1. Significant Accounting Policies****a) Basis of Preparation**

The Financial Statements of KBI Funds ICAV (the “ICAV”) are prepared in accordance with International Financial Reporting Standards as adopted by the European Union (“IFRS”) and interpretations adopted by the International Accounting Standards Board (the “IASB”), and Irish statute comprising the Irish Collective Asset-management Vehicles Act 2015 and pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (the “UCITS Regulations”) and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the “Central Bank UCITS Regulations”).

The preparation of Financial Statements in conformity with IFRS requires the ICAV to make use of estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the Financial Statements and the reported amounts of revenues and expenses during the reporting period. Although these estimates are based on management's best knowledge of the amount, event or actions, actual results ultimately may differ from those estimates.

In preparing the Statement of Cash Flow under IFRS, cash and cash equivalents in hand, highly liquid interest bearing securities with original maturities of three months or less and bank overdrafts.

The Financial Statements have been prepared on a going concern basis except KBI 50/50 Global/Eurozone Equity Fund which terminated on 11 November 2021. The ICAV is able to meet all of its liabilities from its assets. The performance and risks of the ICAV and its sub-funds are reviewed on a regular basis throughout the financial year. Therefore, the Directors believe that the ICAV will continue in operational existence for the foreseeable future and is financially sound. The Directors are satisfied that, at the time of approving the Financial Statements, it is appropriate to adopt the going concern basis in preparing the Financial Statements of the ICAV.

International Financial Reporting Standards

These Financial Statements have been prepared to existing standards and amendments to existing standards effective 1 September 2021.

New standards, amendments and interpretations issued but not yet effective for the year beginning 1 October 2021 and not early adopted

Certain new accounting standards and interpretations have been published that are not mandatory for 30 September 2022 reporting periods and have not been early adopted by the Fund.

The following standards are not expected to have a material impact on the entity in the current or future reporting periods or on foreseeable future transactions:

- IFRS 17 – Insurance contracts
- Amendments to IFRS 10 and IAS 28 – Sale or contribution of assets between an investor and its associate or joint venture
- Amendments to IAS 1 – Classification of liabilities as current or non-current
- Amendments to IAS 1 and IFRS Practice Statement 2 – Disclosure of Accounting Policies
- Amendments to IAS 8 – Definition of Accounting Estimates
- Amendments to IAS 12 – Deferred taxes related to assets and liabilities arising from a single transaction.

There are no other standards, interpretations or amendments to existing standards that are not yet effective that would be expected to have a significant impact on the ICAV.

Comparative Figures

The comparative figures for the Financial Statements are for the year ended 31 August 2021. The formats of comparative disclosures have been amended to be consistent with the current year format of presentation.

Notes to the Financial Statements (Continued)**For the financial year ended 31 August 2022****1. Significant Accounting Policies (Continued)****b) Investments****i. Classification, Recognition and Derecognition**

IFRS 9 sets out the requirements for recognition and measurement of all financial assets and financial liabilities including derivative instruments. The ICAV has classified all financial instruments as financial assets or financial liabilities at fair value through profit or loss ("FVTPL").

The ICAV recognises financial assets and financial liabilities when all significant rights and access to the benefits from the assets and the exposure to the risks inherent in those benefits are transferred to the Fund. The ICAV derecognises financial assets and financial liabilities when all such benefits and risks are transferred from the Fund. On initial recognition, the Fund classifies financial assets as measured at amortised cost or FVTPL.

A financial asset is measured at amortised cost if it meets both of the following conditions and is not designated as at FVTPL:

The category of financial assets and financial liabilities at fair value through profit or loss comprises:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest.

All other financial assets of the ICAV are measured at FVTPL.

Business model assessment

In making an assessment of the objective of the business model in which a financial asset is held, the Fund considers all of the relevant information about how the business is managed, including:

- the documented investment strategy and the execution of this strategy in practice. This includes whether the investment strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realising cash flows through the sale of the assets;
- how the performance of the portfolio is evaluated and reported to the Fund's management;
- the risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- how the investment manager is compensated: e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- the frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

Transfers of financial assets to third parties in transactions that do not qualify for derecognition are not considered sales for this purpose, consistent with the Fund's continuing recognition of the assets.

The Fund has determined that it has two business models:

- Held-to-collect business model: this includes cash and cash equivalents, balances due from brokers and receivables from reverse sale and repurchase agreements. These financial assets are held to collect contractual cash flow.
- Other business model: this includes equity investments, P-notes, derivatives and fund of funds. These financial assets are managed and their performance is evaluated, on a fair value basis, with frequent sales taking place.

Financial assets that are classified under amortised cost include time deposits, due from brokers, deposits and accounts receivable.

Notes to the Financial Statements (Continued)**For the financial year ended 31 August 2022****1. Significant Accounting Policies (Continued)****b) Investments (Continued)****i. Classification, Recognition and Derecognition (Continued)**

Financial liabilities that are attributable to changes in the credit risk of that liability be presented in other comprehensive income, unless the recognition of the effects of changes in the liability's credit risk in other comprehensive income would create or enlarge an accounting mismatch in profit or loss. Changes in fair value attributable to a financial liability's credit risk are not subsequently reclassified to profit or loss, but are instead transferred to retained earnings when the financial liability is derecognised.

Financial liabilities arising from Redeemable Shares issued by a Fund are carried at the redemption amount, representing the Investor's right to a residual interest in that Fund's assets.

Financial liabilities carried at amortised cost include bank overdraft, accounts and other payables.

A regular way purchase of financial assets is recognised using trade date accounting. From this date, any gains and losses, arising from changes in fair value of the financial assets or financial liabilities, are recorded on an average cost basis.

The ICAV classifies all their investments as financial instruments at fair value through profit and loss.

The ICAV recognises financial assets and financial liabilities on the date it becomes a party to the contractual provisions of the instrument, and all significant rights and access to the benefits from the assets, and the exposure to the risks inherent in those benefits, are transferred to the ICAV. The ICAV derecognises financial assets and financial liabilities when all such benefits and risks are transferred from the ICAV.

ii. Measurement

Financial instruments are measured initially at fair value (transaction price) plus, in the case of a financial asset or financial liability not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability. Transaction costs on financial assets and financial liabilities at fair value through profit or loss are expensed immediately, while on other financial instruments they are amortised.

Subsequent to initial recognition, all instruments classified at fair value through profit or loss are measured at fair value with changes in their fair value recognised in the Statement of Comprehensive Income.

Financial assets and financial liabilities, other than those at fair value through profit or loss, are measured at amortised cost using the effective interest rate method, less impairment loss, if any.

Financial liabilities arising from the redeemable participating shares issued by a Fund are carried at the redemption amount, representing the Investors' right to a residual interest in that Fund's assets.

iii. Fair Value Measurement Principles

The fair value of financial instruments is based on their quoted market prices at the Statement of Financial Position date without any deduction for estimated future selling costs. Financial assets and financial liabilities are priced at current mid prices. The ICAV uses the closing mid prices for the Sub-Funds.

If a quoted market price is not available on a recognised stock exchange or from a broker/dealer for non-exchange-traded financial instruments, the fair value of the instrument is estimated using valuation techniques, including use of recent arm's length market transactions, reference to the current fair value of another instrument that is substantially the same, discounted cash flow techniques, option pricing models or any other valuation technique that provides a reliable estimate of prices obtained in actual market transactions.

iv. Impairment

The ICAV recognises loss allowances for Expected Credit Loss ("ECLs") on financial assets measured at amortised cost.

Notes to the Financial Statements (Continued)**For the financial year ended 31 August 2022****1. Significant Accounting Policies (Continued)****b) Investments (Continued)****iv. Impairment (Continued)**

The Fund measures loss allowances at an amount equal to lifetime ECLs, except for the following, which are measured at 12-month ECLs:

- financial assets that are determined to have low credit risk at the reporting date; and
- other financial assets for which credit risk (i.e. the risk of default occurring over the expected life of the asset) has not increased significantly since initial recognition.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Funds consider reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Fund's historical experience and informed credit assessment and including forward-looking information.

The Fund assumes that the credit risk on a financial asset has increased significantly if it is more than 30 days past due.

The Fund considers a financial asset to be in default when:

- the borrower is unlikely to pay its credit obligations to the Fund in full, without recourse by the Fund to action such as realising security (if any is held); or
- the financial asset is more than 90 days past due.

The Fund considers a financial asset and cash held to/from brokers to have low credit risk when the credit rating of the counterparty is equivalent to the globally understood definition of 'investment grade'.

Lifetime ECLs are the ECLs that result from all possible default events over the expected life of a financial instrument.

12-month ECLs are the portion of ECLs that result from default events that are possible within the 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months).

The maximum period considered when estimating ECLs is the maximum contractual period over which the ICAVs are exposed to credit risk.

Measurement of ECLs

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Fund expects to receive).

ECLs are discounted at the effective interest rate of the financial asset.

Presentation of allowance for ECLs in the statement of financial position

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

c) Cash and Cash Equivalents

Cash comprises of current deposits with banks. Cash equivalents are short-term highly liquid investments that are readily convertible to known amounts of cash, are subject to an insignificant risk of changes in value, and are held for the purpose of meeting short-term cash commitments rather than for investment or other purposes.

d) Income and Expenses

Dividends, gross of foreign withholding taxes, where applicable, are included as income when the security is declared to be ex-dividend. Bank interest income is accounted for on an effective interest rate. Interest income on fixed and floating rate securities is accounted for on an effective yield basis. Income received arising on fixed interest securities is recognised as a component of operating income. Further analysis of this operating income is shown in Note 3.

Notes to the Financial Statements (Continued)**For the financial year ended 31 August 2022****1. Significant Accounting Policies (Continued)****e) Fees and Charges**

Investment management fees, administration fees, custody fees, sub-custody fees and other operating expenses are charged to the Statement of Comprehensive Income on an accruals basis.

f) Valuation Point

The valuation point used to value the securities for the purpose of the Financial Statements is that of 31 August 2022, the last business day of the financial year.

g) Investment Funds

Investment funds which are traded in active markets are valued using quoted market prices at the Statement of Financial Position date. Investment Funds which are not publicly traded are normally valued at the underlying audited net asset value as advised by the managers or administrators of these Investment funds, unless the Investment Manager is aware of good reasons why such a valuation would not be the most appropriate indicator of fair value.

h) Redeemable Participating Shares

Redeemable Participating Shares are redeemable at the Shareholder's option and are classified as financial liabilities. Any distributions on these redeemable participating shares are recognised in the Statement of Comprehensive Income as finance costs.

i) Gains and Losses on Investments

Realised gains or losses on disposal of investments and financial derivative instruments during the year and unrealised gains and losses on valuation of investments and financial derivative instruments held at the year end are included in the net gains and losses on financial assets and liabilities at fair value through profit or loss within the Statement of Comprehensive Income.

j) Taxation

Dividend and interest income received by the ICAV may be subject to withholding tax imposed in the country of origin. Investment income is recorded gross of such taxes and the corresponding withholding tax is recognised as a tax expense.

k) Distributions

As outlined in the "Background to the ICAV", KBI Water Fund, KBI Emerging Markets Equity Fund, KBI Developed Equity Fund, KBI Global Equity Fund, KBI Eurozone Equity Fund, KBI North America Equity Fund, KBI ACWI Equity Fund, KBI Integris Global Equity Fund and KBI Global Sustainable Infrastructure Fund may distribute. Where applicable, distributions are classified as Finance Costs in the Statement of Comprehensive Income. See Note 15 for details of distributions.

l) Forward Foreign Currency Contracts

Forward foreign currency transactions are valued based on the closing forward contract rates on the relevant foreign exchange market on a daily basis. Realised gains and losses and movements in unrealised gains and losses are included in the net gains and losses on financial assets and liabilities at fair value through profit or loss within the ICAV's Statement of Comprehensive Income.

m) Foreign Exchange

Foreign exchange gains and losses on financial assets and financial liabilities at fair value through profit and loss are recognised together with other changes in the fair value. Net currency gains/(losses) as set out in Note 4, are net foreign exchange gains and losses on monetary financial assets and financial liabilities other than those classified at fair value through profit or loss.

Assets and liabilities denominated in foreign currencies, other than the functional currency of the ICAV, have been translated at the rate of exchange ruling at 31 August 2022. Transactions in foreign currencies are translated into Euro at the exchange rate ruling at the date of the transaction. Gains and losses on foreign exchange transactions are recognised in the Statement of Comprehensive Income in determining the result for the financial year.

n) Transaction Costs

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of a financial asset or liability. An incremental cost is one that would not have been incurred if the entity had not acquired, issued or disposed of the financial instrument.

o) Use of Estimates and Judgements

The preparation of Financial Statements in conformity with IFRS requires the ICAV to make use of estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the Financial Statements and the reported amounts of revenues and expenses during the reporting period. Although these estimates are based on management's best knowledge of the amount, event or actions, actual results ultimately may differ from those estimates. The areas involving a higher degree of judgement or complexity or areas where estimates and assumptions are significant to the Financial Statements are disclosed in Note 2(b). The estimates and underlying assumptions are reviewed on an on-going basis.

Notes to the Financial Statements (Continued)**For the financial year ended 31 August 2022****2. Financial Risk Management****Strategy in using Financial Instruments**

The investment objectives of the Fund are summarised in the “Background to the Fund” on pages 3 to 6.

Day-to-day risk management is undertaken by the Investment Manager, as detailed in the sections below. The Administrator and Depositary report separately to the Directors on a quarterly basis.

The Funds are subject to a number of investment restrictions imposed by external regulators or self-imposed by the Prospectus, Memorandum and Articles of Association. These restrictions are intended to reduce the risks associated with the Funds financial instruments. The Investment Manager also reports monthly to the Designated Directors on whether the Funds have been operated in accordance with the investment guidelines as defined in the Prospectus as well as any self-imposed limitations.

In pursuing its investment objective, the ICAV is exposed to a variety of financial risks: market risk (including market price risk, interest rate risk and currency risk), credit risk and liquidity risk that could result in a reduction in the ICAV's net assets. The Investment Manager's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Funds' financial performance.

These policies for managing risk have been applied throughout the financial year.

Market Risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: foreign currency risk, interest rate risk and market price risk.

The Investment Manager moderates market risk through a careful selection of securities and other financial instruments within specified limits. The maximum risk resulting from financial instruments is determined by the fair value of the financial instruments. The Funds' overall market positions are monitored on a daily basis by the ICAV's Investment Manager and are reviewed on a regular basis by the Board of Directors.

At 31 August 2022, the ICAV's market risk is affected by three main components:

- a) changes in actual market prices (“market price risk”);
- b) foreign currency movements (“foreign currency risk”); and
- c) interest rate movements (“interest rate risk”).

a. Market Price Risk

Market price risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices.

The ICAV's equities, debt securities and Investment Funds are susceptible to market price risk arising from uncertainties about future prices of the instruments.

The Directors of the ICAV manage the market price risks inherent in the investment portfolio by ensuring full and timely access to relevant information from the Investment Manager. The Board meets regularly and at each meeting reviews investment performance and overall market positions. The Directors monitor the Investment Managers' compliance with the ICAV's objectives. There were no material changes to the ICAV's policies and processes for managing market risk and the methods and assumptions used to measure risk during the year. The Sub-Funds do not currently invest in derivative instruments and are not involved in netting or hedging arrangements with the exception of KBI Water Fund. The Sub-Funds of the ICAV are long-only equity funds. The global exposure is calculated daily by the Funds' administrator in the calculation of the net asset value. For Sub-Funds exposed to derivative instruments or netting or hedging activity, global exposure is calculated based on the Commitment Approach as outlined in the ICAV's Risk Management Procedure (‘RMP’) document.

Details of the nature of the Sub-Funds' investment portfolios at the Statement of Financial Position date are disclosed in the Schedule of Investments on pages 134 to pages 248.

Notes to the Financial Statements (Continued)

For the financial year ended 31 August 2022

2. Financial Risk Management (Continued)

a. Market Risk (Continued)

Market price risk - Sensitivity analysis

As at 31 August 2022, if equity and investment fund prices had increased by 25% at the Statement of Financial Position date, with all other variables held constant, this would have increased net assets attributable to holders of redeemable participating shares of the Funds as follows:

As at 31 August 2022	KBI Global Energy Transition Fund* EUR	KBI Water Fund USD	KBI Emerging Markets Equity Fund EUR	KBI Developed Equity Fund EUR	KBI Global Resource Solutions Fund EUR	KBI Global Equity Fund EUR	KBI Eurozone Equity Fund EUR

*Fund name changed from KBI Energy Solutions Fund to KBI Global Energy Transition Fund on 31 March 2022.

As at 31 August 2022, KBI 50/50 Global/Eurozone Equity Fund held no investments subject to market price risk as the Fund terminated on 11 November 2021.

Conversely, if equity and investment funds prices had decreased by 25%, at the Statement of Financial Position date, with all other variables held constant, this would have decreased net assets attributable to holders of redeemable participating shares of the Funds by an equal amount. Actual trading results could differ from the above sensitivity analysis and these differences may be material.

(NB: the above sensitivity analysis is based on the assumption that only equities and investment funds are exposed to market price risk).

*Fund name changed from KBI Energy Solutions Fund to KBI Global Energy Transition Fund on 31 March 2022.

**Fund launched on 29 July 2021.

Conversely, if equity and Investment fund prices had decreased by 25% at the Statement of Financial Position date, with all other variables held constant, this would have decreased net assets attributable to holders of redeemable participating shares of the Funds by an equal amount. Actual trading results could differ from the above sensitivity analysis and these differences may be material.

(NB: the above sensitivity analysis is based on the assumption that only equities and investment funds are exposed to market price risk).

Notes to the Financial Statements (Continued)

For the financial year ended 31 August 2022

2. Financial Risk Management (Continued)

b. Currency Risk

Currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. Certain of the Funds' assets, liabilities and income are denominated in currencies other than Euro with the exception of the KBI Water Fund and the KBI North America Equity Fund whose assets, liabilities and income are denominated in currencies other than US Dollars. They are, therefore, exposed to currency risk as the value of the securities denominated in other currencies will fluctuate due to changes in exchange rates. Income denominated in foreign currencies is converted to the functional currency of the Sub-Fund on recognition (accruals basis). The Sub-Funds do not currently invest in derivative instruments and are not involved in netting or hedging arrangements with the exception of KBI Water Fund which holds FX forwards for share class hedging and Portfolio hedging purposes.

In accordance with ICAV policy, the Investment Manager monitors the Funds' currency position on a daily basis and the Board of Directors review it on a regular basis.

There were no material changes to the ICAV's policies and processes for managing currency risk and the methods used to measure risk during the financial year.

The tables below document the Funds' exposure to currency risks as at 31 August 2022 and 31 August 2021. All figures are stated in the base currency of the Fund (noted in parentheses).

c. Interest Rate Risk

The Funds' interest bearing financial assets and financial liabilities expose them to risks associated with the effects of fluctuations in the prevailing levels of market interest rates on their financial position and cash flows.

Interest rate risk is managed, in part, by the security selection process of the Investment Manager which includes predictions of future events and their impact on interest rates, diversification and duration. In accordance with ICAV policy, the Investment Manager monitors the Funds' overall interest sensitivity on a daily basis and the Board of Directors review it on a regular basis. There were no material changes to the ICAV's policies and processes for managing interest rate risk and the methods used to measure risk since the prior year end.

As at the Statement of Financial Position date, none of the Sub-Funds had any significant exposure to interest rate risk.

Credit Risk

The ICAV takes on exposure to credit risk, which is the risk that a counterparty or an issuer will be unable to pay amounts in full when due.

The carrying amounts of financial assets best represent the maximum credit risk exposure at the Statement of Financial Position date. In accordance with ICAV policy, the Investment Manager monitors the Funds' overall credit risk on a daily basis and the Board of Directors review it on a regular basis. There were no material changes to the ICAV's policies and processes for managing credit risk and the methods used to measure risk since the prior year end.

*Fund name changed from KBI Energy Solutions Fund to KBI Global Energy Transition Fund on 31 March 2022.

**Fund ceased on 11 November 2021.

***Fund launched on 29 July 2021.

The amounts in the above tables are based on the carrying value of all accounts.

Notes to the Financial Statements (Continued)**For the financial year ended 31 August 2022****2. Financial Risk Management (Continued)****Credit Risk (Continued)**

All transactions in listed securities are settled/paid for upon delivery using approved brokers. The risk of default is considered minimal, as delivery of securities sold is only made once the broker has received payment. Payment is made on a purchase once the securities have been received by the broker. The trade will fail if either party fails to meet its obligation.

The Investment Manager analyses credit concentration based on the counterparty of the financial assets that the Fund holds. Details of counterparties, where applicable, are disclosed in the Schedules of Investments.

Northern Trust Fiduciary Services (Ireland) Limited ("NTFSIL") is the appointed Depositary of the Fund, responsible for the safe-keeping of assets. NTFSIL has appointed The Northern Trust Company ("TNTC") as its global sub-custodian. Both NTFSIL and TNTC are wholly owned subsidiaries of Northern Trust Corporation ("NTC"). As at year-end date 31 August 2022, NTC had a long term credit rating from Standard & Poor's of (A+).

TNTC (as global sub-custodian of NTFSIL) does not appoint external sub-custodians within the U.S., the U.K., Ireland, Canada, Belgium, France, Germany, Netherlands and Saudi Arabia. However, in all other markets, TNTC appoints local external sub-custodians.

NTFSIL, in the discharge of its depositary duties, verifies the Fund's ownership of Other Assets, (as defined under Other Assets, Art 22(5) of UCITS V Directive 2014/91/EU), by assessing whether the Fund holds the ownership based on information or documents provided by the Fund or where available, on external evidence.

TNTC, in the discharge of its delegated depositary duties, holds in custody (i) all financial instruments that may be registered in a financial instruments account opened on the books of TNTC and (ii) all financial instruments that can be physically delivered to TNTC. TNTC ensures all financial instruments (held in a financial instruments account on the books of TNTC) are held in segregated accounts in the name of the Fund, clearly identifiable as belonging to the Fund, and distinct and separately from the proprietary assets of TNTC, NTFSIL and NTC.

In addition TNTC, as banker, holds cash of the Fund on deposit. Such cash is held on the Statement of Financial Position of TNTC. In the event of insolvency of TNTC, in accordance with standard banking practice, the Fund will rank as an unsecured creditor of TNTC in respect of any cash deposits.

Insolvency of NTFSIL and or one of its agents or affiliates may cause the Fund's rights with respect to its assets to be delayed.

The Board manages risk by monitoring the credit quality and financial position of the Depositary and such risk is further managed by the Depositary monitoring the credit quality and financial positions of sub-custodian appointments.

The Sub-Funds invested in debt securities, which have an investment grade as rated by a well-known rating agency. For unrated assets a rating is assigned using an approach that is consistent with rating agencies.

Liquidity Risk

The main liability of the Funds is the redemption of any shares that investors wish to sell. The Funds' constitution provides for the daily creation and cancellation of shares and they are, therefore, exposed to the liquidity risk of meeting shareholder redemptions at any time.

The Funds' financial instruments include holdings in investment funds which may not be easily liquidated at an amount close to fair value in order to meet liquidity requirements, or to respond to specific events such as deterioration in the credit worthiness of any particular issuer. The Funds' listed securities are considered to be readily realisable as they are all listed on major worldwide stock exchanges.

The Funds may, from time to time, invest in derivative contracts traded over the counter, which are not traded in an organised market and may be illiquid. As a result, the Funds may not be able to liquidate quickly its investments in these instruments at an amount close to their fair value to meet its liquidity requirements or to respond to specific events such as deterioration in the creditworthiness of any particular issuer.

In accordance with ICAV policy, the Investment Manager monitors the Fund's liquidity position on a daily basis and the Board of Directors review it on a regular basis.

Notes to the Financial Statements (Continued)

For the financial year ended 31 August 2022

2. Financial Risk Management (Continued)

Liquidity Risk (Continued)

There were no material changes to the ICAV's policies and processes for managing liquidity risk and the methods used to measure risk since the prior year end.

The tables below analyse the Sub-Funds' financial liabilities into relevant maturity groupings based on the remaining period at the Statement of Financial Position date to the contractual maturity date. The amounts in the table are the contractual undiscounted cash flows. Balances due within twelve months equal their carrying balances as the impact of discounting is not significant. All amounts are stated in the base currency of the Funds.

Liquidity Risk (Continued)

Redeemable participating shares are redeemed on demand at the holder's option.

Fair Value of Financial Assets and Liabilities

Most of the Sub-Funds' financial instruments are carried at fair value on the Statement of Financial Position. Usually the fair value of the financial instruments can be reliably determined within a reasonable range of estimates. For certain other financial instruments, including amounts due from/to brokers, accounts payable and accrued expenses, the carrying amounts approximate fair value due to the immediate or short-term nature of these financial instruments. The carrying value of all of the Sub-Funds' financial assets and liabilities at the Statement of Financial Position date approximated their fair values.

Fair Value Disclosure

IFRS 13 "Financial Instruments: Disclosure" requires disclosure relating to the fair value hierarchy in which fair value measurements are categorised for assets and liabilities in the Statement of Financial Position.

The disclosures are based on a three-level fair value hierarchy for the inputs used in valuation techniques to measure fair value.

The fair value of financial assets and financial liabilities traded in an active market (such as traded securities) are based on latest available quoted mid-market prices for Sub-Funds priced at midday and at the closing mid prices for other Sub-Funds.

A financial instrument is regarded as quoted in an active market if the quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis. The fair value of financial assets and financial liabilities that are not traded in an active market is determined by using valuation techniques. The Funds use a variety of methods and make assumptions that are based on market conditions existing at the financial year end date.

The Sub-Funds classify fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

- Quoted prices (unadjusted) in active markets for identical assets or liabilities (Level 1);
- Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices) (Level 2); or
- Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs) (Level 3).

The following is a summary of the fair valuations according to the inputs as at 31 August 2022 in valuing the Sub-Fund's assets and liabilities:

*Fund launched on 29 July 2021.

Investments, whose values are based on quoted market prices in active markets and, therefore, classified within Level 1, include active listed equities. Level 2 includes investment funds. The ICAV does not adjust the quoted price for these instruments.

Financial instruments that trade in markets that are not considered to be active but are valued based on quoted market prices, dealer quotations or alternative pricing sources supported by observable inputs are classified within Level 2.

The Level 2 amounts above represent investment funds and forward exchange contracts.

There were no significant transfers between Level 1 and Level 2 during the financial year.

There were no Level 3 instruments held during the year ended 31 August 2022 and 31 August 2021.

Financial Assets and Liabilities not measured at Fair Value

The financial assets and liabilities not measured at fair value through profit or loss are short-term financial assets and financial liabilities whose carrying amounts approximate fair value. Cash and cash equivalents are categorised as Level 1 and all other financial assets and liabilities not measured at fair value through profit or loss are categorised as Level 2 in the fair value hierarchy.

*Fund launched on 29 July 2021.

Notes to the Financial Statements (Continued)

For the financial year ended 31 August 2022

11. Share Capital

Participating Shares

The authorised share capital of the ICAV is 500,000,000,000 Shares of no par value and 300,000 redeemable non-participating shares of EUR 1 each. Non-participating shares do not entitle the holders thereof to any dividend and on a winding up entitle the holders thereof to receive the amount paid up thereon but do not otherwise entitle them to participate in the assets of the ICAV. The Directors have the power to allot shares up to the authorised share capital of the ICAV. There are 300,000 non-participating shares of EUR1 each currently in issue which are held by the Investment Manager and its nominees. The Investment Manager may redeem these Shares shortly after the ICAV is launched provided that the ICAV maintains a minimum capital amount of EUR 300,000 at all times.

Variation of rights

The rights attached to any class may be varied or abrogated with the consent in writing of the holders of three-fourths in number of the issued shares of that class, or with the sanction of a special resolution passed at a separate general meeting of the holders of the shares of the class, and may be so varied or abrogated either whilst the ICAV is a going concern or during or in contemplation of a winding-up.

Voting rights

On a show of hands at a general meeting or class meeting of the ICAV, every Shareholder holding shares who is present in person or by proxy shall have one vote and on a poll every Shareholder present in person or by proxy shall have one vote for every share of which he/she is the holder.

Distribution on winding up

Subject to the provisions of the ICAV Act, if the ICAV shall be wound up the liquidator shall apply the assets of each Sub-Fund in such manner and order as he thinks fit in satisfaction of creditors' claims relating to that Sub-Fund.

The assets available for distribution amongst the holders shall be applied as follows:

- i) Firstly, in the payment to the Shareholders of each Class or Fund of a sum in the Functional Currency (or in any other currency selected and at such rate of exchange as determined by the liquidator) as nearly as possible equal to the Net Asset Value of the Shares of the relevant Class or Fund held by such Shareholders respectively as at the date of commencement of winding up;
- ii) Secondly, in the payment to the holders of non-participating shares of sums up to the nominal amount paid up thereon out of the assets of the ICAV not comprised within any Fund provided that if there are insufficient assets to enable such payment in full to be made, no recourse shall be had to the assets comprised within any of the Funds;
- iii) Thirdly, in the payment to the Shareholders of each Class or Fund of any balance then remaining in the relevant Fund, in proportion to the number of Shares held in the relevant Class or Fund; and
- iv) Fourthly, any balance then remaining and not attributable to any Fund or Class shall be apportioned between the Funds and Classes pro-rata to the Net Asset Value of each Fund or attributable to each Class immediately prior to any distribution to Shareholders and the amounts so apportioned shall be paid to Shareholders pro-rata to the number of Shares in that Fund or Class held by them.

13. Fees

Investment Management Fee

Under the provisions of the discretionary investment management agreement, the ICAV will pay the Investment Manager a fee of up to 2.50% per annum of the Net Asset Value (plus VAT, if any) of the KBI North America Equity Fund, the KBI ACWI Equity Fund, the KBI Global Energy Transition Fund, the KBI Water Fund, the KBI Global Resource Solutions Fund, the KBI Emerging Markets Equity Fund, the KBI Global Equity Fund, the KBI Developed Equity Fund, the KBI Eurozone Equity Fund, the KBI 50/50 Global/Eurozone Equity Fund, the KBI Integris Global Equity Fund, the KBI Global Sustainable Infrastructure Fund, the KBI Diversified Growth Fund and the KBI Global Small Equity Cap Fund. Within these maximum permitted limits, the Investment Manager's fee may differ between Sub-Funds and between classes of the same Sub-Fund. This fee shall be accrued weekly on each dealing day and payable monthly in arrears.

The ICAV will pay the Investment Manager a fee of up to 1.5% per annum of the Net Asset Value of the KBI Global Energy Transition Fund (plus VAT, if any) in respect of Sterling Class A, Euro Class A, Euro Class B, Euro Class C, Euro Class D and Euro Class F Shares and an annual fee of up to 2.5% per annum of the Net Asset Value of the this Fund (plus VAT, if any) in respect of US Dollar Class A, US Dollar Class B, US Dollar Class C, US Dollar Class D, Sterling Class B, Sterling Class C, Sterling Class D, Euro Class E, Euro Class G and Euro Class H.

Investment Management fees of EUR 21,359,958 (31 August 2021: EUR 10,881,613) were charged during the financial year, EUR 6,933,705 of which were outstanding at the financial year end (31 August 2021: EUR 4,732,055).

Administration Fee

Under the provisions of the administration agreement, the ICAV shall pay to the Administrator out of the assets of each Sub-Fund attributable to each Class an annual fee which shall be accrued weekly on each Dealing Day and payable monthly in arrears, at a rate which will not exceed 0.10% of the Net Asset Value of KBI Water Fund, KBI Global Energy Transition Fund, KBI Global Resource Solutions Fund, KBI Emerging Markets Equity Fund, KBI Global Equity Fund, KBI Developed Equity Fund, KBI 50/50 Global/Eurozone Equity Fund, KBI Eurozone Equity Fund, KBI North America Equity Fund, KBI ACWI Equity Fund, KBI Integris Global Equity Fund, KBI Global Sustainable Infrastructure Fund, KBI Diversified Growth Fund and KBI Global Small Equity Cap Fund (plus VAT, if any).

The Administrator shall also be entitled to be repaid out of the assets of the Sub-Fund all of its reasonable out-of-pocket expenses incurred on behalf of the Sub-Fund, which shall include legal fees, couriers' fees and telecommunication costs and expenses.

Administration fees of EUR 1,169,134 (31 August 2021: EUR 709,736) were charged during the financial year, EUR 644,112 of which were outstanding at the financial year end (31 August 2021: EUR 363,418).

Depository Fee

Under the provisions of the depository agreement, the ICAV shall pay to the Depository out of the assets of each Sub-Fund attributable to each Class an annual fee which shall be accrued weekly on each Dealing Day and payable monthly in arrears, at a rate which will not exceed 0.10% of the Net Asset Value of KBI Water Fund, KBI Global Energy Transition Fund, KBI Global Equity Fund, KBI 50/50 Global/Eurozone Equity Fund, KBI Developed Equity Fund, KBI Eurozone Equity Fund, KBI Global Resource Solutions Fund, KBI North America Equity Fund, KBI ACWI Equity Fund, KBI Integris Global Equity Fund, KBI Global Sustainable Infrastructure Fund, KBI Emerging Markets Equity Fund, KBI Diversified Growth Fund and KBI Global Small Cap Equity Fund (plus VAT, if any).

The Depository shall also be entitled to be repaid out of the assets of each Sub-Fund all of its reasonable out-of-pocket expenses incurred on behalf of the Sub-Fund which shall include couriers' fees and telecommunication costs and other expenses incurred on behalf of the Sub-Fund by the Depository in the proper performance of its duties (plus VAT, if any).

Depository fees of EUR 2,551,705 (31 August 2021: EUR 1,557,596) were charged during the financial year, EUR 1,386,676 of which were outstanding at the financial year end (31 August 2021: EUR 771,479).

Notes to the Financial Statements (Continued)

For the financial year ended 31 August 2022

14. Efficient Portfolio Management and Use of Financial Derivative Instruments

The Investment Manager may utilise derivatives and other techniques and instruments (including, but not limited to, options, swaps, futures and forwards) whether the intention of providing protection against risks of gaining exposure to certain markets, sectors or securities, or otherwise of increasing the return on the Assets of each Fund. Such derivatives and other techniques and instruments will only be used for efficient portfolio management purposes in accordance with the conditions and limits laid down by the Central Bank of Ireland. The Investment Manager may also, when facilities become available in the relevant markets, lend the Portfolio securities and/or purchase securities subject to repurchase agreements. No securities were purchased subject to repurchase agreements during the financial year.

Open derivative contracts held at the Statement of Financial Position date are disclosed in the Schedule of Investments beginning on page 134.

	<u>71,400</u>	<u>68,000</u>

*Exclusive of VAT.

Notes to the Financial Statements (Continued)

For the financial year ended 31 August 2022

18. Taxation

The ICAV is an investment undertaking as defined in Section 739B of the Taxes Consolidation Act 1997, as amended ("TCA").

The ICAV will not be liable for tax in respect of its income and gains, other than on the occurrence of a chargeable event. A chargeable event includes any distribution or any redemption or transfer of Shares.

A chargeable event does not include:

- i) Any transactions in relation to Redeemable Participating Shares held in a recognised clearing system as designated by order of the Revenue Commissioners of Ireland; or
- ii) An exchange of Redeemable Participating Shares representing one Fund for another Fund of the ICAV; or
- iii) An exchange of Redeemable Participating Shares arising on a qualifying amalgamation or reconstruction of the ICAV with another Fund.

A chargeable event will not occur in respect of Redeemable Participating Shareholders who are neither resident nor ordinarily resident in Ireland and who have provided the ICAV with a relevant declaration to that effect. There were no chargeable events during the financial year.

In the absence of an appropriate declaration, the ICAV will be liable for Irish tax on the occurrence of a chargeable event and the ICAV reserves its right to withhold such taxes from payments to relevant shareholders.

Capital gains, dividends and interest received may be subject to withholding taxes imposed by the country of origin and such taxes may not be recoverable by the ICAV or its Shareholders. A chargeable event includes any distribution payment to shareholders or any encashment, redemption or transfer of shares or an ending of a Relevant Period.

19. Soft Commission Arrangements

There are no soft commission arrangements for the year ended 31 August 2022 (31 August 2021: Nil).

20. Comparative Figures

The comparative information is supplied for the Statement of Financial Position as at 31 August 2021. The comparative information supplied for the Statement of Comprehensive Income, the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares and the Statement of Cash Flows is for the financial year from 1 September 2020 to 31 August 2021.

On 1 October 2021, a new prospectus was issued.

Notes to the Financial Statements (Continued)**For the financial year ended 31 August 2022****21. Events During the Financial Year (Continued)**

The appointment of Amundi Ireland Ltd as Management Company was effective 1 October 2021. Shareholder agreement for the proposed changes to the Instrument of Incorporation of the ICAV as well as to the introduction of a new Management Fee was approved at an EGM convened on 7 September 2021.

Mr Frank Close, Independent Director, retired as director of KBI Funds ICAV effective 31 October 2021.

On 13 December 2021, an addendum to the prospectus was issued in relation to the EU Taxonomy Framework.

Effective 31 March 2022, KBI Energy Solutions Fund changed name to KBI Global Energy Transition Fund.

On 30 June 2022, a second addendum to the prospectus was issued in relation to the minimum subscription and minimum transaction size. This applies to the following Funds:

- KBI Global Sustainable Infrastructure Fund
- KBI Global Energy Transition Fund
- KBI Water Fund
- KBI Developed Equity Fund
- KBI Eurozone Equity Fund
- KBI Global Resource Solutions Fund
- KBI Emerging Markets Equity Fund

COVID-19

The COVID-19 virus pandemic continues to impact countries and economies across the globe, although to a lesser extent than in previous reporting periods. The Directors are aware that global financial markets are still monitoring and reacting to the outbreak, especially as various governments continue to apply local restrictions in response to new COVID-19 outbreaks.

The Directors continue to monitor the situation, including the operational risks that are posed to the ICAV and its service providers due to global and local movement restrictions.

Russia

The Russian invasion of Ukraine in late February led to western nations imposing severe economic sanctions on Russia. The Funds are following all appropriate protocols to abide by the conditions of the sanctions and the Funds continue to be managed according to stated investment objectives. The Directors are regularly monitoring the evolving situations and any changes in sanctions to ensure compliance.

There have been no other events during the financial year end, which, in the opinion of the Directors of the ICAV, may have had an impact on the Financial Statements for the financial year ended 31 August 2022.

Notes to the Financial Statements (Continued)

For the financial year ended 31 August 2022

22. Reconciliation of Net Asset Value in accordance with IFRS

At 31 August 2022, an adjustment was required to the Financial Statements. This was required in order to bring the Financial Statements in line with IFRS. This adjustment was for the purposes of the year-end Financial Statements only and did not affect the monthly reported dealing net asset value. The Net Asset Value of the Funds has been adjusted by the formation expenses written off and dealing after the NAV's cut off point, in accordance with IFRS. Note 12 shows the dealing NAV's per Share by Share Class prior to the adjustment described below. The following is the reconciliation detail as at 31 August 2022 and 31 August 2021:

*Fund name changed from KBI Energy Solutions Fund to KBI Global Energy Transition Fund on 31 March 2022.

**Due to a material drop in share class value and budget adjustments towards the end of the financial year, the actual TER as measured over 12 months was negative. The figure shown reflects the running TER rate as at 31st August 2022.

NB: the total expense ratios above have been calculated in accordance with UCITS Regulations.

KBI Global Energy Transition Fund*

KBI Global Resource Solutions Fund	Ireland	0% per annum of Net Asset Value attributable to Euro Class
KBI Global Small Capital Equity Fund	Ireland	0% per annum of Net Asset Value attributable to Euro Class

Appendix 1 - Securities Financing Transactions and Re-use (Unaudited)

The following information is presented with regard to Regulation (EU) 2015/2365 on transparency of securities financing and of re-use ("SFTR").

In May 2021, the Directors of KBI Funds ICAV agreed to terminate the securities lending program with Northern Trust on a permanent basis. Securities lending activity had been suspended since April 2020.

Appendix 2 - European Union's Sustainable Finance Disclosure Regulations ("SFDR") (Unaudited)

On 18 December 2019, the European Council and European Parliament announced that they had reached a political agreement on the Disclosure Regulation, thereby seeking to establish a pan-European framework to facilitate Sustainable Investment. The Disclosure Regulation provides for a harmonised approach in respect of sustainability-related disclosures to investors within the European Economic Area's financial services sector.

The Taxonomy Regulation introduces separate and additional disclosure obligations for financial market participants. Its purpose is to establish a framework to facilitate sustainable investment. It sets out harmonised criteria for determining whether an economic activity qualifies as environmentally sustainable and outlines a range of disclosure obligations to enhance transparency and to provide for objective comparison of financial products regarding the proportion of their investments that contribute to environmentally sustainable economic activities.

For the purposes of the Disclosure Regulation, the Management Company meets the criteria of a "financial market participant", whilst each Sub-Fund qualifies as a "financial product".

For further details on how a Sub-Fund complies with the requirements of the Disclosure Regulation and the Taxonomy Regulation, please refer to the supplement for that Sub-Fund. Please also refer to the section on 'Sustainable Investment' in the Prospectus of the Fund and the Responsible Investment Policy of the investment manager available on www.kbiglobalinvestors.com

Disclosure Statements**Sustainable Financing Disclosure Reporting ("SFDR")**

Please refer to the Risk Factor section of the KBI Funds ICAV Prospectus available at www.kbiglobalinvestors.com for the further details of the Sustainable Financing Disclosure Reporting ("SFDR") disclosures. Detailed disclosures per Sub-Fund can also be found in each Sub-Fund supplement.

1. Global Equity Strategy Funds

- KBI Developed Equity Fund
- KBI Emerging Markets Equity Fund
- KBI ACWI Equity Fund
- KBI North America Equity Fund
- KBI Eurozone Equity Fund
- KBI Global/Eurozone 50/50 Equity Fund (closed 10/11/2021)
- KBI Global Equity Fund (closed 21/11/2022)

The environmental and social characteristics promoted by the funds above are reductions in harm to the environment and climate arising from the emissions of greenhouse gases and better corporate practices that contribute to a more just society, by, for example, enhancing human capital or providing improved social opportunities to services such as finance, health care, and communications.

In identifying investments which allow the strategies to promote environmental and social characteristics, the Investment Manager adopts the following strategies:

- The Investment Manager integrates an analysis of companies' ESG performance into its investment analysis and investment decisions. Companies are rated on an AAA-CCC scale relative to the standards and performance of their industry peers, which is then translated into an ESG score. The Investment Manager gets a single ESG score for each stock from MSCI ESG Research (the "Data Provider"), each stock receiving a score of between 0 and 10, with the highest scoring company receiving a 10.
- The portfolio construction process employed by the Investment Manager excludes holdings deemed inconsistent with its Responsible Investment Guidelines or that are involved with certain controversial sectors, as determined by the Investment Manager's Responsible Investment Committee. The funds cannot invest in companies which are involved in certain activities including tobacco manufacturing, coal extraction and coal-fired electricity generation, in excess of certain thresholds. Full details of the exclusions and thresholds are available in the Responsible Investing Policy of the Investment Manager, which can be viewed on its website at www.kbiglobalinvestors.com.
- The Investment Manager monitors the carbon intensity of companies in which the strategies invest and aims to construct a portfolio whose carbon intensity is lower than the Index. Carbon intensity is a measure of greenhouse gas emissions, in tonnes, relative to the revenue of the company or portfolio. The Investment Manager obtains carbon intensity data from the Data Provider. However, the investment strategy of the funds are not continuously aligned with the Index and the Index is not used for the purpose of determining the attainment of the environmental and social characteristics promoted by the funds. The Index is a broad market index and is not aligned with the environmental and social characteristics promoted by the funds.

Appendix 2 - European Union's Sustainable Finance Disclosure Regulations ("SFDR") (Unaudited) (Continued)**1. Global Equity Strategy Funds (Continued)**

The Investment Manager monitors compliance with the environmental and social characteristics outlined above on a regular basis through the use of research and ratings from external data providers.

The Investment Manager monitors a range of sustainability indicators to measure the environmental and social characteristics outlined above, including:

- The weighted average ESG rating of the portfolio, as determined by the use of ESG ratings of companies, supplied by an external data provider of ESG research and ratings.
- The carbon intensity of the portfolio (see above for more information) measured by an external provider of carbon footprint measurement services.

Please see further below the indicators for each of the funds and the relevant reference benchmark at the end of the period under review.

The Investment Manager also assesses the governance practices and governance performance of all companies in which it invests. This assessment is based on (i) the Investment Manager's own research and knowledge of the company based on its direct interactions with companies and its analysis of the financial statements and related materials of companies; and/or (ii) information including specialised governance information and ratings from at least one external data provider, in order to satisfy itself that the relevant issuers follow good governance practices, in particular with respect to sound management structures, employee relations, remuneration of staff and tax compliance.

Each of the funds uses its respective Index to compare the ESG performance of the funds against the ESG performance of the Index. However, the investment strategy of each fund is not continuously aligned with the Index and the Index is not used for the purpose of determining the attainment of the environmental and social characteristics promoted by the funds. Each Index is a broad market index and is not aligned with the environmental and social characteristics promoted by the funds.

Sustainability Risks

The likely impacts of sustainability risks are difficult to quantify. Although the ESG practices of a company may influence its long-term value, there can be no guarantee regarding the performance of individual investments, nor on the returns of the strategy, despite the integration of sustainable risks.

EU Taxonomy

In order to attain the environmental and social characteristics promoted by the above funds, the funds invest in sustainable investments even though such investments do not meet all of the detailed criteria for "environmentally sustainable investments" within the meaning of the Taxonomy Regulation. The Investment Manager expects that the minimum proportion of investments in each of the sub-funds, in environmentally sustainable economic activities aligned with the EU Taxonomy, shall be 0%. The actual proportion of investments aligned with EU Taxonomy during the period was 0%.

Appendix 2 - European Union's Sustainable Finance Disclosure Regulations ("SFDR") (Unaudited) (Continued)**2. KBI Integris Strategy Funds**

- KBI Integris Global Equity Fund

The environmental and social characteristics promoted by the fund above are reductions in harm to the environment and climate arising from the emissions of greenhouse gases and better corporate practices that contribute to a more just society, by, for example, enhancing human capital or providing improved social opportunities to services such as finance, health care, and communications. In identifying investments which allow the Fund to promote environmental and social characteristics, the Investment Manager adopts the following strategies:

- The Investment Manager integrates an analysis of companies' ESG performance into its investment analysis and investment decisions. Companies are rated on an AAA-CCC scale relative to the standards and performance of their industry peers, which is then translated into an ESG score. The Investment Manager gets a single ESG score for each stock from MSCI ESG Research (the "Data Provider"), each stock receiving a score of between 0 and 10, with the highest scoring company receiving a 10. The Investment Manager's target is that the Fund's ESG score is higher than the Index.
- The portfolio construction process employed by the Investment Manager excludes holdings deemed inconsistent with its Responsible Investment Guidelines or that are involved with certain controversial sectors, as determined by the Investment Manager's Responsible Investment Committee, and also excludes investments in companies that score the worst overall ESG grade ("CCC") from the Data Provider. Companies are rated on an AAA-CCC scale relative to the standards and performance of their industry peers.
- The Investment Manager monitors the carbon intensity of companies in which the Fund invests and aims to construct a portfolio whose carbon intensity is lower than the Index. Carbon intensity is a measure of greenhouse gas emissions, in tonnes, relative to the revenue of the company or portfolio. The Investment Manager obtains carbon intensity data from the Data Provider. However, the investment strategy of the fund is not continuously aligned with the Index and the Index is not used for the purpose of determining the attainment of the environmental and social characteristics promoted by the fund. The Index is a broad market index and is not aligned with the environmental and social characteristics promoted by the fund.

The Investment Manager monitors compliance with the environmental and social characteristics outlined above on a regular basis through the use of research and ratings from external data providers.

The Investment Manager monitors a range of sustainability indicators to measure the environmental and social characteristics outlined above, including:

- The weighted average ESG rating of the portfolio, as determined by the use of ESG ratings of companies, supplied by an external data provider of ESG research and ratings.
- The carbon intensity of the portfolio (see above for more information) measured by an external provider of carbon footprint measurement services.

Please see further below the indicators for the fund and the reference benchmark at the end of the period under review.

The Investment Manager also assesses the governance practices and governance performance of all companies in which it invests. This assessment is based on (i) the Investment Manager's own research and knowledge of the company based on its direct interactions with companies and its analysis of the financial statements and related materials of companies; and/or (ii) information including specialised governance information and ratings from at least one external data provider, in order to satisfy itself that the relevant issuers follow good governance practices, in particular with respect to sound management structures, employee relations, remuneration of staff and tax compliance.

The fund uses the MSCI World Index ("the Index") to compare the ESG performance of the fund against the ESG performance of the Index. However, the investment strategy of each fund is not continuously aligned with the Index and the Index is not used for the purpose of determining the attainment of the environmental and social characteristics promoted by the fund. The Index is a broad market index and is not aligned with the environmental and social characteristics promoted by the fund. The Index is not aligned with all the environmental or social characteristics promoted by the fund, as its methodology does not take account of environmental or social characteristics of companies when determining the inclusion of companies in the Index.

Sustainability Risks

The likely impacts of sustainability risks are difficult to quantify. Although the ESG practices of a company may influence its long-term value, there can be no guarantee regarding the performance of individual investments, nor on the returns of the strategy as a whole, despite the integration of sustainable risks.

Appendix 2 - European Union's Sustainable Finance Disclosure Regulations ("SFDR") (Unaudited) (Continued)**2. KBI Integris Strategy Funds (Continued)****EU Taxonomy**

In order to attain the environmental and social characteristics promoted by the above funds, the funds invest in sustainable investments even though such investments do not meet all of the detailed criteria for "environmentally sustainable investments" within the meaning of the Taxonomy Regulation. The Investment Manager expects that the minimum proportion of investments in each of the sub-funds, in environmentally sustainable economic activities aligned with the EU Taxonomy, shall be 0%. The actual proportion of investments aligned with EU Taxonomy during the period was 0%.

Appendix 2 - European Union's Sustainable Finance Disclosure Regulations ("SFDR") (Unaudited) (Continued)**3. KBI Global Small Cap Equity Fund**

The environmental and social characteristics promoted by the fund above are reductions in harm to the environment and climate arising from the emissions of greenhouse gases and better corporate practices that contribute to a more just society, by, for example, enhancing human capital or providing improved social opportunities to services such as finance, health care, and communications. In identifying investments which allow the Fund to promote environmental and social characteristics, the Investment Manager adopts the following strategies:

- The Investment Manager integrates an analysis of companies' ESG performance into its investment analysis and investment decisions. Companies are rated on an AAA-CCC scale relative to the standards and performance of their industry peers, which is then translated into an ESG score. The Investment Manager gets a single ESG score for all stocks for which scores are available from MSCI ESG Research (the "Data Provider"), each of these stocks receiving a score of between 0 and 10, with the highest scoring company receiving a 10. The Investment Manager favours higher score stocks where possible and its aim is for the portfolio to have an equal or higher weighted ESG score than its comparable benchmark.
- The portfolio construction process employed by the Investment Manager excludes holdings deemed inconsistent with its Responsible Investment Guidelines or that are involved with certain controversial sectors, as determined by the Investment Manager's Responsible Investment Committee, and also excludes investments in companies that score the worst overall ESG grade ("CCC") from the Data Provider. Companies are rated on an AAA-CCC scale relative to the standards and performance of their industry peers.
- The Investment Manager monitors the carbon intensity of companies in which the Fund invests and aims to construct a portfolio whose carbon intensity is lower than the Index. Carbon intensity is a measure of greenhouse gas emissions, in tonnes, relative to the revenue of the company or portfolio. The Investment Manager obtains carbon intensity data from the Data Provider. However, the investment strategy of the fund is not continuously aligned with the Index and the Index is not used for the purpose of determining the attainment of the environmental and social characteristics promoted by the fund. The Index is a broad market index and is not aligned with the environmental and social characteristics promoted by the fund.

The Investment Manager monitors compliance with the environmental and social characteristics outlined above on a regular basis through the use of research and ratings from external data providers.

The Investment Manager monitors a range of sustainability indicators to measure the environmental and social characteristics outlined above, including:

- The weighted average ESG rating of the portfolio, as determined by the use of ESG ratings of companies, supplied by an external data provider of ESG research and ratings.
- The carbon intensity of the portfolio (see above for more information) measured by an external provider of carbon footprint measurement services.

Please see further below the indicators for the fund and the reference benchmark at the end of the period under review.

The Investment Manager also assesses the governance practices and governance performance of all companies in which it invests. This assessment is based on (i) the Investment Manager's own research and knowledge of the company based on its direct interactions with companies and its analysis of the financial statements and related materials of companies; and/or (ii) information including specialised governance information and ratings from at least one external data provider, in order to satisfy itself that the relevant issuers follow good governance practices, in particular with respect to sound management structures, employee relations, remuneration of staff and tax compliance.

The fund uses the MSCI Global Small Cap Index ("the Index") to compare the ESG performance of the fund against the ESG performance of the Index. However, the investment strategy of each fund is not continuously aligned with the Index and the Index is not used for the purpose of determining the attainment of the environmental and social characteristics promoted by the fund. The Index is a broad market index and is not aligned with the environmental and social characteristics promoted by the fund. The Index is not aligned with all the environmental or social characteristics promoted by the fund, as its methodology does not take account of environmental or social characteristics of companies when determining the inclusion of companies in the Index.

Sustainability Risks

The likely impacts of sustainability risks are difficult to quantify. Although the ESG practices of a company may influence its long-term value, there can be no guarantee regarding the performance of individual investments, nor on the returns of the strategy as a whole, despite the integration of sustainable risks.

Appendix 2 - European Union's Sustainable Finance Disclosure Regulations ("SFDR") (Unaudited) (Continued)**3. KBI Global Small Cap Equity Fund (Continued)****EU Taxonomy**

In order to attain the environmental and social characteristics promoted by the above funds, the funds invest in sustainable investments even though such investments do not meet all of the detailed criteria for "environmentally sustainable investments" within the meaning of the Taxonomy Regulation. The Investment Manager expects that the minimum proportion of investments in each of the sub-funds, in environmentally sustainable economic activities aligned with the EU Taxonomy, shall be 0%. The actual proportion of investments aligned with EU Taxonomy during the period was 0%.

Appendix 2 - European Union's Sustainable Finance Disclosure Regulations ("SFDR") (Unaudited) (Continued)**4. Natural Resource Strategy Funds**

- KBI Water Fund
- KBI Global Energy Transition Fund
- KBI Global Resource Solutions Fund
- KBI Global Sustainable Infrastructure Fund

The above funds promote environmental and/or social characteristics by each investing in a portfolio of companies which, in the opinion of the Investment Manager, on an aggregate portfolio basis generate a substantial proportion of their turnover from and operate on a sustainable basis in the environmental sector by providing solutions to environmental challenges. The strategy may invest across all facets of the environmental sector. The provision of solutions to environmental challenges is, in the opinion of the Investment Manager, a benefit to the environment and to society.

In identifying investments which allow the Strategy to promote environmental and social characteristics, the Investment Manager adopts the following strategies:

- The Investment Manager identifies companies which operate in the environmental solutions sector and integrates an analysis of such companies' Environmental, Social and Governance ("ESG") performance into its investment analysis and investment decisions.
- The Investment Manager carries out its own assessment of the environmental and social performance of companies in which it invests, based on its own research and knowledge of the companies, public information and information (including specialised ESG information) and ratings from external data providers ("Data Providers").
- The portfolio construction process employed by the Investment Manager excludes holdings deemed inconsistent with its Responsible Investment Policy or that are involved with certain controversial sectors, as determined by the Investment Manager's Responsible Investment Committee. Full details of the exclusions screens and thresholds are available in the Responsible Investing Policy of the Investment Manager which can be viewed on its website at www.kbiglobalinvestors.com.

The Investment Manager monitors compliance with the social and/or environmental characteristics outlined above on a regular basis through its own ongoing research and monitoring of portfolio companies as well as through the use of research and ratings from Data Providers.

The Investment Manager monitors a range of sustainability indicators to measure the environmental and social characteristic outlined above, including:

- The percentage of revenues earned on an estimated basis by portfolio companies which are generated from the provision of solutions to the applicable environmental challenges per fund.
- The weighted average ESG rating of the portfolio, as determined by the use of ESG ratings of companies, supplied by Data Providers.
- The carbon intensity of the portfolio measured by an external provider of carbon footprint measurement services.

Please see further below the indicators for each of the funds and the relevant reference benchmark at the end of the period under review.

The Investment Manager assesses the governance practices and governance performance of all companies in which the product invests. This assessment is based on (i) the Investment Manager's own research and knowledge of the company based on its direct interactions with companies and its analysis of the financial statements and related materials of companies; and/or (ii) information including specialised governance information and ratings from at least one external data provider, in order to satisfy itself that the relevant issuers follow good governance practices, in particular with respect to sound management structures, employee relations, remuneration of staff and tax compliance.

No reference benchmark has been designated for the purpose of attaining the environmental and social characteristics promoted by the funds.

Sustainability Risks

The likely impacts of sustainability risks are difficult to quantify. Although the ESG practices of a company may influence its long-term value, there can be no guarantee regarding the performance of individual investments, nor on the returns of the strategy as a whole, despite the integration of sustainable risks.

Appendix 2 - European Union's Sustainable Finance Disclosure Regulations ("SFDR") (Unaudited) (Continued)**4. Natural Resource Strategy Funds (Continued)****EU Taxonomy**

In order to attain the environmental and social characteristics promoted by the above funds, the funds invest in sustainable investments even though such investments do not meet all of the detailed criteria for "environmentally sustainable investments" within the meaning of the Taxonomy Regulation. The Investment Manager expects that the minimum proportion of investments in each of the sub-funds, in environmentally sustainable economic activities aligned with the EU Taxonomy, shall be 0%. The actual proportion of investments aligned with EU Taxonomy during the period was 0%.

Appendix 2 - European Union's Sustainable Finance Disclosure Regulations ("SFDR") (Unaudited) (Continued)**5. Multi-asset Strategy Funds**

- KBI Diversified Growth Fund

The KBI Diversified Growth Fund does not have as its objective sustainable investment, nor does it promote environmental or social characteristics. As a result, the Fund does not fall within the scope of the Taxonomy Regulation. The investments underlying this Fund do not take into account the EU criteria for environmentally sustainable economic activities.

Principal Adverse Impact Reporting

The Investment Manager does not consider the adverse impacts of investment decisions taken in respect of the Fund on sustainability factors. The Fund does not promote environmental or social characteristics or pursue an objective of sustainable investment. Instead, the objective of the Fund is to provide steady long term capital growth by investing in a combination of collective investment schemes, which are designed to provide exposure (directly or indirectly through the use of financial derivative instruments) to various asset classes such as global equities and equity-related securities, global debt and debt-related securities, currencies and commodities through employing the policies outlined above.

Accordingly, in identifying suitable securities for investment by the Fund, the Investment Manager uses other selection criteria including opportunities based on financial criteria as anticipated and assessed by the Investment Manager and does not currently consider adverse impacts of investment decisions on sustainability factors.

Appendix 3 - UCITS Remuneration Disclosures (Unaudited)**Remuneration**

The ICAV has adopted a remuneration policy as required by the UCITS Regulations and which follows the European Securities and Markets Authority ("ESMA") Guidelines on Sound Remuneration Policies in a way and to the extent that is appropriate to the ICAV's size, and internal organisation, and the nature, scope and complexity of its activities.

The ICAV's remuneration policy is designed to ensure that any relevant conflicts of interest can be managed appropriately at all times. The remuneration policy has been adopted by the Directors, who will review the policy annually and any revisions to the remuneration policy require their approval.

Identified Staff

The ICAV has determined that the following persons would fall within the categories of staff to which remuneration policy applies (Identified Staff):

- (i) Independent Non-Executive Directors.
- (ii) Designated Persons responsible for the monitoring of certain management functions of the ICAV.

	Headcount	Total Fixed Remuneration EUR	Total Variable Remuneration EUR	Total Remuneration EUR
Independent Non-Executive Directors	1*	28,417**	-	28,417
Designated Persons	-	-	-	-

The ICAV does not pay any variable remuneration to any of its Identified Staff.

*There were 2 Independent Non-Executive Directors, Frank Close and Fiona Mulcahy for the first 2 months, and then Fiona Mulcahy for the remainder of the period.

**Frank Close received EUR 4,000 and Fiona Mulcahy received EUR 24,417.

Investment Manager

The ICAV has delegated portfolio management to the Investment Manager which is subject to an equivalent remuneration regime to that in the UCITS directive:

The Fixed, Variable and Total Remuneration given below represents the total remuneration of 18 identified staff of the Investment Manager and is based on data which has been provided by the Investment Manager.

	Total Fixed Remuneration EUR	Total Variable Remuneration EUR	Total Remuneration EUR
Investment Manager	-	-	-
Designated Staff - 18 persons	629,082	341,649	970,731
