Source: KBI Global Investors as of 31/12/22. The risk characteristics are calculated independently by KBI Global Investors using monthly gross returns of the composite over a 10 year period relative to the Index as at the 31/12/22. Portfolio and Benchmark Statistics are from a representative account managed to the same strategy and the benchmark respectively. KBI Global Investors independently estimate these statistics for both the portfolio and the benchmark. The AUM listed above is Water Strategy AUM excluding AUA from Q1 2022. Weighted Avg. Mkt. Cap figures are in US Dollars. The Revenue Alignment SDG Score measures the portfolio contribution to the achievement of United Nations Sustainable Development Goals. Calculations are based on KBIGI's own methodology and are not independently verified as at 12/31/2021 (annually).

KBI calculate both composite returns and benchmark returns. Returns are gross of fees in GBP. Our firm claims GIPS compliance and is annually verified by an independent verification firm to be so. The verification report from our verifier and our GIPS composite presentation are available upon request. The performance record disclosed here is that of the firm's composite for this strategy. The Water strategy gives investors the opportunity to invest in companies whose revenues are closely linked to the water industry. The strategy invests in circa 30 to 60 internationally diversified companies active across the water cycle - the range of activities needed to provide clean water to the end user (human, industrial, agricultural) and return it to nature. The firm invests across all parts of the cycle including: Water and Wastewater Treatment, Water Testing, Infrastructure, Filtration, Engineering/Consulting Services and Pumps/Valves. The investment team evaluates and integrates ESG into the analysis conducted to determine the fundamental value of the companies it invests in. The strategy is managed by a dedicated, specialist team of investment professionals in Boston, USA and Dublin, Ireland. The material risks associated with the composite include market risk and stock-specific event risk. Share prices can decline and there is a risk that the composite may under-perform its benchmark. The benchmark is the MSCI AC World Index, inclusive of net income. The benchmark is designed to measure the equity market performance of developed and emerging market countries from where the strategy draws its securities. The benchmark is market-cap weighted. Sources of foreign exchange rates may be different between the composite and the benchmark; but not materially so. See disclaimers for further information.

Investment Thesis

There are compelling investment opportunities in companies providing solutions to resource scarcity across water, food and energy driven by five long term trends.

- Inadequate supply of water, cleaner energy and arable land for farming
- Increasing demand for resources, driven by population growth, industrialisation and urbanisation
 Increasing regulation and government support
- Increasing investment in infrastructure to address urgent global requirements
- Increasing investment in technology to create solutions and facilitate the more efficient use of resources

Strategy Overview

The KBI Global Investors' Water Strategy is a long-only, high-conviction global equity portfolio investing in 30-60 global companies providing solutions to water scarcity. The strategy has been investing in companies active across all parts of the water cycle including Water and Wastewater Utilities, Water Infrastructure and Water Technology since 2000.

The Water Strategy provides exposure to a number of dominant and persistent themes:

- Global growth
- Natural resource scarcity
- Infrastructure spending
- Emerging market growth
- Mergers and acquisitions

Water brings new sources of alpha to a global equity allocation. Specialist active management is the best way to capture this alpha, carefully qualifying a universe of stocks to ensure exposure to the water theme and then identifying companies with strong fundamentals, leading products, and attractive valuations.

Investment Process

Our investment process is designed to use our specialist skills to precisely define each theme, construct a proprietary investment universe and then build a concentrated, high conviction portfolio designed to outperform the broad market and passive alternatives

Investment Universe Definition

- Precisely defined opportunity set for investment to ensure exposure to drivers of resource scarcity
- Companies for inclusion: Pure Plays and Market Leaders

Weighting Sector

 Focus on bottom up fundamentals and valuation with an overlay of top down influences

Stock Selection

 Focus on stocks with exposure to key themes driving earnings growth, strong fundamentals, competitive advantages, strong management and attractive valuation

Overview

We believe the strategy remains balanced and well diversified both from an end market and geographic perspective. While many portfolio stocks declined in 2022, we are comfortable with our exposures and the potential earnings risk in the portfolio. As we enter 2023, earnings believability is something we are very focused on, and we have a preference for companies where we feel demand may prove more resilient, either due to their exposure to infrastructure stimulus spending in the US, or to end markets like US non-residential construction, where there is a large backlog of projects that have recently begun construction, or due to their "break and fix" orientation. We expect companies where backlogs have reached record highs in many cases to do well in 2023 as supply chain pressures recede and backlogs convert to revenues. Further, we expect to see margin tailwinds for many of our companies as pricing actions taken for most of 2022 to tackle inflation flow through as cost pressures decline.

We also have a preference for more defensive-type business models like regulated utilities, which tend to be monopolies, or non-regulated utilities like Veolia that operate long-term concession type agreements. Companies that we own in the technology space tend to be high quality with a high percentage of their revenues coming from recurring type revenue activities and strong balance sheets. Our exposure to more cyclical end markets like industrial is low and we have been diligent about diversifying our exposure to US housing, doing this by owning a number of different market-leading, high-quality names that tend to be more repair and replacement oriented as opposed to new build, with strong balance sheets, in some cases offsetting growth drivers and decade lows from a valuation perspective. Finally, while our emerging market exposure has been volatile this year given the macro backdrop, there are reasons to believe that China specifically may be emerging from a period of covid-lockdown related weakness and that the government has prioritised stabilising the economy and the property market, which should be positive for our exposures there.

We remain focused on earnings risk and downside protection as we opportunistically take advantage of the recent market volatility. In the past, the earnings growth of the portfolio has been higher than that of the broad equity market, and we expect this to continue, with our expectations for earnings growth 2023 currently ahead of the market. The strategy remains attractively valued with room for its historic premium to be regained.

Disclaimer

KBI Global Investors Ltd is regulated by the Central Bank of Ireland. Please note that, as of 1 January 2023, KBI Global Investors Ltd. has withdrawn from the UK's Temporary Permissions Regime (the "TPR") on the basis that the firm is availing of an exclusion available for overseas persons. KBI Global Investors claims compliance with the Global Investment Performance Standards (GIPS®). Gross results shown do not show the deduction of investment management fees. A client's actual return will be reduced by the management fees and any other expenses which may be incurred in the management of an investment account. For example, a £1,000,000 investment with an assumed annual return of 5% with a management fee of 0.85% would accumulate £8,925 in fees during the first year, £48,444 in fees over five years and £107,690 in fees over ten years. Under MiFID II this is deemed marketing material and should not be regarded as investment research. The firm is defined as the institutional business of KBI Global Investors Ltd., and its subsidiary, KBI Global Investors (North America). The term 'institutional business' shall have the meaning of all pensions, charity and corporate asset management strategies of the firm as they pertain to client funds. Unitised clients are specifically excluded from composite assignment given that their underlying unit holdings are already assigned to composites and such strategies are therefore accounted for in composite values and returns. The firm definition has been re-defined on two occasions over recent years; on 30 September 2010 to reflect the firm's sale to RHJI by our previous parent firm KBC Asset Management NV, and on 1 October 2016 to reflect the firm's sale to Amundi Asset Management. No change in investment process arose as a result of these sales. To receive a copy of the compliant presentation and/or a list of composite descriptions, please contact sales@kbigi.com. IMPORTANT RISK DISCLOSURE STATEMENT: This material is provided for informational purposes only and does not constitute an offer to sell or the solicitation of an offer to purchase any security, product or service including any group trust or fund managed by KBI Global Investors Ltd, or any of its affiliates (collectively, "KBI Global Investors"). The information contained herein does not set forth all of the risks associated with this strategy, and is qualified in its entirety by, and subject to, the information contained in other applicable disclosure documents relating to such a strategy. KBI Global Investors Ltd's investment products, like all investments, involve the risk of loss and may not be suitable for all investors, especially those who are unable to sustain a loss of their investment. The views expressed in this document are expressions of opinion only and should not be construed as investment advice. Past performance may not be a reliable guide to future performance and the value of investments may fall as well as rise. Investments denominated in foreign currencies are subject to changes in exchange rates that may have an adverse effect on the value, price or income of the product. Income generated from an investment may fluctuate in accordance with market conditions and taxation arrangements. Performance for periods of more than 1 year is annualized. All MSCI data is provided "as is". In no event shall MSCI, its affiliates, or any MSCI data provider have any liability of any kind in connection with the MSCI data. No further distribution or dissemination of the MSCI data is permitted without MSCI's prior express written consent. Net total return indices reinvest dividends after the deduction of withholding taxes, using (for international indices) a tax rate applicable to non-resident institutional investors who do not benefit from double taxation treaties. The products mentioned in this Document may not be eligible for sale in some states or countries, nor suitable for all types of investors. In some tables and charts, due to rounding, the sum of the individual components may not appear to be equal to the stated total(s)
