What is this product?

Type:

This product is a non-UCITS Fund.

Term:

This product is open ended.

Objectives:

The aim of the Fund is to achieve long-term capital growth by investing through underlying collective investment schemes in a range of global equity and equity-related securities, fixed income securities, alternative investments and cash. The investment exposure shall be biased towards equities listed or traded on Recognised Exchanges worldwide.

The Fund is considered to be actively managed. The Fund's performance is measured against a custom benchmark return calculated by the Investment Manager by taking the aggregate weighted returns for each asset class of equities, bonds, alternatives and cash. The weightings and measurement criteria used to calculate the various asset class returns are detailed in the periodic reports of the Fund. Any changes to the weights or measurement criteria, which may occur on an infrequent basis, will also be outlined in the periodic reports. However the custom benchmark is not used to define the portfolio composition of the Fund or as a performance target and the Investment Manager has full discretion over the composition of the Fund's portfolio, subject to the stated investment objectives and policies.

This share class does not pay a dividend. Any income arising from the share class will be re-invested.

Intended retail investor:

This product is intended for investors who are prepared to take on a relatively high level of risk of loss to their original capital in order to get a higher potential return, and who plan to stay invested for at least 5 years. It is designed to form part of a portfolio of investments.

What are the risks and what could I get in return?

Risk Indicator

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 4 out of 7, which is "a medium" risk class. This rates the potential losses from future performance at a medium level, however poor market conditions could impact the ability to provide a positive return on your investment.

The Risk Factors applicable to the Fund are liquidity risk, counterparty risk, emerging markets risk, currency risk, operational risk and interest rate risk. Please read the Fund's Annual Report or Prospectus at www.kbiglobalinvestors.com for these and other relevant risks.

Performance scenarios

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the KBI Managed Fund over the last 10 years.

The stress scenario shows what you might get back in extreme market circumstances.

What happens if KBI Global Investors is unable to pay out?

In certain circumstances, you may face financial loss should KBI Global Investors Ltd or Amundi Ireland Ltd or the Depository (Northern Trust Fiduciary Services (Ireland) Ltd), default on their respective obligations. There is no compensation or guarantee scheme in place which may offset, all or any of, this loss.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed, in the first year you would get back the amount that you invested (0 % annual return). For the other holding period, we have assumed the fund performs as shown in the moderate scenario and the investment is EUR 10,000.

Investment: EUR 10,000	If you exit after 1 year	If you exit after 5 years
Total costs	163 EUR	955 EUR
Annual cost impact (*)	1.6%	1.6%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 7.6% before costs and 6.1% after costs.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	The impact of the costs you pay when entering your investment. This is the most you will pay, and you could pay less.	10 EUR
Exit costs	The impact of the costs you pay when exiting your investment. This is the most you will pay, and you could pay less.	5 EUR
Ongoing costs taken each year		If you exit after 1 year
Management fees and other administrative or operating costs	The impact of the costs that are taken each year for managing your investments.	96 EUR
Transaction costs	The impact of direct costs (e.g. commission and taxes) and indirect costs (e.g. price movement) of buying and selling underlying investments for the product.	52 EUR
Incidental costs taken under specific conditions		If you exit after 1 year
Performance fees	This product does not have any performance fees.	0 EUR

How long should I hold it and can I take money out early?

Recommended holding period: 5 years

The Fund is designed to be held over the medium term and we recommend that you hold this investment for at least 5 years.

You can request to take out some or all of your money at any time. You can typically request to buy or sell shares in the sub-fund on any business day (as set out in the Fund's prospectus).

If you cash in at an early stage this will increase the risk of lower investment returns or a loss.

How can I complain?
