Source: KBI Global Investors as of 31/12/23. Portfolio and Benchmark Statistics are from a representative account managed to the same strategy and the benchmark respectively. KBI Global Investors independently estimate these statistics for both the portfolio and the benchmark. The AUM listed above is Circular Economy Strategy AUM excluding Assets under Advisement from Q1 2022. Weighted Avg. Mkt. Cap figures are in US Dollars. The Revenue Alignment SDG Score measures the portfolio contribution to the achievement of United Nations Sustainable Development Goals. Calculations are based on KBIGI's own methodology and are not independently verified as at 09/30/2023 (quarterly).

Investment Thesis

We believe the transition from a linear economy to a Circular Economy is essential to ensure the sustainability of the planet's natural resources. We believe the companies enabling this transition will outperform over time.

This proprietary universe of stocks ensures that the long-term trends we have identified will be the primary drivers of portfolio returns.

These companies:

- Enhance production processes and products to strengthen the Circular Economy
- Minimise the use or consumption of resources
- Reduce waste and increase sustainable recycling
- Provide technology solutions enabling the achievement of a Circular Economy

KBI calculate both composite returns and benchmark returns. Returns are gross of fees in GBP. Our firm claims GIPS compliance and is annually verified by an independent verification firm to be so. The verification report from our verifier and our GIPS composite presentation are available upon request. The performance record disclosed here is that of the firm's composite for this strategy. The transition from linear economy to circular economy is essential to ensure the sustainability of the planet's natural resources. Our investment approach for the Circular Economy Strategy employs a precise and proprietary definition of the theme i.e. companies that are positively aligned with the United Nations Sustainable Development Goals and that are materially advancing the achievement of a circular economy. This proprietary universe of stocks ensures that the long-term trends we have identified will be the primary drivers of portfolio returns. These companies will enhance production processes and products to strengthen the circular economy, minimise the use or consumption of resources, reduce waste and increase sustainable recycling, and provide technology solutions enabling the achievement of a circular economy. The strategy is a long-only equity strategy and is managed by a dedicated, specialist team of investment professionals in Boston, USA and Dublin, Ireland. The material risks associated with the composite include market risk and stock-specific event risk. Share prices can decline and there is a risk that the composite may under-perform its benchmark. The benchmark is the MSCI AC World Index, inclusive of net income. The benchmark is designed to measure the equity market performance of developed and emerging market countries from where the strategy draws its securities. The benchmark is market-cap weighted. Sources of foreign exchange rates may be different between the composite and the benchmark; but not materially so. See disclaimers for further information.

Strategy Overview

The KBI Circular Economy Strategy is a global portfolio of 30 -60 stocks. Our investment approach employs a precise and proprietary definition of the investment theme i.e., companies that materially advance the achievement of a circular economy and are positively aligned with the United Nations Sustainable Development Goals.

The current linear economy model takes resources from the ground, makes products, uses these products, and throws them away when no longer wanted, often because of the way the products are made. This model can be referred to as the Take-Make-Waste model.

The circular economy aims to transform this Take-Make-Waste model by giving us tools to tackle climate change and biodiversity loss together while addressing critical social needs (such as the supply of food, water, clean energy and other everyday goods).

- Take Less - More responsible management, extraction, and supply/use of natural resources
- Make Better - More sustainable production techniques and processes, including designing out waste and pollution
- Waste Less - Responsible disposal and regeneration of materials by keeping them in use

A circular economy follows the 3R approach: Reduce, Reuse and Recycle. Resource use is minimised (Reduce). Reuse of products and parts is maximised (Reuse). And last but not least, raw materials are reused (Recycled) to a high standard. We believe the transition from linear economy to Circular Economy is essential to ensure the sustainability of the planet's natural resources.

Investment Process

Our investment approach employs a precise and proprietary definition of the theme i.e. companies that are positively aligned with the United Nations Sustainable Development Goals and that are materially advancing the achievement of a circular economy. This proprietary universe of stocks ensures that the long-term trends we have identified, will be the primary drivers of portfolio returns.

We define companies by their predominant business activity:

- Efficient Consumption – Companies that enable reduced or more efficient consumption of resources e.g. energy efficiency products (net-zero buildings), water efficiency initiatives (water metering, leak detection), precision agriculture technologies.
- Responsible Production – Companies that advance the circular economy through sustainable production processes or the responsible extraction of natural resources e.g. renewable energy companies, water supply companies, sustainable packaging companies.
- Solutions Providers – Companies providing technologies, solutions or services enabling a circular economy e.g. materials recycling, consulting services, e-mobility technologies.

All research is conducted internally but we also use a select group of niche brokers because they look at the world with the same specialist lens that we do and can provide access to capital raising opportunities. They are used as one of a number of inputs in establishing our independent assessment. More importantly, we attend industry conferences, work closely with several industry bodies and speak directly with companies. For ESG purposes, while we conduct our own assessment of the ESG performance of all companies, we use the services of MSCI ESG Research, a leading provider of ESG research and ratings, to assist with that process, and on governance issues we receive research and proxy voting recommendations from Institutional Shareholder Services, again a leading provider of such services.

We then take all external information and incorporate it into our internal research process to come to our own assessment and view.

Our portfolio managers then assess fundamentals and ultimately aim to identify companies with attractive growth prospects that are not currently reflected in their valuation.

Investment Team

| Circular Economy Portfolio Management Team | Role | Investment Industry Experience |
|--|---|--------------------------------|
| Martin Conroy | Lead Portfolio Manager | 20yrs |
| Colm O'Connor | Head of Portfolio Manager, NR Team | 21yrs |
| Noel O'Halloran | Chief Investment Officer | 36yrs |
| Treasa Ni Chonghaile | Senior Portfolio Manager | 25yrs |
| Catherine Cahill | Senior Portfolio Manager | 23yrs |
| Matt Sheldon | Senior Portfolio Manager | 22rs |
| Andros Florides | Senior Portfolio Manager | 28yrs |
| Eoin Fahy | Head of Responsible Investing and Chief Economist | 35yrs |
| Ben Cooke | Investment Analyst | 7yrs |
| Jeanne Chow Collins | ESG & Engagement Analyst | 23yrs |
| Robert Fullam | Investment Analyst | 9yrs |

Overview

We are optimistic that the multi-year tailwinds driving the transition to a more circular economy provide a compelling investment opportunity. These drivers are both economic and environmental. Economic drivers include a need to become more efficient in our consumption of resources. Environmental drivers include increased levels of regulation relating to waste management, production processes and consumer patterns.

While investors continue to pay premium valuations for growth companies, some without earnings, we have built a well-balanced portfolio where we believe earnings growth will be better than the broader market in the coming years. Longer term, the drivers behind the transition to a circular economy are expected to become more vital as policymakers in both the public and private sectors invest to achieve their own economic and environmental targets.

Disclaimer

KBI Global Investors Ltd is regulated by the Central Bank of Ireland. Please note that, as of 1 January 2023, KBI Global Investors Ltd. has withdrawn from the UK's Temporary Permissions Regime (the "TPR") on the basis that the firm is availing of an exclusion available for overseas persons. KBI Global Investors claims compliance with the Global Investment Performance Standards (GIPS®). Gross results shown do not show the deduction of investment management fees. A client's actual return will be reduced by the management fees and any other expenses which may be incurred in the management of an investment account. For example, a £1,000,000 investment with an assumed annual return of 5% with a management fee of 0.85% would accumulate £8,925 in fees during the first year, £48,444 in fees over five years and £107,690 in fees over ten years. Under MiFID II this is deemed marketing material and should not be regarded as investment research. The firm is defined as the institutional business of KBI Global Investors Ltd., and its subsidiary, KBI Global Investors (North America). The term 'institutional business' shall have the meaning of all pensions, charity and corporate asset management strategies of the firm as they pertain to client funds. Unitholders are specifically excluded from composite assignment given that their underlying unit holdings are already assigned to composites and such strategies are therefore accounted for in composite values and returns. The firm definition has been re-defined on two occasions over recent years; on 30 September 2010 to reflect the firm's sale to RHJI by our previous parent firm KBC Asset Management NV, and on 1 October 2016 to reflect the firm's sale to Amundi Asset Management. No change in investment process arose as a result of these sales. To receive a copy of the compliant presentation and/or a list of composite descriptions, please contact sales@kbigi.com. **IMPORTANT RISK DISCLOSURE STATEMENT:** This material is provided for informational purposes only and does not constitute an offer to sell or the solicitation of an offer to purchase any security, product or service including any group trust or fund managed by KBI Global Investors Ltd, or any of its affiliates (collectively, "KBI Global Investors"). The information contained herein does not set forth all of the risks associated with this strategy, and is qualified in its entirety by, and subject to, the information contained in other applicable disclosure documents relating to such a strategy. KBI Global Investors Ltd's investment products, like all investments, involve the risk of loss and may not be suitable for all investors, especially those who are unable to sustain a loss of their investment. The views expressed in this document are expressions of opinion only and should not be construed as investment advice. Past performance may not be a reliable guide to future performance and the value of investments may fall as well as rise. Investments denominated in foreign currencies are subject to changes in exchange rates that may have an adverse effect on the value, price or income of the product. Income generated from an investment may fluctuate in accordance with market conditions and taxation arrangements. Performance for periods of more than 1 year is annualized. All MSCI data is provided "as is". In no event shall MSCI, its affiliates, or any MSCI data provider have any liability of any kind in connection with the MSCI data. No further distribution or dissemination of the MSCI data is permitted without MSCI's prior express written consent. Net total return indices reinvest dividends after the deduction of withholding taxes, using (for international indices) a tax rate applicable to non-resident institutional investors who do not benefit from double taxation treaties. The products mentioned in this Document may not be eligible for sale in some states or countries, nor suitable for all types of investors. In some tables and charts, due to rounding, the sum of the individual components may not appear to be equal to the stated total(s).
